Hay Vever from the Goldenred. You who are lovers of flowers possibly do not know that you can be poisoned by goldenrod, but it is so despite the fact that it came near being the state flower. Any one afflicted with hay fever (that is, a species of catarrh.) should be very careful how they handle this flower when covered with pollen dust.-Al-

Testing the Baking Powders. Comparative Worth Illustrated, DT PROF. PETER COLLIER, LATE CHEMIST IN CHIEF OF THE

DEPARTMENT OF AGRICULTURE, WASHINGTON, D. C. BOYAL* UNRIVALED * FOREST CITY .. * *.. CHICAGO YEAST ** SILVER STAR .. * *.. DODSON & HILS * *

Above diagram was drawn and verified in all its details, by Prof. Peter Collier, who is pre-eminent as a Chemist, and Scientist. The illustration is made in accordance with his chemical tests of each brand enumerated. made in accordance with his chemical tests of each brand enumerated.

The Carbonic acid gas was calculated to get the leavening strength and the quantative analysis to ascertain the comparative wholesomeness, purity, and general usefulness of the leading Powders. The result of Prof. Collier's examination and test, reveals the fact, that, with but one exception, every brand tested contained either Ammonia or Alum, and a number both.

Not one woman in ten thousand would use an Ammonia or Alum Baking Powder if she knew it. Such Powders not only undermine the health, but ammonia imparts a sallow or blotched complexion.

Note.—Dr. Price's Cream Baking Powder, as shown by Prof. Collier's examinations, is the only pure Cream Tartar Powder found free from adulteration and the highest in strength. All authorities report Dr. Price's free from Ammonia, Alum, Lime, or any other adulterant. The purity of this ideal Powder has never been questioned.

★ Indicates the Powder containing either Ammonia or Alum ★★ Indicates the Powder containing both Ammonia and Alum

While the diagram shows some of these Ammonia or Alum to be of higher strength than others classed below them, it must not that they possess any value. All Ammonia or Alum powders a syoided as dangerous, no matter how high their strength.
