

## THE WEST SIDE.

—ISSUED BY—  
**West Side Publishing Company**

FRIDAY, SEPTEMBER 30, 1932.

**POTATO RACKS.**—Five thousand potatoes for sale. Inquire of Marsh Bros.

**FOR SALE CHEAP.**—Six lots in White's addition, also business lot on Main street, Independence. Geo. E. Brey.

**A YOUNG PATIENT.**—Frank S. Oakley, of Linn county, aged twelve years, is the latest arrival at the asylum. This attack, which is his first, has lasted nine months. He was brought down by Sheriff C. C. Jackson. —*Statement.*

**AN OVERSIGHT.**—In our report of the fair last week we failed to mention H. L. Mier's photographic display. His exhibit of his photograph gallery in Dallas was No. 1, having it very neatly and artistically arranged. We are truly sorry the oversight occurred, but it will be rectified as such. Next year with the co-operation of all the towns and business firms in the county, we could have a display second to none in the state.

**SMALL PAINTING.**—Probably the smallest painting ever made was the work of the wife of a Finnish artist. It depicted a wall with the sails bent, the miller mounting the stairs with a sack of grain on his back. Upon the terrace where the mill stood was a cart and horse, and on the road leading to it several persons were shown. The picture was beautifully finished, and every object was very distinct, yet it was so amazingly small that its surface, so the story goes, could be covered with a grain of corn.

**THE EDITOR CANCELED.**—It is seldom that you see a happier newspaper man than was the retiring editor of the *West Side* yesterday. Dr. Lee and Butler sent post haste for the farewell editor to come to their office, which call was obeyed, and upon entering the office, Dr. Butler said, "We do not want to make you feel that you are growing old, but as a slight token of our personal regard we present you with this cane, hoping that it may serve you in after years." The recipient of this gold cane was stumped for once, and could only say that "besides thanking you gentlemen for your remembrance of me, we can say that we deeply appreciate the intrinsic value of the token, but much more profoundly do we appreciate the personal regard and kindly spirit which prompted the gift." May many happy coming years shed sunshine upon the heart-strings of Dr. T. J. Lee and O. D. Butler.

## THE ALTAR.

**STRONG.**—Born to the wife of Geo. Strong in this city, Wednesday, September 28, 1932, a daughter. Weight eight pounds. All are doing well, and George is exceedingly happy.

## THE TOMS.

**BYERS.**—At her home near Lewisville, Mrs. A. Byers died of paralysis of the spine at 12 o'clock M. Tuesday, September 27, 1932, aged 58 years. She took sick Sunday morning and suffered only about forty hours. Her remains were interred in the K. of P. cemetery near Monmouth, Wednesday, at 2 p. m. She leaves a husband, three sons, and two daughters to mourn her departure.

## THE FIRST STEP.

Perhaps you are run down, can't eat, can't sleep, can't think, can't do anything to your satisfaction, and you wonder what ails you. You should heed the warning: you are taking the first step into nervous prostration. You need a nerve tonic and in Electric Bitters you will find the exact remedy for restoring your nervous system to its normal, healthy condition. Surprising results follow the use of this great nerve tonic and alterative. Your appetite returns, good digestion is restored, and the liver and kidneys receive healthy action. Try a bottle. Price 50c. at any drug store.

## IT PAYS

To be cautious in the choice of medicine. Many are injured by trying experiments with compounds purporting to be blood-purifiers, the principal recommendation of which would seem to be their "cheapness." Being made up of worthless, though not always harmless, ingredients, they may well be "cheap," but, in the end, they are dear. The most reliable medicines are costly, and can be retailed at moderate prices, only when the manufacturing chemist handles the raw materials in large quantities. It is economy, therefore.

## To Use

Ayer's Sarsaparilla, the valuable compound of which are imported, wholesale, by the J. C. Ayer Co. from the regions where these articles are richest in medicinal properties. "It is a wonder to me that any other medicine should be so successful in curing skin diseases as Ayer's Sarsaparilla. Without having the enormous facilities of the J. C. Ayer Co. it is impossible for other parties to put together such valuable ingredients, at the low cost of Ayer's."

## Ayer's

Sarsaparilla. I have sold it for eighteen years, and have the highest regard for its healing qualities. "Although the formula is known to the world, there can be no successful imitation of Ayer's Sarsaparilla. Without having the enormous facilities of the J. C. Ayer Co. it is impossible for other parties to put together such valuable ingredients, at the low cost of Ayer's."

