Washington, Sept. 2.—Pfeffer yesterday introduced the subtreasury bill. It was referred to the judiciary committee. The bill, as a matter of fact, is in the nature of an amendment to the constitution. The first amendment, known as No. 18, directs the secretary of the treasury to print and issue to state governments \$5,000,000 each for 100,000 inhabitants, or at the rate of \$50 per capita. This money is to be distributed in small denominations legal tender bills, delivered to the state free of cost or interest. States are prohibited from lending it in excess of an interest charge of 3 per cent. The president of the United States and the national treasury, with one senator and two members of the house, will be a committee to see that each state shall choose commissioners to give a bond for the secure handling of the money received, the bond to be approved by the governor of the state, the money to be loaned on landed security of double the amount borrowed. No person more than \$2,000. Corporations are not allowed to lend money. The time for which the money is lent is sixteen years, and one fourth is to be paid every four years. No fees or commissions shall be charged on a loan. All lands and improvements forfeited for non-payment of principal or interest shall go into the public domain. Other money, other than the metal now outstanding, shall be called into the treasury and destroyed. The secretary of the treasury is required to print 5,000,000 50-cent bills and the same number of 25-cent bills to be sold by postmaster.

Amendment 17 prohibits the deposit of any public money in any private or incorporated bank other than the national treasury or subtreasury.

Amendment 18 provides for the free coinage of both gold and silver. Additional mints are to be established near the mines.

Amendment 19 prohibits subtreasurers from buying gold or silver or receiving gold or silver for deposit and issuing substitute money therefor.

Amendment 20 divides the national treasury into two separate departments; one to receive all the revenue due the government and disburse the same, and one to issue and distribute money to the state and renew military bills.

A THOUSAND LOST. The Great Storm on the Atlantic Coast. SAVANNAH, Sept. 2.—S. G. Friedling, of the wholesale grocery firm of S. Guckenheimer & Son, returned from Beaufort last night on a special tug. Mr. Friedling says that at least 800 persons were drowned on the islands in that vicinity, and that when all reports are in upwards of 1000 persons will be found to have perished. The corner had held inquests on 300 bodies, 37 of which were buried in one pit and 50 in another. It is impossible to procure coffins. Captain H. D. Elliott's place on Canesland suffered severely from the storm. As it grew worse Captain Elliott brought his family out of the house and fastened them to the trees with lifelines. I. L. Densler lost his building and contents on Paris island, and he and his wife spent four hours on the top of a tree.

The aggregate lost at Beaufort will exceed \$500,000. The phosphate industry near Beaufort has been ruined, and the crops on the sea islands are a complete loss. Unless immediate relief comes, the suffering will be indescribable. At present identification of the bodies has been abandoned. All that is desired now is to get the bodies out of the way as quickly as possible to prevent epidemics resulting from their rapid decomposition. No accurate record is kept of the number of dead, and the statistics of the disaster will never be known. On each island and mainland the survivors are burying all the remains of the victims that can be found. Coroner's certificates are out of the question. Searching parties make their way around the plantations and houses and as soon as a body is found it is put under ground. Wherever whites are with these parties some sort of a record is kept, but the greater number of blacks are made by negroes. The track ball on the coast has lost not less than 1000 of its negroes, with a probability that it is over that number. It will be a week before all the dead are found, and these are overlooked water on the island beneath which are undoubtedly many bodies. The sea is slowly giving up its dead. The condition of the survivors is pitiable in the extreme.

THE SPREAD OF CHOLERA. Another Case at Jersey City—Congressmen Are Afraid. JERSEY CITY, N. J., Sept.—The state and the government are working to gether taking vigorous measures to prevent the spread of cholera here. The city will be thoroughly patrolled by officers with authority to enter all houses. The streets will be cleaned and sprinkled with disinfectants. Another suspected case was discovered today. The patient was taken to the emergency hospital. He is John Lynch, of Baltimore, who arrived today from Kearney, and was found sick in the street.

It has been decided to exhume the body of Josephine Smith to determine definitely whether it was a genuine case of Asiatic cholera.

will go to San Francisco immediately on receipt of their orders. On account of the uncertainty of the American interests in China because of the treaty law, the gunboat Petrel will be sent to China without delay. Letters received from China state that private parties and secret organizations on the Pacific coast are sending Chinamen back to their native land and the present bad feeling has been augmented.

The Cruiser Olympia. SAN FRANCISCO, Sept. 2.—From Independence received today it is learned that the cruiser Olympia will not be turned over to the trial board for two months, when she leaves the Union Iron works and will be virtually completed. On her trips around the bay it is said to be clearly proved that the necessary speed of twenty knots will be made without any trouble, and there are many who believe she will make twenty-one knots and over. For every quarter of a knot over twenty the Union Iron works will receive a premium of \$50,000.

THE DALLAS SEPT. 4.—About 2 p. m. today word was received here of the accidental shooting of Leonard Cooper, the youngest son of D. J. Cooper, an old and well-known resident of this city. In playing with the other children, he in some way got possession of a shotgun, loaded as usual, and its discharge resulted fatally.

D. J. Cooper is a brother of J. S. Cooper, and others of this city. Leonard was a very bright and popular young man.
