THAT BAD FORCE BILL.

Republicans and Democrats alike should keep their eyes on Alabama next month, and see how the force bill works. The Kalb faction of Democrats have petitioned for federal supervisors of election to see if their Democratic opponents cannot be kept straight. This is the force bill in all its hideous ugliness. The law now in force only applies to cities of 20,000 or more inhabitants, but with that restriction we have had a force bill for years. The federal elections bill simply proposed to extend this supervision to all polling places. Federal supervisors have been appointed in the city of Portland, nearly, if not quite, every election for president for years, but no great infamy has developed. The same is true in most other cities. The frauds and intimidation in the South are in the small towns and rural districts, and because the extension of federal supervision to these threatened the breaking up of the solid South by insuring a fair election, Democrats with far more partisan zeal than candor or honesty, cry out against it, and lie about it, and call it infamous. However, Democrats have invoked the force bill against other Democrats, so far as it applies, and Republicans and Democrats alike may now have an opportunity to note the infamy of it. If it should succeed in securing an honest election, and losing the state to Cleveland, honest Democrats may be expected to revile it and its invokers. The Democratic party has so long reconciled its conscience to accepting the fruits of its fraud and violence in the South and unblushing corruption in New York, that it has come to look upon them as God-given rights so long as they are exercised against Republicans only. Yet "a free ballot and a fair count" is in the Republican platform, and like all things founded on justice, equity, truth, and right, it will sometime prevail. It must, or Republican government must be recorded as a failure.

CHLORIDE OF LIME.

Newspaper publishers are now suffering through free trade in chloride of lime, which is used in paper making. This article has been a free-trade item since 1874, and as a consequence, not a pound of it is manufactured in this country, to our discredit it is said, though the importation amounts to 180,000,000 pounds per annum. The recent cholera scare has advanced the price from two to six cents per pound, and this extraordinary profit goes directly into the hands of the foreign manufacturer. And yet our Democratic orators cry for free trade! free trade! Chloride of lime, if protected, could be manufactured in the United States, and cholera epidemics would not then advance the price two hundred percent in a few days; besides, the labor to manufacture this staple article would be employed in the United States.

ENGLAND is really more interested in the result of the election in the United States than are the people here. Mr. J. H. Rogers, the well-known plate manufacturer, was asked what effect the election of Cleveland would have, and said: "I think the result would be that the duties would be gradually lowered, and that the wages would consequently fall. The working class would, of course, not be willing to remain without work, and manufacturers would have to reduce wages to enable them to compete successfully with other countries. Wages in America are at present about double what they are here, but if America adopted free trade they would probably be reduced by one-half, and become equal to the wages paid here. The question of free trade or protection in America is, therefore, of far more importance to the working class of America than it is to any class in this country. In America the working class earn high wages at present, and the cost of living out there is so little more than it is here, that they have much greater comfort, and are able to save more rapidly."—Cardiff Daily News, July 13, 1892.

MR. STEVENSON declares that should he be elected he will, to the best of his ability co-operate with Mr. Cleveland in giving practical effect to his views. There is in this expression some indication that he rather overestimates the active possibilities of a vice-

presidential career. It is altogether possible that moral support would be more in the vice-presidential line than active co-operation.

THE market report which the West Side publishes each week, costs considerable money to obtain each week, but we are glad to know that it meets with approbation of our readers—and they can depend upon its reliability. If it proves to be otherwise we shall discontinue it.

TO THE exhaustive testimony in support of the protective policy of the Republican party may be added that of Mr. Henry Lister & Sons, of Huddersfield and Huby, England. Mr. Lister has recently decided to close his manufacturing establishments in England and set up new ones in Jamestown, New York. He has been moved, he says, by the operation of the McKinley tariff and by the discovery, after careful examination, that working people can live better here than in England. Mr. Lister states that wages are from 50 to 100 per cent higher in this country, that living is cheaper here than in England, and that the working classes enjoy refinements and luxuries far beyond the reach of their English brethren.

THE man who stands up for his principles is to be admired, but the man who will throw away principles and fights for selfish power is to be despised. In this line what do our readers think of the action of R. Miller, the Democratic presidential elector who resigned in favor of Pierce, a People's party elector. Is it not a sacrifice of principle for power, and has the Democratic party, as a party, descended that low? We think not, and Democrats of principle will condemn the action of Mr. Miller or the state Democratic central committee.

THE Republican policy of protection has made good times in America, but if Cleveland is elected the manufacturer of England will have cause to rejoice. The manufacturing of England has been transferred to America, and our people are busy—but free trade will set the idle men of Britain at work. At present, here is the picture as given last week in the telegraph news from London, England: "Gaut hunger will soon invade Britain. Thousands of skilled workmen in almost all trades are now idle through no fault of their own. The evil has grown gradually, and attention has been called to it by the sudden discharge of great bodies of men. Working forces have been cut down bit by bit, and the process is still going on. The docks are half deserted. The labor bureau of the board of trade makes gloomy reports of the situation. The army of unemployed is so large that no cab bearing baggage drives through the streets of London without being followed by some poor fellow seeking a few coins for food and drink. The coroners investigated several cases of actual death by starvation last month." And the Chicago Democratic platform asks we Americans to elect a president who will take the bread out of the mouths of our laboring population, by taking away the demand for his labor.

Twenty-Five-Cent Sociable.

A hat sociable will be given for the benefit of the Presbyterian church, at the residence of Mrs. J. L. Stockton, Friday evening, November 4th. Each gentleman is expected to trim a lady's hat in the latest style. Refreshments free. These ladies will also give a Thanksgiving dinner next month.

Remarkable Rescue.

Mrs. Michael Curtin, Plainfield, Ill., makes the statement that she caught cold, which settled on her lungs; she was treated for a month by her family physician, but grew worse. He told her she was a hopeless victim of consumption and that no medicine could cure her. Her druggist suggested Dr. King's New Discovery for consumption; she bought a bottle and to her delight found herself benefited from first dose. She continued its use and after taking ten bottles, found herself sound and well, now does her own housework and is as well as ever was.—Free trial bottles of this great discovery at any drug store, large bottles 50c and \$1.00.

Beatty's Pianos and Organs.

Hon. Daniel F. Beatty, the great organ and piano manufacturer, is building and shipping more organs and pianos than ever. In 1870 Mr. Beatty left home a penniless plow-boy, and by his indomitable will he has worked his way up so as to sell so far, nearly 100,000 of Beatty's organs and pianos since 1870. Nothing seems to dishearten him; obstacles laid in his way that would have wrecked any ordinary man for ever he turns to an advertisement, and comes out of it brighter than ever. His instruments, as is well known, are very popular and are to be found in all parts of the world. We are informed that during the next ten years he intends to sell 200,000 more of his make. That means a business of \$20,000,000 if we average them at \$100 each. It is hardly the largest business of the kind in existence.—Send to Daniel F. Beatty, Washington, New Jersey, for catalogue.

Pure Blood
