NORMAL SCHOOL COLUMN.

In charge of The BLONDIS SISTERS.

The present year bids fair to become the most prosperous in the history of the school, both in number of students and grade of the work. At present the enrollment is 100, and new students are arriving almost every day. Under the management of our president we are sure that this year's work will prove to be a grand success.

The Normal dining hall, thanks to the skill and good management of Mrs. Gibson, is giving satisfaction and excellent meals at the rate of \$1.50 per week.

The naval commission visited our town last Wednesday, but for want of time did not visit the school.

If any of the students should happen to have an important item of news they are invited to make our acquaintance, and we will send their name to the West Side.—Blondis Sisters.

The military company is not yet thoroughly organized, but to amuse the young ladies the boys have their captain to give them a drill almost every day. We will say they do well for an awkward squad.

Prof. of American history. "How did the Israelites cross the river Jordan?" Student—"They waded."—"Next."

Mr.—"Will you please pass the butter, Miss S."—"Wait till the cows come home."—Dining Hall.

A committee has been appointed to draft a constitution and by-laws for a library and reading association. The object of this organization is to take charge of the school library, and to keep copies of all the leading magazines and journals on file in the study room. This is a very important move since the students, (especially those belonging to literary societies) will now have an abundant supply of good references. It is hoped that a large per cent. of the students will take an interest in this society. Any donation either of books or magazines will be thankfully received by the association.

The senior class are busy preparing for the much dreaded "final" examination. They are at present reviewing rhetoric.

President Campbell delivered a lecture Tuesday morning in chapel, his subject was "The Vice of Gambling." In his lecture he gave the young men some good advice. Wonder why some of the boys looked so shamefaced while he was speaking?

The Democratic Little Deutcher (Hans) tried to flirt with us last week, but as we are not inclined that way, he has now turned his attention to the Brunette Sisters.

"Wonder who the Blondin sisters are, and why they do not write any more?" is a question frequently heard at the Normal.

Our items were left out last week, but we are going to be on time hereafter.

Prof. Powell and family moved into their new home on Monday.

Prof. Gregg, of Nebraska, the blind orator, delivered an excellent lecture to a large audience in the Christian church here Sunday evening.

The young men of the Normal are practicing at foot ball almost every evening this week.

The Vesperine society has 36 members.

In addition to our regular Vesperine literary exercises we have decided to read and discuss books in the society. A committee has been appointed to furnish plans and adopt some work. The first debate "Resolved that while going to school young ladies should not keep company with gentlemen," was decided in the affirmative after a lively discussion in which the personal experience of the debaters was made a point. All Vesperines are expected to abide by the decision.

Company "A," Normal cadets met Monday evening and adopted a constitution and by-laws.

The library and reading association met Tuesday evening, President Campbell president, and adopted a constitution and by-laws, and the association decided to subscribe for a number of the leading journals and magazines to be placed in the reading-room of the Normal.

Mr. Boyd, of Slaughter, Wash., and Mr. Warren were visiting the Normal Monday.

W. A. Wann was heard to say "I have not as yet decided to work for any of the prizes offered by the West Side because I fear that I will win the sewing machine and I would have no use for that." We considered this as a very strong hint, but neither of us gave him any encouragement.

My advice is to go to an' not ask unreasonable favors from Uncle Sam, or he moult get his back up, put us on short rations, an' deprive us ob lubbin' communication wid de outside world again. AN OREGON BOY AT ANN ARBOR.

A Polk county boy, now attending school at Ann Arbor, Michigan, writes an interesting letter to his mother. We quote the following:

"An getting along nicely in school, have lots of work now; have a lecture every day lasting one hour and three-quarters. Have recitations in text book twice a week lasting an hour, and elocution at five o'clock twice a week lasting an hour. So you see it makes a fellow get in to get all of that in his head."

"We had quite a time at the college Friday, one fellow in our class has a plug hat he wears, and the seniors tried to take it away from him, he had a cane with which he hit several, then he drew a revolver and held them back with it. The seniors then commenced to rush after the juniors so we had to push with all our might to keep them back, but we finally pushed them back and came out victorious, then of all the hollowing one ever heard was done then. They call that pushing a rush, which they have at the commencing of every year. They were waiting for us when we came down from the lecture room."

"We have one woman in our class. The first time she came in you should have heard the stamping of feet and the clapping of hands."

"My books so far have cost me \$25.70, I do not necessarily have to buy any more books until long toward the end of the year, but there are several more I will get if I see that I need them after a while."

"Like school very much so far, we have a note book for taking down the lectures in, use a fountain pen so we don't have to transcribe them, our text book study commenced Monday. Both classes were together Wednesday and I tell you it was a large one, about 500 scholars in the law department. All of the following I ever heard it was that day, the seniors would yell at every junior that came in the room, I went in with the crowd and took my seat before they got settled, so I escaped the yelling. You could hear them for a mile. One consolation, it will come our turn next year. To-day the seniors got after the juniors on the campus and made them jump the cane as they call it. There would be one at each end of a cane and others to put them over the cane head first. I left the campus when I heard them commence to talk about it, they may get me yet. School started with about 200 scholars. They are not all together at any one time, I would like to see them all together once. It looks quite odd to me to see so many boys on the school grounds playing."

"I have come to the conclusion that I have got to get in and study if I get through in two years. I find lots of young fellows that seem to know but very little. My room mate left me to-day, he got to with a dental student. I was not sorry to see him go, he was a nice young fellow but did not study very much, would go to bed about eight o'clock and snore so loud I could not study. No doubt you will be surprised to hear that I do not go to bed before 10 o'clock, and take a half hour walk every morning before breakfast. I told the lady I could not pay for the room by myself, so she is going to let me have it for \$1 until I can find some one that suits me for a chum, she said I shouldn't leave. She seems to have taken a fancy to me, they bring up fruit to my room every few days."

"Reader came in this morning. He has changed very much since he was in Monmouth. I also met a brother of Hunter Wells, of Portland, he says Miss Goodwin is in Boston taking elocution lessons."

AN EARLY ORDER.

Last week Messrs. Geo. Steele and A. J. Bagley, of Saver, placed an order with Staver & Walker, Portland, Or., through their agents, Goodman & Doty, of this place, for a J. I. Case new iron side steel thrasher. This thrasher is to be manufactured expressly for this order by the Case Threshing Machine Co. at Racine, Wis., and will fill all the requirements necessary to save any and all kinds of Oregon grain in any quantity. The cylinder is to be 36 inches and the separator 36 inches, which with its most powerful threshing machine, manufactured. It is to have one of the latest improved self-feeding apparatus. This machine complete will enable them to take care of grain much faster and in better shape than the old style thrashers. Next season we may expect to hear of some big thrashing from these gentlemen.

Mr. S. T. Burch has laid off and platted the town of Digis, and as soon as it is dedicated he will be ready to sell town lots. About twenty acres are already spoken for.
