The will had been drawn up and spon the table at my bedside. The carefully preserved by a prominent

Dr. Brown had driven his pen as if under the domination of a higher ing once lifted it from the paper to the inkstand, and yet there stood the written characters, black and clear, apon the white paper, and reminded bim that he was not alone; further- to its bequest had called out these more, that the head and heart whose wish and request these characters recorded, belonged to an existence which held his own being, thought and will

He made an heroic effort to regain the mastery of himself, and with a powerful shake, as if to free himself from the grasp of this strange will, "Madam, I---"Yes, but, doctor, the master sent

me to tell you to come right away. Mrs. Morley has been lying for two hours like dead, and the master thinks it must be nearly over with her." Brown staggered back in amazement, and stared so vacantly at the waiting coachman that the man was

atruck dumb. "Jan? Where did you come from Mrs. Morley is not yet--" "Dead? No doctor, not yet, but the

master says she can't last much long-"Very well. You see to the horses. and I'll come right away."

Dr. Brown put his hands to his head. He had need to convince himself by some such means of his own mortal existence. Then he seized his hat and coat and hurried after the coachman. Drawing his coat tightly about him,

he leaned back in the corner of the carriage and racked his brain over the strange occurrence, but to no purpose. The doctor was a hard-headed, practical man, and if anyone had related to him the events of the past day, he would have laughed him to scorn; but, earnestly as he tried to do so now, it was impossible for him to conjure up a smile. The carriage stopped and Mr. Morley was at the

"I am glad you have come, doctor. I was afraid you would be too late As the clock struck 12 there was absolutely no breath nor pulse, and not until half an hour ago did she seem to come back a little to life. She has

just asked for you." These words were spoken outside the sick room door. The doctor laid aside his cont and went in, followed by Mr. Morley. The physician felt something like horror at being in the near presence of this man, who since half an hour ago had figured in his mind as the murderer of his wife, and here in the sick room, while looking upon the dying woman, in whose features he are the height of fashion. saw plainly his recent guest, did he feel again that compelling force

which had put the pen in his hand. The sick woman seemed to have been anxiously awaiting his coming for her great, earnest eyes fastened hemselves upon his face as he entered the room, and as he bent over for the hair for young ladies. her he heard distinctly the low spoken her he heard distinctly the low spoken words, "Doctor, my child!" and in the olry is the "coupled brooch." Two means certain that the '95 harvests

stepped back to give place to the sor-rowing husband, who flung himself down beside the bed.

When he arose and turned toward the doctor a tear glittered on his the doctor a tear glittered on his lashes. His voice was hearse and tremulous when he thanked the physician for all his tender care during the long lilness of his wife, concluding with "I shall never forget it!"

Dr. Brown only shook his head. He was thinking of the dead woman's will and enswered avantage. "I could

will, and answered, evasively. "I could not have helped your dead wife much, since I never discovered the true cause of her illness."

"No reproaches, my friend. You did what you could, and whether this dis-ease can be exactly diagnosed seems to me, from what I know, altogether

"Every disease," replied the doctor, "must finally disclose its cause to the patient and thorough searcher; but in this case there were so many accompanying phenomena that it was quite mpossible to discover the cause of predominant disorder, at least in the

living body." The doctor, as he said this, looked sharply at his companion, over whose countenance a slight cloud seemed to pass; yet there was no change in his voice as he said: "No, no, doctor, we won't do that! The beloved body was sufficiently tormented in life; in death | house on the state of the Union, and

A New Project Now Under Consideration.

and Report on a Plan for Deeper Water.

The following is Congressman Hernann's bill (H. R. No. 8038) considered in the house of representatives just adjourned. On February 21st it was referred to the committee on rivers and harbors and ordered to be printed, and on February 22d it was reported with amendments, committed to the committee of the whole ordered to be printed:

