As a state fairs, interstate, national and in portion of my venerable pelt, but surely it is immodest for a man so thin as cule the after-birth is soon disposed of ternation fairs, as next to the school the generally conceded best means o am to walk abroad with practically If it is retained long it is a source of As a preliminary as well as a fina nothing but one layer of Jersey cloth between the public and his skeleton great danger, as it commences to putrify and blood poisoning of the fundamental human advancement an proposition, I wish to state once for all that the above heading represents mparison This is the thirty-fourth Oregon mare follows, fever and inflammation However, I soon crushed down my two words for the same thing, inas state fair. It may therefore not be a set in, and the animal often dies in the course of twenty-four to thirty hours. If the mare does not clean prudish feeling. I put my hand upor the door and shot back the bolt. The much as one of them is the definition waste of time to briefly glance at the of the other. Now let us consider what origin of agriculture in this fair is the process of decomposition. I have not forgotten the old custom in door did not open. In 1824 Dr. John McLaughlin was appointed chief factor of the Hudson in two hours send for the veterinary I knew in an instant what had hap sened. My wife had closed the has vogue in my boyhood days on a hill strigeon at once. There is no anima s) susceptible to blood poison as a Bay company in the valley of the and dropped the arm of the padlock farm in Central New York, nor the then "fair Columbia." Its chief por nare at that stage. through the staple. A man can do time spent in hauling, usually with a After the mare has fouled and the was then Fort George (Astoria). foolish thing like that once in a while yoke of stags and an old sled, the green resolved to change it to the north bank of the Columbia 100 miles inland. He sung is all right and out with its but his repertory is comparatively lin barn ward manure directly on the soil nother on the grass the farmer has nothing to do save to notice that the ited, whereas a woman can do a new one every day for forty years and give and applying it in that condition to most of the crops raised in that cour. called the post Vancouver (now the city) and adopted agriculture as a local support to his fur trade; it hav-ing proved a great advantage to the nights are not too cold. The to each the charm of complete originfont try. For some purposes this plan is well. enough, I have no doubt; but should be made as hardy as possible ality. In fact, this versatility is wo-It is a great mistake to feed young colts heavily. If they are hand fed when the spring freshets came, and the mans best hold. It is no use to Hudson Bay Co., in its contests east melted snow, as it ran in rivulets down the hillside, was amber-colored by the tell her not to do a thing like that their bodies become too heavy for of the Rockies with its great rival again. She doesn't have to. She cat the Northwest Fur company. their legs and their limbs swell. It is dissolved manure (the owners of lands think of something else. moved the twenty-seven head of cattle of the utmost importance to on the "flats" never fertilizing, but Such were my reflections at that mo of all ages the company then owned mares in clean houses when foaling raising better crops than we), I early ment. The situation was decidedly unfrom Fort George to and all the sanitary conditions as learned that this method was very uncomfortable. The bath house was hot, perfect as possible. When the colt 1825, and planted peas and potatoe and it was getting hotter every mo profitable, to say the least. The the same year. He received this year also, from York Fortny, Hudson Bay, one bushel each of wheat, oats, barwatches two and a half years it is ment. The sun was right over it, and chemists will agree with me that the about time to handle him, to halter could hear the shingles warping or earth is a great and a powerful labralead him about, lift his leg, etc. The ley and corn, and one quart of tim-othy seed, all of which were planted tory. The capacity which the soil posfoot should be kept to the proper size sesses of dissolving and dividing, and One roof, by the way, covered a con by the use of the rasp. When coming siderable number of dressing rooms in 1826. The results of this beginning decomposing and absorbing what is three years old he might do a half My wife's, however, was not under were, that in 1828 the company ceased put into it for its own purposes. Is auday's work three or four times a week the same roof as mine. Still I ven-tured to call, "Maude," in a most af-fectionate tone, calculated to impenealogous to the capacity of the animal but should not be worked regularly to import flour for the use of its em system to divide and use food with which it is nourished. Hence, I have ployees. He induced the beginning of settlement in Oregon by advising one until four. I consider it the greatest piece of cruelty ever invented for the trably disguise my real feelings from my neighbors. I did not want any of of the retiring French Canadian en-gagees of the company to settle as a farmer in the Willamette valley gave no doubt that there are circumstances young horse to have calkings on his shoes. He should be shod plain. Shoes under which the green barn yard maem to know I was the victim of an nure can be economically and profitwith calkings spoil the action of the him one quart of wheat for seed and loaned him two cows to furnish his absurd blunder. There was no reply ably introduced into some crops, but horse and develop side bones. The to appeal, 1 did not expect any. not on a hillside farm by any means veterinary surgeon should examine all family milk and two steers to be used seemed certain, however, that she would come to my relief soon. So I The best way to raise corn is to plant it on sod land, recently plowed, with horses shown for prizes, and no ani-mal afflicted with side bone should as team, such were the very beginnings of agriculture here. This great and good man continued to encourage waited while the shingles over my receive a premium. If this were folfresh farm yard manure plowed under. lowed side bone would disappear in ten years. The frog of the foot is head curled up and got crisp like Sarand a small quantity of well decomother retiring servants of the company atoga chips. posed manure or some commercial fersufficient to prevent a horse from slipping. When a horse shod with in the same way and adopted the same tilizer put into the hill; and the reason She didn't come. I stood it as long as liberal policy towards the free Amer I could, but the moment came when is obvious. During the sixty days of ican trappers who left the hunter's life and adopted farming as a means of subsistence. He was equally gen-crous to the first Missourians: for beculkers makes a mistake he loses all command of himself. Horses should not be fed with bolled food for the felt compelled to cast myself upon the hot corn weather the earth and the heat are doing exactly what the farmmercy of strangers. I lifted my voice and announced my situation to the varer does in the compost heap; and the reason that they bolt it: indigestion ious persons by whom I was surroundcorn, when it needs the manure, the sides furnishing them the use of horses and boats to get to their chosen locafollows, colle and other ills. Wheat ed. Several young persons of the op-posite sex gigglad. A man in a far corner said, "I call that tongh." Then earth, the sun, and the heated air are is the best all round food for horses. very busy preparing the plant food for given with discretion. Sixty-two pounds of wheat sells at the same tion, near this city of their planting, its use. Experience has taught us that this method of cultivating the corn he furnished them seven oxen to do he laughed in a deep bass key and his their heavy hauling and eight mileh price as forty-two pounds of oats. Accrop is a good one. But experience has also taught us that for most crops unseemly mirth was echoed from varcows in place of the two cows Dr. cording to analysis it is the more ious points, and it was a sorrow to valuable food, pound for pound, but is Lee had brought across the plains reflect that if one of them should be well composted and well decompos too stimulating unless given very cautiously. The farmer might begin and left at Walla Walla. washed up, drowned, on the beach next day, I should not have the satis manure is by far the most useful. In decomposing our animal manures, we should not forget that while the with four pounds of wheat per day faction of recognizing the remains. coarsely ground, increasing it to six pounds and in this way help to raise There was, however, a good Samar manure is largely diminished by de-composition, the fertilizing power of tan among them. He said in a rather the price of the article as well as detimid voice, as if he was unaccustomed the manure is largely increased, and crease the cost of feeding the horses, never, until a manure is decomposed Water should be given before feeding, the manure is largely increased, and to speaking in public: I'll come around and let you out is it fit for the food of a plant. "I intended to keep the secret. But really, Fred, I've been almost dying to have a good laugh with Nellie over it. And tonight the opportunity was too tempting to resist."

