WELL-BORING AND DRILLING.—They are in it. If you want a well that will give good satisfaction go to Hall & Sloper. They have been in the business for eight years and understand it better than anyone else. They are responsible, and you can rely on them. Their prices are as low and reasonable as the lowest. Satisfaction guaranteed. 23 41

A NEW FIRM.—R. F. Hurch & Son have fitted up a neat real-estate office on Main street, four doors south of the First National bank, and have entered the business with much good property on hand. If you have property of any kind, farm land, town lots, stock ranches, to sell, list it with them and they will give it special attention. If you wish to buy, interview them, they can show you without doubt suit you, and will deem it no trouble to show you property and give you prices.

CONTRACT LET.—The contract for building sixty stables for the grounds was awarded to Campbell & Co. for the sum of \$1,040 last Monday. Work on the same will be commenced immediately, so that this with other improvements on the grounds will be completed in good time for the fair this coming fall. Let all the citizens of the country work together that we may have a grand display on this occasion and this place will be the envy of the ranks of the other counties of the state in this as it is in many other respects. A fine display in all lines will be a big advertisement for us.

SHEEP SOLD.—From all the information we can gather, there has been twenty-five thousand head of sheep put on the market since the 1st of January, from the West Side of the Willamette, which averaging \$1 per head would amount to one hundred thousand dollars to be distributed among the people. As far as we can ascertain, one-fourth of that number of sheep have been sold, and the rest of the flock is in the hands of the sheep raisers. This being the fact, twenty-five thousand dollars has been put in circulation by the two men referred to.

CHURCH ENTERTAINMENT.—The temperance meeting at the Presbyterian church last evening was largely attended. The feature of the evening's entertainment was the exercises by Mrs. Gates's kindergarten pupils. The little ones recited, sang, and acted in a most creditable manner. Besides the kindergarten class, a troupe of songs and plays were presented, all of a most creditable nature. After these exercises closed several of our ministers made short talks on the temperance question, which were listened to with interest. The wish is generally expressed that Mrs. Gates will decide to give a public entertainment by her pupils in the future.

FILL THEM UP.—If the city marshal, or the street commissioner, or the road overseer, or whoever tends to such things, has a drop of the "milk of human kindness" in his soul, he will haul a couple of loads of good gravel to a way that runs north west of C street, near the corner of main. When not filled with stagnant water, which in point of smell would put a glue factory to shame, it is a wealth of rich mud about the consistency of Portland boardinghouse soap, in which the numerous horses that seem to take delight in stamping, especially on the bridge, are passing. And then there are a lot of other holes on the business streets that need filling.

GOING EAST WITH PRUNES.—J. C. Boyd, the manager of the American Colony Company, has hit upon a novel plan for advertising the horticultural resources of this state. He has purchased a lot of Oregon's choicest silver prunes, and is having them packed in tissue paper and inclosed in small envelopes. There is only one prune in each envelope, but the prunes are so large that they will average about twenty in the pound. Mr. Boyd will start East in a few days with the first lot of 50,000 prunes, and distribute them through Illinois, Indiana, Ohio, and Michigan. He has about 250,000 prunes in all, and will send for more as soon as the supply gives out. In this way Eastern people will be enabled to see quality of fruit raised in Oregon, and for themselves what Oregon raises in the line of fruit.

A LATEWAY IS MID-AIR.—Where the Southern Pacific Railway crosses the Peow river, there is a towering viaduct being built to carry the tracks 325 feet above the surface of the stream. The viaduct is 1,100 feet long, and is the highest in the world that is higher than that in which is 336 feet high. The Peow bridge is being built by the Peow Bridge Company, and is the appearance of the structure and the method of its erection is taken from Engineering News. The viaduct is 2 1/2 feet long and 10 feet high, and is supported by steel towers rising from the bottom of the stream. The construction is unusually heavy, as the bridge is intended for the use of heavy freight trains.—Financial World.

Yocum has sold his livery stable at Salem, and has moved his family here. George Ball's little son, Alfred, has been very sick with the pneumonia, but is now out of danger. Mrs. J. T.