A bill providing for the appointment dead; and isn't there any direction to of a board of engineers to consider

a family with which he had been on an intimate footing for years, and consequently his personal interest was equently his personal interest was awakened. The doctor saw no nope The doctor during this conversation The consist of three officers of the engineer corps not below the rank of lieutenant colonel who, together with the chief of engineers of the early morning he had hourly expected death. He carefully scrutinized the careful and critical examination of her death. Weary and dispirited, afminded manner, picked up a little box gon, with a view to a project for from the table which stood beside the deeper water, and shall report the more passed in review the whole bed and carelessly pushed back the result of such investigation, with escourse of his patient's illness. Every cover. At sight of the contents he timate of cost, to the next regular could hardly restrain an exclamation; session of congress: Provided, that for there, exactly as had been desuch selection of engineers shall be yellow with time, and a lock of hair, cific coast: And provided further that the cost of said investigation and also surveys and the expenses of said board shall be defrayed from the balance of money available of the appro-priation made for improving the harbor at Yaquina bay, in Oregon, by act of congress of August 7th, 1894.

Mr. Hermann, from the committee n rivers and harbors, submitted the following report to accompany the

ora, to whom was referred the bil (H. R. 8068) providing for the appointment of a board of engineers t consider and report on a new project for deeper water on the bar of Yr quina bay, in Oregon, having consid ered the same respectfully report as follows: That the project of 1888, as modified

be raised to full high tide, and that five groins be built from the south letty channelwards in order to preand this bar depth and location of hannel has been kept uninterrupt sily during the entire year. We find, owever, that the importance of this bay is such that deeper water should provided on the par, with a view accommodating the deep-draft forign shipping which is now offered on of the contemplated extension castward of the Oregon Pacific raiload, which it is proposed, under the iew management now about to asame proprietorship and control, shall with eastern terminals, and hus make a transcontinental railway with its western terminus on waters of Yaquina bay.

This will so calarge the present affic, already large and increasing from and to the great Willamette valer, as to justify and imperatively remire deeper water than has so far een obtained by the existing project. the bill now recommended propose a board of three engineer officers of be United States army, under the grade of lieutenant-colonel, to be apointed by the president, and such ngineers, with the chief of engineers chall make a thorough examination and survey, and report a project, with

an estimate of cost, for obtaining

eeper water on the bar at the enrance of said Yaquina bay. It is the opinion of your committee hat a project can be agreed on that will enable the government to obtain permanent depth of water suf cient to enable ships engaged in for ign shipping to enter Yaquina without danger or delay, regardless of a further extension of the presen etty works, and with this view you ommittee report said bill (H. R. 8008 sack to the house with a recommer

WHEAT MAY YET BE PROFIT-

dation that it do pass.

"What is wheat likely to be worth ext fall and what will pay better? This question is asked by a subscribe who is only one out of thousands vi tally interested in the same problem While the markets of the world to all intents and purposes remain dull, dragging and lifeless, certain features are discernible to the close student of the situation which contain some rea sons for hope that wheat may do bet ter. For one thing, the price though low is doggedly steady and quickly recovers from occasional onslaughts of the bears. While those who have faithfully stuck to wheat for months and months have been disappointed, there are many who are ready to offer genuine support as soon as they see positive reasons for encouragement "No, but I have a strong suspicion which may come sooner than expected. Rapid as the marketing has been broughout the entire crop year, and burdensome as is the visible supply n this country, stocks in Europe are materially smaller than a year ago and during the past month the world's supply has actually decreased. This is all the more significant when it is remembered that the amount of wheat back in farmers' hands is conceded on all sides to be rather more nearly exhausted than usual. European buyers, on whom we depend to take ou surplus, have not alone permitted their own stock to run down but are now obliged to closely watch supplies here, and should the amount availonving.

able begin to decrease rapidly, they might be spurred up to more vigorous The coming world's crop is of course an uncertain but most important factor. The Argentine harvest is now generally conceded deficient in qualets of six, for smart calling costumes. SWEET BREATH.

Every woman, that is, every really fastidious woman, wants to have a breath sweetly wholesome, in keeping with her dainty ensemble. This, let it be known, can never be obtained through the use of enchous and spiced confections of the bon bonniere. This sort of thing savors of the perfume that is attempted as a disguise for dirt. Fragrance may keep excellent company with soap and water-like-wise certain delicate breath perfumers may be used when the stomach is in a thoroughly healthy condition. But it is a vivid mistake for a girl to think that she can mend the defect of a bad breath by means of coarse

cented compounds.

A much-abused stomach, bad teeth. and a low state of vitality are respon sible for a disagreeable breath. Reg ulate your diet, turn some of your bonbon money over to the dentist for teeth repairs, and two of the chief causes for this unpleasant condition

will be removed.

