Willamette Valley Crops.

The exceptionally favorable grain outlook in a western Oregon, unfortunately does not hold good throughout the Willamette Valley, says the Evening Telegram, where, in many localities, the yield of grain, especially wheat, will be light. Possibly this is not an unfortunate either; the sooner farmers of the greater part of the Willamette Valley quit raising grain for export, the sooner will their condition improve and their prosperity increase. In some portions of the Willamette Valley, especially in Marion, Polk, Yamhill and Linn counties, fair crops of grain can still be raised—good crops, perhaps, with care in cultivation; but most parts of the Willamette Valley are better adapted to other purposes—stockraising, dairying, hosiery and horticulture. A large amount of grain can be profitably raised, but not to put directly under the market; the profit will be found in feeding it to various kinds of stock—cattle, horses, sheep and hogs, gradually the farmers of the Willamette Valley are perceiving that diversified farming and agricultural industries, other than grain raising are the means by which they will best thrive. They cannot produce half the wheat per acre that the loose, volcanic soil of the plains, benches and foothills overlooked by the Blue mountains in Eastern Oregon yield; but they have opportunities in other directions that are not so naturally open to the farmers of the Eastern Oregon and Eastern Washington wheat belt. These opportunities they must improve, if they are to prosper.—Evening Telegram.

A County Exhibit.

In the interest of the Oregon state fair, which opens at Salem September 17, President Wehrung and Secretary Wisdom are touring the valley, dropping in on this city Wednesday morning, leaving on the up train for Medford. Their purpose is to form local county organizations which will collect first-class county exhibits for the fair. In this manner every county can be properly advertised. No doubt there will be considerable rivalry among individual counties, as a prize of \$100 is offered for the best county exhibit and the county that ranks first will have the distinction of being the banner one of the state.

Free Homes Entries.

The General Land Office has issued, under the signature of Binger Hermann, commissioner, instructions to registers and receivers of land offices in regard to holdings affected by the free homes act, the instructions given say:

"You will observe that only settlers under the homestead laws upon the agricultural public lands which have been opened to settlement, acquired prior to the passage of this act by treaty or agreement from the various Indian tribes, are affected by this act. This act does not change existing laws as to the time of submitting final proof and making payment of final commissions. Where final proof has been heretofore made for lands affected by this act and payment has not been made, such payment will not now be required by you. Where the payments were authorized to be made in installments, and a partial payment has been made, but final proof has not been made, no other or further payment will be required when the homestead farmer makes his final proof, except the payment of the final commissions and testimony fees. In reporting entries hereafter, where the money is 'pre-leased, which if not released' would belong to any Indian tribe, it will be heretofore reported under a separate series, you will continue so reporting them in accordance with the instructions already issued. Where the regular series of entries was kept, you will continue such series, reference being made on the entry papers and abstracts to the particular Indian reservation and the act under which the lands were ceded. Where the right to commute homestead entries within any of reservations covered by the act has been heretofore authorized by statute homestead settlers may commute their entries therein in the time and at the prices now fixed by existing laws. Entries, where settlement and residence are not requisite, do not come within the provisions of this act."

The Postmaster's Salary.

To the editor: In an editorial in last week's issue of the West Side, in regard to a reduction of the postmaster's salary at this place, it is reasonable to suppose that the reduction was caused by a falling off in the business of the office, as was so stated, and in the absence of any other reason is the only inference one could draw. But that is not the reason. The business of the office has not fallen off. The receipts are over \$2400. But in consequence of the robbery of the stamps, we were compelled to buy \$75 worth of stamps from other offices until we could get them from the Government. This we did on advice of the postoffice inspector, and if the department at Washington sees fit to reduce the salary on that account they will do so, but it will not be for the reason of falling off in business, because it has not. And if any one wishes to buy their stamps at other offices, they have a right to do so, and there will be no kick coming or going from me.

A close watch will be kept over these silos, as this proceeding is experimental to a large degree.—Corvallis Gazette.
