SEN. BILL HITS HARD

Rules in Force

And Opens the Fight in His Usual Style.

A Day's Record of Men and Events at the Nation's Big Capital.

WASHINGTON, Dec. 18.—Senator Hill of New York today made a speech in the senate favoring the changes in the rules of the senate so as to expedite business. He said:

"The sentiment of the country, manifested through the press, rostrum and other avenues by which public opinion is usually communicated seems to desire the adoption of some new methods of procedure here whereby necessary legislation may be facilitated, sessions of congress materially shortened and the best interests of the country, so interwoven with or largely affected by congressional action, more seriously preserved in their normal condition."

"I assert that the privilege of unlimited debate in a legislative body is inconsistent with, and destructive of, the right and power of legislation. Such a condition of affairs naturally forces compromises and concessions of doubtful propriety as a condition of any legislation before permitted."

"It is as certain as anything in political affairs can be, if our republican friends obtain control of this body and desire to enact important legislation to carry out their principles, they will boldly amend the rules to enable them to do it promptly."

The senator also argued in favor of curtailing a quorum and closed by declaring that no silly cry of conservatism should prevent the desired amendments to the rules.

Notwithstanding the fact that debate on the currency bill was scheduled to begin in the house today, less than 100 members were present when Speaker Crisp dropped the gavel. The committee on rules had prepared a special order, under which the house should operate, but had decided, in view of the democratic opposition to the measure, not to offer it at present, but to allow Springer to call up the bill by virtue of his privilege. Immediately after the call of committee for reports, therefore, the chairman of the banking and currency committee moved the house go into committee of the whole for consideration of the secretary of the treasury, prevailed without discussion and Richardson of Tennessee took the chair.

Walker, republican, of Massachusetts, who was in charge of the opposition to the measure, began with a statement of the essence of the Bland money plan. The beginning and end of that plan, he said, was to give to the national banks power to withdraw their United States bonds from the treasury and issue circulating notes on their assets up to fifty per cent. It afforded not a shadow of relief and did not deserve a moment's consideration. Again, the bill presented the danger of a currency issue, an amazing scheme. The bill had a feature that could be enacted except after remodeling without endangering the financial interests of the country. Carlisle had drawn the bill, over the objection of the treasury, and the present condition of things in the banking world, and the dangers that it presented. Yet the committee on banking and currency had dawdled in the matter until this untoward scheme of the secretary of the treasury had been thrown into the hopper, when, after a few hearings, it had been brought into the house without the consent of the treasury, and his own bill and his superiority over the Carlisle bill. He expressed the hope that his bill would be passed in place of the Carlisle bill.

Dolph, in reporting adversely the general tenor of the Carlisle bill, expressed the belief that congress has not the power to forfeit these lands, but that the right to them was vested in the railroads. Even if congress had the power to forfeit the lands, he said, it would be unjust and inequitable to the railroad companies.

Berry of Arkansas said the majority in the committee for reporting the bill adversely was but one five-ninths majority. He had voted for its passage. In order to get the bill on the calendar one member had changed his vote and had consented to an adverse report for that purpose. He charged Walker with ought to pass the bill, and said the railroads were not entitled to one foot of the land.

The vote on reporting the bill stood as follows: Ayres—Berry, Pascoe, Martin, McLaren, Allen, Nays—Vilas, Dolph, Pettigrew, Carrey, Dubois.

Not voting—Power.

Senator Allen afterwards changed his vote so as to permit the bill to be reported adversely, as that appeared to be the only way of getting it reported at all.

The gold reserve was further reduced today by the withdrawal at New York of \$1,800,000, which leaves the amount of reserve at the close of business today \$91,554,469, and the cash balance at \$155,048,459.

Speaker Crisp and the home leaders have reached a tacit agreement by which adjournment for the holiday recess will be taken at the close of the session next Saturday, and the reassembling will be at noon on January 3d.

Representative Bland of Missouri will move to strike out all after the enacting clause in the Carlisle currency bill now before the house, and substitute a currency system. The Bland bill provides for the free coinage of silver and for the deposit of gold and silver bullion and the issuance of legal tender notes upon it. The bill is to be subsequently amended and the coin notes are to be redeemed in gold and silver without discrimination as may be most advantageous to the country. Provision is also made for the most. Provision is also made for the most. Provision is also made for the most.

London, Dec. 18.—Captains Cranfield and today that from the present outlook there would be no race for the America cup.

HEAVY SUIT ENDED.

Boston, Dec. 18.—The long contested patent suit of the United States vs. the American Bell Telephone company was ended this morning when Judge Carpenter of the United States circuit court rendered his decision against the telephone company. This suit was a bill in equity praying for the repeal of letters patent issued to Elisha Gray, assignor of the American Bell Telephone company for combined telephone and telegraph system. The Bell patents were issued to the telephone company but were never put into use by them on account, they claim, of the expense of making changes in the telephone system while other competitors were prevented from using the system.

REORGANIZATION DEMANDED AND THE WORKING CAPITAL TO BE REPLENISHED.

Proria, Ill., Dec. 18.—A circular, adopted by the directors of the Distilling and Cattle Feeding company at a meeting held in this city last week was sent out to the stockholders of the company tonight. It contains a statement of the condition of the company and declares re-organization "a necessary, though not a desirable, condition for the approval of the stockholders."

The circular states that the board has made every possible preparation to take advantage of the increased tax lately enacted into law. A large amount of spirits and alcohol in bond had been accumulated. The circular then reviews the efforts of President Cleveland and other officials to effect a loan and the difficulties they encountered. The failure to get any goods at this critical period was the severest blow ever experienced by the company. Great as was the financial loss, the loss of prestige was much larger. This step forced the company to a portion of the goods, trade became restless and the company was forced to abandon the rebate system which had proved so satisfactory in the past. This step forced the company to face now and hazardous conditions which will require more than ordinary sagacity and wisdom to meet.

The cash assets are largely tied up in spirits but there is enough cash in the past been used as a working capital, and after the rebates are paid an additional working capital will be required. In the seven years the Distilling and Cattle Feeding trust, and Distilling and Cattle Feeding company, its successor, have been in existence 290,522,424 quarts gallons have been marketed, at the amount of dividends paid, \$6,118,888.20.

THE GRAIN MARKETS.

Portland, Dec. 18.—Wheat, 60c; barley, 77c; rye, 60c; oats, 40c; clover, 20c; alfalfa, 15c; timothy, 15c; corn, 35c; sorghum, 35c; cottonseed, 15c; linseed, 15c; flaxseed, 15c; soybeans, 15c; peas, 15c;
