Highest Cross in the World.

The highest cross in the world is said to be that which caps the loftiest peak of the Harz mountains. The cross is in reality a tower, and it commands a magnificent view of the country around. The height of the tower is 120 feet, and it stands on a mountain 1,731 feet above the sea level. A stair of 200 steps leads to the top of the cross, but there is an elevator of which people may avail themselves who for any reason wish to avoid the long climb.

Grateful.

Young Lady—Give me one yard of —why, haven't I seen you before? Draper's Assistant—Oh, Maud, have you forgotten me? I saved your life at the seaside last summer. Young Lady (warmly)—Why, of course you did. Then you may give me two yards of the ribbon, please.—Illustrated Bits.

Lettuce Salad With Fried Cheese.

Dress the lettuce in the usual way with French dressing. Have a mild cheese, rather dry, cut in strips like French fried potatoes, dip the strips in beaten egg, roll them in fine bread-crumbs and drop them into boiling fat to brown as quickly as possible. Serve with the lettuce.—Boston Post.

The Paper They Were Written On.

The average author would probably laugh at the statement that at one time in the world's history manuscripts, simply as such, irrespective of the nature of the text, were immensely valuable. In ancient times manuscripts were important articles from a commercial point of view. They were excessively scarce and were preserved with the utmost care. Even the users were glad to lend money on them when the owners were obliged to offer them in pawn. It is related in an ancient tome that a student of Pavia, who was reduced by his debaucheries, raised a new fortune by leaving in pawn a manuscript of a body of law, and a grammarian who was ruined by a fire rebuilt his house with two small volumes of Cicero through the ready aid of the pawnbroker.
