Petroleum's Discovery.
In 1859, on the 28th of August, petroleum was discovered at Watson's Flats, Pa., near the head of the Allegheny river. Edwin Drake bored the first oil well, and before the end of the year Drake, under the firm name of Drake & Bowditch, bored through the rock at Titusville to a depth of 70 feet and struck an oil well that yielded 1,000 gallons a day. This discovery started the enormous oil industry in northwestern Pennsylvania.

Lucky Months.
According to Dr. Marcello Boldini, one of Italy's greatest scientists, men born between January 1 and March 31 are stronger, taller and superior in intelligence to those whose birthdays fall in other months. This view is borne out by the researches of another Italian scientist, Deela Rovere.

And Who the "If"?
The thoughtless spender puts the rift in thrift.—Cartoons Magazine.

Benefits of Walks.
Through a daily walk in the open air, the hair may be made to grow, it is said, and this as a result of improved circulation. The skin may be improved, both in color and texture, if it is, in conjunction with this exercise, properly cleaned. The figure may be greatly improved. These blessings, with the calming of troubled nerves already mentioned, ought to make any woman, young or old, an advocate of this form of exercise.