A tablet made of the genuine East Indian lime-juice dissoived on the tongue after each meal will aid in digestion and cleanse the mouth and

throat from the flavor of food, A small quantity of violet orris root will have a similar effect. A teaspoonful of powdered charcoal dis-solved in half a tumbler of water and taken the first thing in the morning acts as a marvelous breath sweetener Let these little tollet niceties, the dentist's craft and constant care of your stomach act as guard against an offeasive breath, which makes even the most luscious-looking mouth repulsive.—Philadelphia Times.

OREGON WEATHER.

SUMMARY OF THE METEOROLOGI-CAL OBSERVATIONS

Weather Conditions, Averages, Observations and Deduction from the Record of 1894.

A summary of the meteorological bservations made within the state of Oregon during the year 1894 will, no loubt, be of value to its citizens for information, if for no other purpose and it will prove of the greatest value to those of other states when inquiring concerning Oregon and its climate. The year 1894, as a whole, from a weather point of view, was hearly normal. The most marked feature of the year was the excess of minfail. especially in Clatsop, Coos and Curry counties, bordering upon the Pacific ocean. The average precipitation for the counties bordering on the Pacific ocean was 93 inches, for the countles n the Willamette valley 40 inches for the counties of Southern U 33 inches and the same in the cost ties in the Columbia river valley. In the countles lying south and east of the Blue mountains—the stock country

of Oregon-the average is 18.06 inches The excess of precipitation ranged from 8.40 inches along the coast to 0.54 of an inch in the southeastern section. The heaviest rainfall in the state was at Glenora, near the summit of the coast mountains in Tillamook ounty, amounting to 139.98 inches, This is purely a local precipitation produced by the topography of the ountry surrounding. At Bandon, Coos county and Langlois, Curry county, 103.37 and 109.95 inches respectively fell. The least amount of recipitation occurred at Vale, Maleur county, where only 10.15 inches fell. A noticeable similarity is to be observed in the climate of Douglas Josephine and Jackson counties in Southern Oregon and of that portion of Oregon 300 miles farther to the orth lying along the Columbia river to the east of the Cascade mountains. The mean temperatures of these sec tions are respectively 51.5 and 51.1 inches. In fact, the mean temperaure of Oregon, save that portion lying to the east and south of the Blue mountains, is practically the same throughout, though the extremes are materially different. Along the coast the extremes are 88 and 25 degrees; in the Willamette valley 98 and 20 degrees; in Southern Oregon and the

Columbia river valleys 100 and 1 degree above zero; to the south and east of the Blue mountains 100 and 11 degrees below zero. The warmest place in Oregon, as shown by the mean temperature is Langlois in Curry county; as shown by the maximum imperature in Pendleton in Umatilla ounty; as shown by the highest minmum temperature it is Gardiner, Ban-

don and Langlois. The coldest place in Oregon as shown by the mean temperature is Burns, Harney county, with a mean of 37.3 degrees and as shown by the mininum temperature which is 32 degrees below zero. Bandon in Coos county had the lowest maximum temperature

viz.: 78 degrees The snowfall was unusually heavy during the year, the heaviest being at Hood River, in Wasco county, where the total amounted to 135.5 inches over 11 feet. Joseph, Wallowa county, had 61.5 inches, Baker City 56.6 inch es; along the coast there fell from 1 inch at Gardiner to 15 inches at Astoria; in the Willamette valley and in Southern Oregon from 4 to 20 inches fell. The greatest of all events occurring during the year-due to meteorological conditions was the flood in the Columbia and tributary rivers. In June the rivers rose from 6 to 20 feet higher than ever before known and did considerable damage.

FOR HAPPY FARM HOMES. There are localities among the And the vanquished ills we hourly farmers where society is equal to, if meet. not above that of the cities. I have been in such communities. The farm home, if conducted properly, is one of the happiest places in the world. I saw not long since, however, a sight which to me seemed degrading in the extreme, and it is not uncommon, either, among the farmers. It was a girl plowing in the field, doing the work of a man. One of our bish ops, while in India a few years ago said the most degrading and terrible sight he saw there was a woman roked with an ox drawing a cart. Here they simply follow the cart. These things are what keep rural soclety down and call out sneers from people of other occupations. If farmers would pay more attention to the and when every thought we send out comfort of their wives and children, is the purest, grandest and best there and less to the dollars there would is in us, when we desire to make the world better for our having lived in it, then we will know there is but one thing eternal LOVE.