"Mercy, Fan! If you tell Neille, I'l never hear the last of it."

"Oh, I must! It is too late to re ede. Nellie will imagine it worse, if possible, than it really is. But I'll not prolong your agony. I'll be as ssible," said Fannie.

And amid cries of "Don't!" "Don't!" and "Yes! do. do!" Fannie began. "The day I reached here, just as

came out of the depot, I spied my loved and respected cousin Fred entering the street car. I hurried up and got in immediately after him. Even if my veil had been raised I could hardly expected him to have recognized me, as I have changed much in five years. As it was, my face was completely hidden. The car was much crowded, many standing I next behind Fred. I was well laden with lots of little packoages, so the idea struck me to drop a few into Fred's pockets, Without discovery I put what I wished into one, and was about slipping my portmaneu into the other when my hand was caught with such a grip that I cried right out. At the same time Fred exclaimed. "Here is a pick-pocket!" and of course there was a policeman there, as none was needed. I was too frightened speak for a moment. At length I found voice enough to say to the officer, who was making towards me, "The gen-tleman will find he is mistaken in a

"After the first fright I was really mused, notwithstanding the mortifying situation. By that time Fred had drawn forth my portmonnale. Nod-

ding to the policeman he sad;" "An old dodge. Putting into my pocket what she had taken from some one's else. Has anyone here lost this?'

he asked, holding up my portmonnale "No one claimed it. I managed to get my veil off then, that I had een tugging at. I had gotten a lady in the depot to tie it tightly, as it was blowing a perfect gale when I arrived. All eyes were on me, cf course, and the officer, not recognizing an old offender, and not a very guilty looking young one, hesitated. I looked eagerly at Fred, to see if he would not recognize me, but he did not. There was a very embarrassing pause then that had to be ended, so I said,

not trying to restrain my smiles: "'If you will open that portmon nale, Mr. Loring, you will see my card I thought my acquaintance would justify my loading you with some of my bundles. If you will notice, your other pocket is full.'

"Everyone awaited eagerly the re suit. Quickly Fred did my bidding. You may imagine his look when he exclaimed:

"'Fannie Loring! Bless my Coz, can you ever forgive me? But how could I know you? I've not seen you since you were a child.

"There was a shout of laughter heard then in which Fred and Ljoined. But Fred's was not a very hearty laugh, and I think he was very glad to get off the car, for he made me walk at least three times as far as you and I walk when we leave the car."

