S. M. DANIEL, Monmouth, Ore.

Monmouth bicyclists are allowed to ride on the sidewalks during bad road time. That's where they are ahead of us. Monmouth is also ahead on street lights. Some day, though, we will catch up with them over there.

The Weight of Milk.

It is generally estimated that a quart of milk weighs two pounds. But this is only approximate. It is safe to figure a quart at 2.15 pounds. One authority reduces it to a finer basis than this, and figures a cubic foot of milk at 64 1/2 pounds. A cubic foot will make 7.495 gallons, and taking this as the basis, we have the weight of one gallon as 8.6224, and carrying out the division we have the weight of a quart, 2.156 pounds. But milk rich in cream would weigh less than milk containing little cream, for the reason that the cream is lighter than the other elements in the milk.

Geo. A. Houck, of Monroe, writing to the Pacific Homestead gives this plan for destroying evergreen blackberries: "I once had an over-run patch that was entirely beyond control. I fenced it out into pasture, and the goats did the rest, so I recommend goats to the inquirer. They won't kill them in one year nor possibly the second, but if the dose is repeated they will finally come out on top."

Rest rooms for farmers' wives are being established in some towns in the West. They are located in the business center and are made cozy and comfortable with easy chairs, lounges, books and magazines. Some offer tea at the nominal price of three cents a cup. These rooms are sustained by women's clubs in the cities or the merchants of the cities contribute to them, with the idea that they help to draw trade.

The city council met in adjourned session Tuesday evening.

A resolution was introduced by Councilman Claggett authorizing a contract to put a dozen lights on the streets. The motion was referred to street committee.

Judges and clerks of election were appointed as follows:

First ward, vote at city hall. J. S. Bohannon, judge; W. H. Walker and J. W. Richardson, Jr., clerks.

Second ward, West Side office. J. W. Kirkland, judge; Al Herren and J. A. C. Brant, clerks.

Third ward, Jones' residence. Levi Jones, judge; Pearl Hedges and Forrest Finch, clerks.

The election will be held on Monday, December 3rd between the hours of 9 a. m. and 5 p. m.

It is understood that the skating rink will start up Saturday evening.

R. B. Wilson, traveling freight and passenger agent for the Burlington Route, was in the city during the week looking up a little business.

The West Side man had the pleasure of riding his wheel on the sidewalks of Dallas and Monmouth on Wednesday. Quite a contrast from riding in the mud at home.

The next excitement will be the city election. Business men should by all means interest themselves in having active, energetic officers for the city. Public business should be looked after the same as private affairs.

The new bridge below town on the road to Hall's ferry, has been finished and accepted by the county court. This bridge is five feet higher than the old one and much longer which makes it more accessible to teamsters.

Mary E. Wilkins has just finished a new novel, which has been secured by The Ladies' Home Journal. The social life of a small town is her theme. She reveals its romance, its humor and its tragedies with that charming realism which characterizes the writings of this popular novelist.

As a duck hunter, George Skinner seems to be the boss. He went hunting on his wheel Tuesday and killed nine ducks in three shots. The next day, Mrs. Skinner was in town looking for the city chap who killed her flock of tame ducks, and now don't want to mention to Cap Skinner anything about ducks.

The Degree Of Honor had a lively time last Monday evening. The lodge initiated three young men and two women and received several more applications. After the regular business had been transacted, the side degrees were conferred on the boys to the amusement of the onlookers and the edification of the recipients.

The Altona made a special trip to Salem last Sunday, taking down a lot of wheat and potatoes. On the return trip a stop was made at Dove's landing and 640 sacks of potatoes loaded on and brought here. Cap Newt Graham invited some fifty ladies and gentlemen to make the trip, which was enjoyable throughout. The boat got back about 8 p. m.

There remain in the Southern Pacific warehouse here 1933 bales of this season's hops. Of this number, something like 450 bales are sold and will soon be shipped. Thus far the warehouses have handled 6042 bales, representing 45 growers, all of whom, except seven, have sold their output. They control about 1400 bales.

Talk about queer election bet! The West Side has just heard of a new one. One lady here was so sure of Bryan's election that she bet the shoes she wore. The next day after election she rang up her husband by telephone and told him of her loss and that the winner had come for the shoes and that he must bring her a new pair right away. We have not learned the names of the parties to this transaction, but Layton Smith might tell you, if he would.

Hon. George W. Belt, a former resident of Salem, and a native son of Oregon, was, at the election last week, elected to the office of superior judge of Spokane county, Washington, being a candidate on the Democratic ticket. Judge Belt received 5345 votes, against 5147 cast for his Republican opponent, who is an able and popular attorney, showing high among his fellow-citizens. Judge Belt is a brother of Postmaster Charles Belt, of Dallas, and of Mrs. George H. Burnett, of Salem.

John B. Stump, of Monmouth, who has long been one of the successful growers of clover in the state, was not worried at all by the rains this season, says the Oregon Agriculturist. He kept his clover pastured down until very late in the spring, and it was not ready to cut until about the middle of July. By following this plan Mr. Stump very rarely has any trouble with rain when he is harvesting his crop, and is able to get his clover hay into the barn before the stems have become too harsh. He gets his hay into the cock very soon after it is mowed, and is able to cure it perfectly with a bright green color and no waste. Although late pasturing will somewhat reduce the yield of hay in seasons when dry weather commences early, the loss is offset by the value of the pasturage, to say nothing of the avoidance of risk of loss and deterioration of hay by rains at the proper time of mowing.

Dallas Notes.

The fine weather of the last two weeks has greatly favored fall farm work in this section. Potatoes have been dug and housed in good condition, as well as beets and carrots. The summer fallow has all been sown, and stubble-plowing is progressing under conditions that make the farmers happy.

The local market for prunes and hops is practically dead. Five hundred bales of hops remain unsold in Dallas. Three hundred thousand pounds of prunes are in the hands of the growers in the vicinity of Dallas.

Prospective bidders on the Salem Federal building are here overlooking the ground with an eye to using the same for the Dallas quarries in connection with the Polk County water house is built of this stone, and meets every requirement of a first class building.

The Kneading Tube is made of a special material, and is not injured by the heat of the ear, and it is not injured by the heat of the ear, and it is not injured by the heat of the ear.
