Seasonal Pulpit Methods. Rev. Edward Davis, pastor of the Christian church, a young preacher whose bizarre methods attract immense crowds, preached on dancing, at Oakland, Cal. defending waiting and illustrating his grace by dancing waltz steps in the pulpit, with an imaginary partner. The young minister must have been "one of the boys" himself at one time.

Revised estimates of gold production in the United States in 1894, according to the latest mint figures, place the product at \$43,000,000. This is still a conservative estimate compared with Mr. Valentine's calculation of \$46,862,000. The average value of the world's output of gold and silver from 1861 to 1895 was \$170,573,883, so that the gold product alone now appears to equal the combined product of the precious metals when they were both in use for monetary purposes during some of the years of greatest productivity.

Dr. Miles' Heart Cure and am happy to say it has cured me. I now have a splendid appetite and sleep well. Its effect was truly marvelous."