Nellie was almost convulsed with laughter, which baby seemed to enjoy yery much. And Fred exclaimed:

"It was not half so had as you have made it out, Fan. And just for punment for your laughing so, Nellie, I hope baby will not go to sleep for urs. 1'm off now."

Merry rippling laughter followed him And Fred ran down the stairs and out of the house, almost hoping somebody might attempt to rob or murder him even, so that his revolver might prove of great avail, and thus silence Nellie, who was ever talking about what she

Fred broke out laughing to himself. maying "You look as much frightened, Nell as I imagine that man did when

went for his watch." Next morning Fred was longer than usual getting off from home, and all Nellie's urging haste seemed to have the tendency to retard instead of ac-

celerating his motions. But at last, to her great relief he was off. After getting a few rods from home he drew forth the stolen watch, and found, of course, that it had run down. Having no key to fit it, he approached a jew

elery shop, intending to have it wound up. He failed to notice the very paring suit. ticular attention with which a police man was regarding him. Just as he was about to enter the store, he was tapped on the shoulder. Turning, he beheld the officer, a total stranger him, so he knew it was not a bit of use to explain the case to him. So, to attract as little attention as possible. he walked quietly along with his not very agreeable companion, until they reached the police headquarters.

There he began his explanation. All were strange faces around him, on which he saw unmistakable signs of merriment when he said it was a mis take. And to his immense surprise after he had handed over the dreadful watch and was turning to leave, he was a prisoner-the accusation, "robbery and assault, with intent to kill." He sank on he bench for a moment, so overwhelmed with surprise and mortification that he could with difficulty collect his senses enough to know what to do. Just then a gentleman entered and said to an officer near:

"I was surprised to hear that you had caught the villain so soon. Where is the scoundrel? What does he say?" "That it was all a mistake!" an swered the officer with a very significant smile. "There he is," pointing Fred.

'Of course-the villain! And if I had he roof. been so unfortunate as not to have had watch to hand over he would have murdered and robbed me of whatever I might have had of value. The mus derous rascal!-Ah! how are you Lor ing? You here?" advancing and shaking Fred's hand cordially, and continuing: "Show Which is he?" "Show me that cut-throat!

The expression on Fred's face may possibly be imagined but it cannot be lescribed. And when, in answer in answer to the call, "Prisoner stand up," he arose, his friend's-the plaintiff's-surprise was stupendous for a moment; and then, breaking into a hearty chuckle, he exclaimed: "Of course I know it was a

lake." The dignity of the place was soon forgotten by all of them, and never such a shout of laughter was heard

before within these walls. But Fred could not join in it save him. He had too lately stood in the place of an individual bearing quite too many opprobrious epitheta to feel very light-hearted.

He returned home to relieve llo's mind, telling her it was settledshe need have no more anxiety abou it. But he never told her how it was settled. One thing she noticed-he was not so fond of his revolver's compan-

ionship as he used to be. And once she heard him say: "If the law were more strenuous regard to the carrying of concealed weapons, there would be fewer criminal indictments."-New York News.

DANIEL WEBSTER.

I shall always remember the firs time I saw Mr. Webster and the in ression he made upon my then very youthful mind. It was at a gathering

at Fancuil Hall. As he rose and

in it for him if he did. He responded that he was coming immediately, and I heard his door open and close. Then, ciety of England, setting forth exactly istening intently I heard the patter of how much farm yard manure is inhis bare feet on the sidewalk outside creased in value by decomposition. The my prison. The feet halted at the door results of these careful experiments next to mine on the right. Then a were: That all soluble salts of manuare my prison. The feet halted at the door

fearful feminine yell arose from that were largely increased by decompoquarter.

Settled farming thus begun sup-ported a population of 500, consisting of sixty Canadians with native wives and halfbreed families, and sixty-five American families in 1841. There were 120 farms, producing 35,000 bushels of wheat and a due proportion of oats, barley, peas and potatoes. There was then in the country 3,000 head of cat-tle and 500 head of horses, besides an uncounted numbed of hogs. The catwere owned mostly by the Hudson Bay Co. and the Methodist Mis-

an acre of land better, guicker and cheaper than can be done with horse ower, There is still another agency that must claim attention, as transfer ring to the mechanic a branch of pro duction (I may say) which up to recent

date has been the pride of the farmer. I mean the already great and increasing use of the bicycle in the place of the saddle horse. It is becoming to those who have indoor occupations, a means at once of saving time and taking exercise. It is no spirit of faultinding with the present management of this and other fairs, that impels me to say, that to continue to offer \$10,000 for trials of speed of horses, which, (except they are excellent) will not command in the market the cost of

heir rearing, is not good use of money. True it is a progressive people seem attracted to contests of animal power, but, with the introduction of the bi-

cycle and the use of electric force, it seems to me there comes questions of public economy which ought to take dismissal of 1.000 horses from service in Oregon, of an average weight of the dismission dismissal of 1,000 horses from service Miss Marion Gitchrist and any the in Oregon, of an average weight of 1,150 pounds each, and more than that has alrendy been superceded, their places can be taken, and in time will be taken by 7,500 of mankind, to be for from the understand tr fed from the products of the land it course.
