### A Little Daughter

Of a Church of England minister  
cured of a distressing rash, by  
Ayer's Sarsaparilla. Mr. RICHARD  
HARRIS, the well-known Druggist, 207  
McGill st., Montreal, P. Q., says:  
"I have used Ayer's Family Medicines  
for 40 years, and have heard nothing but  
good said of them. I know of many  
who have been cured of various  
skin diseases by their use."

### THEIR LITTLE RUSE WORKED.

The Bride and Groom Came Back and  
Shook Out the Rice.

Approves of the hue and cry against  
rice throwing at weddings, a little  
story is told of one of the recent  
brides living not many miles from  
Brookline, Deciding to guard against  
this particular form of warfare, one  
of the members of the family had  
taken the precaution on the evening  
of the eventful day of locking up the  
pantry, and when at the close of the  
reception the self appointed commit-  
tee of ushers and bridesmaids com-  
menced their search for the time honored  
article they were confronted by the  
insurmountable obstacle of a locked  
and barred door.

### Wonderful Cures

performed by Ayer's Sarsaparilla,  
in particular being that of a  
daughter of a Church of England  
minister. The child was born with  
eczema on her face, and was  
consequently unable to see, from which  
she had suffered for two or three years,  
in spite of the best medical treatment  
available. Her father was in great  
distress about the case, and, at my  
recommendation, at last he consented  
to administer Ayer's Sarsaparilla. The  
two bottles which effected a complete  
cure, much to her relief and her father's  
delight. I am sure, that he heartily  
recommends it to the strongest terms  
as the means of curing  
**Ayer's Sarsaparilla**  
Cures others, will cure you.

### Successful Artists.

A clerk from one of the govern-  
ment departments was in Detroit  
recently visiting a friend.  
"Who's the party I saw with you  
yesterday?" asked a citizen of the  
host.  
"He's from Washington," was the  
rather indefinite reply.  
"What does he do there?"  
"He's an artist."  
"Why, some one told me he was a  
government employee."  
"He is."  
"He isn't much of an artist, is he?"  
"Of course, why not?"  
"Because if he were he wouldn't be  
in the government employ."  
"He is just the same, and a first  
class artist too."  
"What does he do?"  
"He draws."  
"Draws what?"  
"Eighteen hundred dollars every  
year."—Detroit Free Press.

### The Law Against Profanity.

An act of parliament that was  
passed in the reign of George II for  
the suppression of profanity is still  
occasionally brought into force.  
Under it the Wisbech magistrates  
have just convicted a man named  
Abraham Pye of Wolpole, who was  
charged with publicly using four pro-  
fane oaths, for which he had rendered  
himself liable to a penalty of 4 shil-  
lings, being 1 shilling for each oath.  
The defendant admitted his guilt, and  
at the request of the chairman the  
clerk explained the provisions of the  
act, which imposed a penalty of 1  
shilling per oath when uttered by a  
laborer, 2 shillings when the offender  
is above a gentleman, and 5 shillings  
when spoken by any one above the  
degree of a gentleman.

### Waking Up Freezing Sleepers.

One of the principal duties of the  
Russian policeman is to awaken those  
unfortunates who have fallen asleep  
in the streets during a hard frost.  
These are usually either the ivoschik  
in his sledge, waiting for a fare and  
dozing off ere that fare comes into  
the sleep of lethargy, or drunken men  
who have tripped and fallen on the  
pavement and have not the energy  
to get up again.

### Stupid Circassian Beauty.

The Circassians, who know nothing  
and are rather stupid than excep-  
tionally intelligent, are physically a  
faultless race, far more so than the  
Germans, who, though the best  
trained people in the world, display  
a marked want of sense, the slum-  
berer, but also puts him into such a  
rage that he is far too angry after-  
ward to fall asleep again.—Temple  
Bar.

### Woman—Got any dried currants?

Cultured Youth (from Boston)  
We have very small, sweet dried  
grapes or raisins from Corinth,  
Greece, formerly called "Corinth,"  
but since corrupted to "currants."  
Woman (switching out)—I don't  
want any corrupted goods. Good  
News.

### Revenge in Animals.

Revenge is a trait I think we must  
legitimately get from animal ances-  
try. Elephants are notorious for  
paying up old scores. A really pleas-  
ant story comes from Sacramento of  
a fellow who carried his whip into  
the park and began tantalizing an  
ape that was chained. The frantic  
animal broke loose and made such  
havoc of the fellow that he was  
slightly more naked than Adam in  
the garden of Eden. A horse in Mo-  
desto, Cal., is reported as having a  
similar quarrel, and though gentle  
with others never sees his tormentor  
without trying to kill him.—St. Louis  
Globe-Democrat.

### A Sunday Game.

Mother—You shouldn't play games  
on Sunday.  
Little Boy—This one is all right.  
"Do you mean that all that run-  
ning and jumping is right?"  
"Yes, we're playing steeplechase  
and pretendin' they is regular church  
steeplechase."—Good News.

