ASHLAND, WEDNESDAY, JULY 22, 1896

W. C. T. U. Work.

A visitor, in taking in the entire educational work of the Chautauqua Assembly just closed, would be impressed with the fact that not least among the educational forces was the W. C. T. U. School of Method, treating as it did of its six divisions of work—organization, preventive, evangelistic, educational, social, legal—showing most clearly that the temperance movement of to-day is a great, wide, deep movement, centering in temperance and reaching out into ever wider and wider circles until it has reached every avenue of life, and the great do-every-thing policy of the W. C. T. U. is a natural outgrowth of this important fact. Scientific cookery, heredity, prenatal influences, the labor question and the awakened woman are all problems embraced in the temperance movement of to-day. This was all enlarged upon and interestingly shown by forcible words and blackboard diagrams by the instructor, Mrs. Additon, whose devotion and enthusiasm is assurance that success must ultimately crown her efforts. Her zeal is an inspiration to other women loyal to the white ribbon.

REPORTER.

A song with the title, "There's a Sigh in the Heart," was sent by a young man to a young lady; but the paper fell into the hands of the girl's father, a very unsentimental physician, who exclaimed:

"What unscientific rubbish is this? Who ever heard of such a case?"

He wrote on the outside: "Mistaken diagnosis: no sigh in the heart possible. Sighs relate almost entirely to the lungs and diaphragm."—Youth's Companion.
