Our young men who are growing up are going to see a new rival one of these days in the management of the affairs of this world, and it will not be the importation of some foreign country either. It is a recognized fact that the only reason why Americans are smarter than other nations is because education is more general. The United States spends three times as much money for education as any nation in the world. Have you noticed the growing tendency of our women to be in a majority in all the graduating classes of our public schools, normal schools and scademies and they are going into our colleges? If this thing keeps up and our young men take no greater interest in securing an education than many of them do now, the result will be women will take the lead in the affairs of life. Already there is much talk of the "New Woman"-and of what she is doing and intends to do. That is one outcome, already showing itself, as a result of the more careful training and education of women. Parents should see that the boy is given an education equal with the girl and then both will be able to take up the crop and a part of the year before. battle of life equally outfitted.

It is the duty of the business men of a town to draw all the trade possible to the town and if any merchant making a specialty of any one line of goods vertising, those other merchants carrying such stocks should endeavor to make up the deficiency. Every person induced to trade in any one line of goods is also apt to purchase from others and all the merchants are benefited. It is a mistaken idea for a merchant to think that lack of enterprise on his part affects only himself. He drives trade away from his store and perhaps from the whole town and thus every merchant in a different line indirectly suffers. It is such little matters that make up the movement of a town in prosperity. Patrosize the merchants who invite your trade. Tell them why you so patronize them and they will be encouraged to greater

The Oregon Insane Asylum contains now an average of 1023 inmates and 120 employes, a total of 1143 all under one management fed and lodged by the state. The average monthly cost is \$9.48. These figures are interesting from the fact that at this rate it only costs about 31 cents a day to run the asylum per capita and the actual expense for living is less than \$5.00 per month each. This shows that even in America men could work for 20 cents a day and not starve if they had to do so. But we do not want them to.

Mr. Cleveland should open negotiations with Commander Perry, of the U. S. Gunboat Castine. The promptness with which Commander Perry demanded and received an apology from the French officers at Tamatave, Madagascar, for having interfered with the landing of some of the Castine's crew, indicates that he would make the right sort of Secretary of State.

For cears I was a constant sufferer from weak lungs and bronchial asthma. My rest was disturbed by a hacking cough, so that I felt miserable the greater part of the time. Many remidies recommended by friends were tried, none of which proved suitable to my case. I did not experience any beneficial results until I began taking Chamberlein's Cough Remedy. After two bottles of the large size have been used I am pleased to state, my health is better than it has been for years. The soreness has left my lungs and chest and I can breath easily. It has done me so much good that I want all who are suffering from lung troubles as I was, to give it a trial." For sale by Alexander-Cooper Drug Co.