### A Luminous Tree.

One of the most remarkable of trees  
or shrubs grows near some springs  
about 12 miles north of Tuscumora.  
It is six or seven feet high, with a  
trunk which at its base is three times

### English View of Our Cooks.

The American is an admirable cook  
—in theory; in practice indeed he  
is too great for him. The sewing ma-  
chine, the reaper and the corn ele-  
vator take up too much time. The  
application of electricity and steam  
to the arts of peace and the ever pre-  
sent cares brought on him by the  
working of the finest constitution in  
the world distract him from his boil-  
ing and his baking. He has indeed  
the same interesting reason for neg-  
lecting his plain chowder and his  
baked pork and beans, that most in-  
genious and admirable of all Ameri-  
can kitchen products, that our King  
Alfred had for letting his hostess  
cakes burn—immersion in the polit-  
ics of his country.

### London's Paupers and Criminals.

On Jan. 1, 1891, the paupers in  
London numbered 119,547, and the  
cost of pauperism was in 1889-90,  
£2,340,000, the cost of each pauper  
being £21 16s. 1d.

### Every Part of a Tree is Useful.

There are no parts of a tree that  
cannot be utilized for the benefit of  
man or animal and vegetable life,  
and neither the stem nor boughs are  
alike, yet neither can be said to differ  
in many of their characteristics and  
the elements governed by natural  
law.—Boston Transcript.

### No Hope.

Frank—Do you know how I can  
cure my love of me?  
Belle—No; if she loves you, her  
case is plainly hopeless.—Kate Field's  
Washington.

### Penalities of Growing Trees.

A tree has many peculiar charac-  
teristics, and some of them puzzle  
the scientists, as well as the chemist  
who makes the analysis. When the  
leaves drop off or a twig withers and  
falls, they leave a small scar, which  
never disappears. A slight excres-  
cence is left to record the existence  
of the missing member—just as a  
man who loses a toe or finger never  
gets rid of the scar. There is some  
times a tendency in trees of the oak  
and maple species to send out from  
their young limbs more wood than  
they can support, and this causes  
contraction at the point of insertion  
or from where the stem starts out,  
and the fiber becomes sometimes  
twisted, so that it obstructs the flow  
of sap. The young limb in such in-  
stances withers and drops off, leaving  
all along the bough small excres-  
cences sufficiently large to account  
for the tapering of the portion of a  
branch where the death occurred.—  
Boston Transcript.

### A Mother's Love.

When the late General Butler was  
in command in New Orleans, a woman  
of that city applied to him for a  
pass through the Union lines that  
she might see her son, who was lying  
wounded in a house in the suburbs.  
The general told her she could have  
one if she would take the oath of al-  
legiance. This she refused to do and  
argued long and earnestly against it,  
breaking into a flood of tears at  
length and exclaiming, "You do not  
know how I love my son." "Ah!"  
cried Butler, with seething emphasis,  
"but you love secession better."—  
New York Sun.

### The Best Market For Fine Tea.

Outside their own countrymen, the  
Chinese growers find their best mar-  
ket for high class teas among the  
Russians. The Slavs consume an im-  
mense quantity of green tea, and the  
nobility pay tremendous prices for the  
pick of the market.—San Fran-  
cisco Chronicle.

### A Dead Man at the Opera.

When opera was running in New  
York, there was no more attentive  
member of the audience than a  
slight, fair man, who was perfect in  
dress and had a pleasant suavity of  
manner. He was always present  
with his wife, but it was noticed that  
he rarely talked together, and he  
never seemed to take offense, as so  
many of the audience used to do, at  
the talking and laughter in the  
boxes. He was stone deaf. He en-  
joyed color and dancing and pictur-  
esque groupings, and he went to the  
opera to see it. He could sometimes  
get the gist of a sentence by watch-  
ing the lips of a speaker, but he had  
not even that comfort at opera  
where the singing was done in Ger-  
man and Italian.—New York Sun.

ginning.—Harper's Bazar.

doing on a certain evening. The two  
individuals were many hundred miles  
apart. The friend in striving to ac-  
complish this feat fell into a pro-  
found trance, in which he was found  
by friends, who thought him dead  
and had him medically treated.  
When he recovered, he wrote his  
friend, saying: "At such an hour you  
were in your room. A visitor had  
announced. He was a person I had  
never seen, but I will describe him  
to you." He then gave a detailed de-  
scription of the caller. All the facts  
were exactly as stated.—Arms.

### Professor S. P. Langley is the inventor

of a scientific flying machine that will fly. It was  
begun about two years ago and has  
been built in complete secrecy. It  
is now finished, and will probably  
be tried soon in Washington. Pro-  
fessor S. P. Langley is at the head of  
the Smithsonian Institute, at Wash-  
ington, where he is looked upon as  
the greatest fountain of knowledge  
and of scientific lore in this country.  
All of the favored few who have  
been allowed to see the "Aero-  
drome" or "Air-Banner," as he has  
christened his new machine, declare  
that it will fly successfully. The  
fairy craft is intended simply for  
experiment, and not in any sense  
for practical service in transporta-  
tion. It is said to look at first glance  
not unlike a huge flying fish.