ELLA MeMUNN.

GROWING TOMATOES BY THE ACRE.

Compared to the farm, old Mother Goose Her downy goslings reared with pride;
A city maiden walking near, Beheld them nestling at her side.

"Oh see!" she cried, "the lovely things! How kindly nature doth provide, be more happy homes and less talk poor society. It is a well-known Then he raised his head and encountered a look from those eyes which spoke a world of gratitude, and this was the last conscious look which lighted them, for as Mr. Morley now and then her eyelids closed and with a soft sigh she died.

A pair of salt-cellars is new, the shape being that of a gondola with shape being that of a gon fact that it takes the morals of the thing eternal LOVE.

Interesting Details Offered by One Versed in the Occult Theory-Food for Deep Thought,

Ages ago when the Christian religion was not. Theosophy was old, and the Vedas (sacred books) honry with age. when the Bible was but an infant. In the beginning we were spirit, but by the fall took on "coats of skin, and are now tolling our weary way back to spirit, back to the estate of Gods from which we have fallen, onward and upward to be finally merged nto the At-one-ment with the Abs ute. Man as we well know him ha seven principals, or a septenary consti-tution: Briefly outlined they are, first, counting from the lowest upward-

the physical body, the shell in which we have incused ourselves; 2nd, th Astral body or etherial double, which is the actual man in a finer, more tenus condition than the visible man 3d vitality or life principle, fitly called chesion, which holds man together and which, leaving him, he passes of o another plane of consciousness; th 4th principle, kama, is the emotional nervous nature, coming under the con-trol of mind. Manas or mind is the 5th principle, the 6th, Buddhi or spirit ual soul, which is the entity and intel ligence, and the 7th and last is Atmo or pure spirit, from which we came and to which we are going. Evolution

is the law. Humanity goes around the earth in cycles, returning again and again, but at each turn of the cycle on the point of return, it is higher than before. Limited space prevents us from dealing with cyclic law more fully, so rapidly we will take you through reincarnation (ordinarily it takes sev eral centuries). The four lower prin ciples, physical, body, emotional na ture, astral body, and vitality, do no refinearnate, their work is finished with each earth life, and at death or soon after, disintegrate and go bac to the elements from which they sprang, but the real man, maun duddhi and Atma composes the Ego

that comes again and again to earth life. The animal man is simply an in strument through which the spiritua man works, therefore the reincarns ion of the machine is unnecessary Progress is the law and a man after once having become a man, cannot be one an animal, no more than the esser can be made to contain th greater; Degraded as man may ome, he comes again as a man, b by his present life his future life cor ditions are more severe. One earth

life is not sufficient to become perfect else reincarnation would not be nec essary. Personally I do not conside death a necessity, and if we had the strength or purpose to live on and our advancement would be much morrapid: but after sixty or seventy years f "toll without recompense" we grow veary and need rest. Devachan, the Christian's heaven, is that place. Devachan is a sort of idealized continustion of earth life. A dream life there the spirit finds perfect rest. Not that sort of heaven where you an look on the golden fences

pearly gutes down into hell and see dear ones being shifted about with hot forks, or see them on earth soing defeated in politics, but a place where they all seem to be with you. It is here that the spirit gathers it experiences to itself and prepares for carnation. The lower quartenary passes into he kamic plane, the place of desires, where it remains until it disintegrates.

