CROP REPORTS ARE BAD

For the Mississippi Valley.

Practical Failure in Many States.

Pacific Coast Farmers Will Derive Large Benefits from the Misfortune—Quotations.

CHICAGO, June 3.—E. M. Thomson's crop report was issued today. Its significant features are the decrease of 1,500,000 acres in the area of winter wheat, and of 700,000 acres in that of spring, and the great deterioration in the condition of winter wheat compared with that of a year ago.

Should the present conditions in soil and climate be maintained for ten days longer a practical failure would result, where half a crop is now promised; practical failure of extensive areas in Indiana, Illinois, Ohio and Michigan has already occurred, and devastation in those states is still in progress.

Most of the crop report, which covers the condition to still later date than Thomson's makes a reduction in the condition for the month 28 as against the 15-point reduction for the same date.

IT is not to be expected that a few of the young readers of the Statesman to hear something of the wonderful prosperity of the country which have occurred within the recollections of a comparatively young man.

I will first say that when my parents moved from Vermont into Ohio they were compelled to make rafting for crossing every unfavorable stream through the states of New York and Pennsylvania.

In Washington a bill to reduce freight rates on grain so that 20-cent wheat could be sent to market and leave the farmer enough to pay taxes, was defeated in the Senate by corrupt methods, and since the legislature adjourned it has been found that a number of important bills thought to have been passed were stolen by the clerks.
