FROM ST. MICHAELS.

An Interesting Letter Telling About That Part of the Gold Country.

ST MICHAELS, Alaska, May, 17.
After twenty-six days on briny waters we arrived safely at this Island of St. Michaels. "Desolate, desolate, desolate," is what the white inhabitants say, but to the weary ocean traveler it is a beautiful spot. On the morning of the 16th we sailed slowly into the harbor the first thing that met our gaze was a beautiful barren landscape, but through the fog we discerned a two masted schooner anchored in the bay, slowly buildings made their appearance and in a short time quite a town could be seen with two "Old Glories" floating, from flag staffs on the most prominent buildings.

every one employment, and at the present time there is plenty to do. Some of we boys are working, putting in the time while our boat is discharging her cargo. Wages are very good, the pay being for laboring about \$5 per day and board.

I am stopping with the N. A. T. & T. Co. Not doing over six hours work a day, just waiting on the table in their hotel. Am getting at the rate of \$50 a month, three good meals and a good bed, which is far better than being aboard that "lousy" boat with nothing to eat. It is such an improvement to be in this hotel that I would gladly do what work I am doing just for the comfort that I am getting.

Goods are quite high here, and gold dust is used principally for currency. The following are the prices of a few of the staples: Butter, per two pound can, \$2; Sugar, per hundred, \$18; Tobacco, per pound, \$1; Smoking, per 5c package, 25 cents; Smoking per 10c package, 40 cents; Flour, per bbl., \$12; Bacon, per pound, 40 cents; Coal per ton, \$50.

Meals at this hotel \$1 and they are worth it too, for they actually set a fine table. Canned goods are used all together and the very best brands. I should judge that we consume every day at least \$5 worth of "Empress" evaporated cream. I tell you I am feeding high eat as much as \$3 worth every day. Here I "live to eat."

I am looking forward to the trip through Behring straits where we can see Siberia a few miles to our west, as one of more enjoyment than the one that has just been completed. The Arctic Ocean will also be of great curiosity, where the days are divided into six months light and six months dark. Already, here at St. Michaels, at the present time the sun is only out of sight about two hours and a half.

I will not mention much about the journey, for it was entirely too disagreeable to recall to mind. We came through Umiak Pass in the Alaska Peninsula. There we saw some picturesque scenery. Smoking volcanoes on either side. Mountains that would rival anything in the Cascades, covered with perpetual snow, were numerous along the South West coast of the peninsula, just north east of Unalaska. Three days before we got in we encountered ice from the Yukon, and a day later we passed by an immense flow extending as far to the north and west as the eye could see.

The first day in the ocean, off Cape Flattery, we went through a heavy sea and we came very near losing one of our river steamers that we had lashed on deck. Most every one was frightened and greatly excited but for my part I was too sick to think what might be our destiny. I thought I was destined to die anyway so took everything good naturedly. My sickness lasted just as long as the sea was rough, and not even to the last day could I stand rough water, having to go to bed just as soon as the vessel began to roll. Consequently I was in my bunk fully one half of the time.

Several miners came down yesterday and day before from Dawson, Circle City, Rampart and Yukon points, not one of them give any encouraging news. When you ask them if they found any gold, they say, "yes, we found gold, but we paid for it." The hardships that they have to go through, are too much for man to endure. One old man showed me today a sack of \$700 in gold dust and says "I have more too" but added that it cost him double of all he received in actual money.