,500 years is generally believed to be he period passed in Devachan, but he nature of the person fixes this; one spiritually minded may as a just reward remain much longer than one whose earthly desires are so prosounced as to draw him back to earth at once. The plane of Kama Loka is carest the earth and it is to this place suicides and men who have been hanged, etc., are destined to remain, until the time when they would naturally have been released from earth

We have now reached the time for reincarnation. The previous earth life ntirely controls the conditions of firth in the next, and just the place we eserve and have earned, we receive This explains the apparent unjust distribution of wealth and happiness As a man sows, so also shall be reap and we are the architects of our own fortunes; true, we may have forgot ten our former life, and don't see the justice of being punished for som thing we don't know anything about but our forgetfulness doesn't help us a particle. In Theosophy there is no icarious atonement, we carve our own destinies, save or damn ourselves as suits our fancy. Our very thoughts are things and as man becomes what he worships, how mete that our ideals should be lofty. In every human being there is that spark of the divine, that germ of perfection which needs only

an opportunity to blossom forth into the God in whose likeness and image we were created. Step by step we rope our way

'Heaven is not reached at a sing! But we build the ladder by which w From the lowly earth to the vaulte-

a of some good fertilizer, check off the land five by five feet, and at each intersection of the furrows drive down a stout stake 18 inches in the soil, leaving three feet above. In a tri-angle about this stake set three plants, 12 or 15 inches from the stake. Entirely.

Two Men Dead When Taken Out-Eight Others Are Slowly Recovering.

ficient to hold up the fruit from the Minneapolis, Mar. 11.-A special to ground; but if the vines grow very large a second band may be put on the Tribune from Winnepeg, Manito-ba, says; The shaft house at the Sulinter, but one is usually enough. Each tana gold mine, fourteen miles from Rat Portage, caught fire this after-noon, and before the flames were dishill should yield, at the very lowest, if the land is good, a peck of toma-toes. At five by five feet there will be 1742 stakes or hills, and with three plants to the hill it will require covered they completely enveloped the building. This shut off the hir supply to the mine in which were work-ing twenty to thirty-five miners. The 5226 plants per acre. If preferred, two plants may be set to the stake, estenger who arirved at Rat Portand the hills reduced to a distance o five by four feet, using 4356 plants per acre.-S. A. Cook, Georgia, in age from the mine at 8 o'clock to ilght says when he left at 4 o'clock only four men had been brought up. number of doctors were working HIS SONGS MADE OTHERS RICH over these in hope of resuscitating them, but with small chances of suc-Charles Graham, who is one of the cess. The other men in the mine wer nest successfur of American songcertainly suffocated and practically writers, is an example of a man whose given up for lost. The shart machin genius has made fortunes for others. While he has written many songs that ry being disabled, hindered the work f rescue. The families of the men have attracted wide-spread popularity live at Rat Portage and there is great Mr. Graham is still poor. The music excitement as their only communeation with the mine is a circuitous and publishers who have sold his songs have all got the profits and Mr. Graomewhat langerous wagon trail. ham has got only fame. He says that the public who hea LATER PARTICULARS.

Winnipeg, Man., March 11.-The

Sultana mine shaft at Rat Portage took fire in the drying room this afernoon. Two miners are dead and ight others almost suffocated leath. The fire is supposed to have cen started by a pipe in the pocket of a cont hanging on the wall. Fireman Johnson, noticing the fire, called men to assist in putting it out, being afraid of explosions in the drying com. Johnson rushed into the burn ng room, removed two boxes of powler and then tried to save the build ing. The fire started at 9 o'clock and until 1:30 no effort could be made to assist the men in the shaft. As soon as the ruins were sufficiently cooled was found the timbers lining the shaft were blazing and water was then directed on these timbers, but n the excitement a greater portion falling useless down the shaft. ly after the fire was extinguished the en drained the shaft and found six on on the first level goparently all suffocated. They drained to the lower sang bass, he drifted to New York level and found three more, but thes men were in bettter shape than the others and efforts were begun to raise omposed in 1884, when he wrote them. The first three raised were suffering badly but recovered after a ished by Willia Woodward, of New short time. The fourth man, John Tagier, was very low when he ar world realized that a new genius had ived at he surface and died shortly ome among them. It was fitting after. The others were in a critical about this time that the writer of love condition when brought to the surface songs should himself plead guity to but all recovered except Randolph the tender passion, and so it happened Erickson. The eight rescued are Alex that in 1886 Charles Graham took unto Randolph Erickson, J. Erick almost a bride. But although in his on, P. Straud, W. Prynn, Chas Eng strom, C. C. Peterson, and Chas Noon Pryun upon examination was found adly burned in the back. It seems the air shaft ignited and caused suc tion of air from the bottom of the shaft, depriving the men of fresh air and also causing smoke to descend the shaft and when found all were