## Sarsaparilla

It stands at the head of all similar preparations. —Mark A. Jones, 50 years a druggist, Cambridge St., Cambridge, Mass.

PREPARED BY  
**Dr. J. C. AYER & CO., Lowell, Mass.**  
Sold by all Druggists. Price 25c. per bottle.

General Weaver will cut his speaking-tour rather short in the South. In a number of places he was received by showers of stale eggs. The general says it is worthy of note that "the parties responsible for the outrages are young toughs and hoodlums infesting the lower towns. The fact, however, that the police will not or will not preserve order causes Mr. Weaver much surprise. He says the ex-Confederate soldiers have everywhere treated him with the greatest courtesy.

The Colored Men's National Protective Association, at Indianapolis, Indiana, denounced President Harrison, the force bill, and the protective tariff. They did not, however, endorse Cleveland and Stevenson. Free trade was heartily recommended.

The word "blackmail" is de him mad, and for revenge she is cited to appear for trial as Mrs. Jezebel Corbett. As Webster defines Jezebel as meaning an "imprudent, daring, and violent woman," there is a feeling of pent-up passion in the Corbett household.

In all probability these will be the last notes of reporter, under the supervision of J. H. N. Bell. ## MONMOUTH NOTES.

We invite all to come and view the many improvements going on in Monmouth. New buildings are being erected on every hand, giving evidence of Monmouth's present and future prosperity. Here there is no standstill, nor will there be, for this bright and healthy town is destined to be the most populous city of the county, and the locality where educational advantages will eventually obtain pre-eminence over all other localities. Come visit our normal school, witness the exercises taking place of mornings in the chapel, and you will go away satisfied that the normal is a school giving satisfaction to all patrons and students alike. The faculty of the normal receive commendation from all quarters, and all the members of it are active and earnest in their work of advancing the best interests and studies of those under their care. The more modest corner is a fine locality to view the students as they make their way to and from school, and it is a cheering sight to see the joyous smiles and happy faces, as they march along to their various places of abode. We hope when our legislature meets the normal will not be forgotten by its members, but that they will effect such legislation as will be vastly conducive to its continued prosperity, thus making it the pride of the state.

**EXTRACTS FROM A LETTER.**

The following brief description of the buildings and grounds of the Leland Stanford Jr. University, of California, is taken from a private letter to a friend written by Miss Anna Stockton, of our town, who is now a student of that institution of the West:

As you leave the Menlo Park road and drive through the gate of Palo Alto avenue, you catch the first sight of the university buildings and grounds.

The buildings are those of the Quadrangle, Euclid Hall, Robie Hall, the boys' gymnasium, the girls' gymnasium, the museum, the professors' houses, which form the row, and the electric power house. These are situated in a valley, but immediately back of them

the hills begin to rise with their majestic sides, the bareness of which is relieved by a great many different varieties of green trees. An interior view of the quadrangle is at first rather disappointing, as the buildings which compose it are only one story high and remind one forcibly of a number of circus tents so joined together as to form a square, only these are of buff sandstone with red tile roofs. But as you pass through the triple archway and enter the court, the full beauty of the plans (which is that of the old Spanish Missions of California) burst upon the view, and is duly appreciated and admired. There are heavy pillars supporting the covering of the walk; these form large arches all the way around, while the court is paved with asphalt, which is brightened up by eight large round beds of tropical plants. At the east and west ends of the quadrangle are two very large high arches. East of the quadrangle and some little distance from it is Euclid Hall, where the boys manage to exist while they feed their expulsive brains on various and most indigestible topics. This is a very large building, being six stories high, and is of sandstone. West of the quadrangle is Robie Hall, the jolliest place on the grounds; it is not so large as Euclid, being only four stories, and does not cover nearly so much ground. In front of each of these halls are beautiful velvet-like lawns and a flower garden.

Not far from Robie, a very imposing building, indeed. It is not only more honor to these grounds, but would do honor even to Independence. It is of concrete, and there are four large columns at the main entrance, and the vestibule is of gray and white marble. The building is surrounded by statues of Plato, Herodotus, Aristotle, and Plutarch. The gymnasiums back of the halls are frame buildings.

The professors' houses have had a great deal of money spent upon them to make them old, and some of them are nearly all sided with shingles. I don't think it is pretty, but no doubt my taste is not sufficiently cultivated. President Jordan lives in Euclid cottage. With this cottage the romantic story
