288 Grand Ave., Portland.
A Moderately-Priced Hotel of Merit **HOTEL CLIFFORD** East Morrison St. and East Sixth \$1.25 per Day. Two in a Room, \$1.75.

Hawaiian Impartiality. The old algaroba tree in the Catholic mission grounds on Fort street is no more. Parent of all algaroba trees in the Hawaiian Islands, it has been cut down to make room for a Knights of Columbus club house. The word "parent" is used advisedly, for one newspaper, in reporting the removal of the historic tree, referred to it as the "father" of algarobas in Hawaii, and another speaks of it as the "mother."—Pacific Commercial Advertiser.

Taking Baby's Picture. For either the amateur home "snapshots" or when you take baby to a "real" photographer to have her picture taken, do not "dress her up" in her best clothes, or let her know that she is to pose for her portrait. Let her wear one of her "second best" white dresses, or even a play costume, and she will be more herself than if "all decked up" in her best finery, which is almost certain to give her a self-conscious look.—Exchange.

MURINE Rests, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tired, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated use Murine often. Safe for Infant or Adult

Witty in Time of Misfortune. When the conflagration that destroyed Drury Lane theater, in 1809, broke out, Sheridan, the principal shareholder, was in the house of commons. Declining the adjournment offered out of sympathy, he hurried to the theater, only to be pushed back by a soldier, with the curt warning: "Stand back, sir!" "My friend," replied the witty dramatist, "surely a man may warm himself by his own fire!"
Musical's Great Power. "Those who think that music is one of the trifles of existence," said Gladstone, "are in grievous error, since from the earliest times it has been one of the most potent factors for molding and forming characters."

Garfield Tea stimulates the liver, corrects constipation, cleanses the system and rids the blood of impurities. All druggists. Adv.
Scientific Research. Phillip, who had received as a birthday present a beautiful new microscope, presently astounded the cook with the exclamation: "Hey, cook, lend me a flea, will you? I'll give it back to you in three minutes!"
Truest Sympathy. The noblest and the most powerful form of sympathy is not merely the responsive tear, the echoed sigh, the answering look; it is the embodiment of the sentiment in actual help.—Exchange.

They Suffer for Other's Sake. "Locking up an anarchist," said Bill the Burg, "is good for him. But it's kind o' tough on the other fellows that have to live in the same jail!"
Marriage at Sea. If the master of a British ship considers that the circumstances warrant it, he can solemnize a marriage on board, and the ceremony will be considered quite legal and binding.

A postal card to Garfield Tea Co., Brooklyn, N. Y., asking for a sample will reply you. Adv.
Pines in Argentina. In one region of government forest land in Argentina it is estimated that there are at least 1,000,000 pine trees large enough for profitable lumbering.
We Fancy They'd Like It. Lawn Tennis Report—"Because the play was not spectacular, the brilliant skill was not appreciated by the majority of the spectators—it was 'as cavalier before swine.'"—Boston Transcript.

WINTER FEEDING IS FAVORED Covering is Good to Prevent Soil Heaving and Fertility is Washed Into Ground.
Orchards and fruit patches are best fed during the winter when the ground is frozen, for this covering is good to prevent soil heaving, and the fertility is being washed down into the soil ready for use early in the spring.
CLEANING OUT FOR ORCHARD During Winter Season Remove All Dead Wood and Brush That May Harbor Insect Pests.
General renovation of the orchard during the winter is profitable; cutting out dead wood, clearing out and burning brush, etc., which may harbor disease and insect pests.

ORCHARD TOPICS

VARIETY OF BIG IMPORTANCE

Commercial Handlers of Fruit Must Take Note of Characteristics to Avoid Disaster.
(Prepared by the United States Department of Agriculture.)
From whatever standpoint one may approach it, "the variety" looms large in the fruit industry. The grower wants particular sorts—fruits having certain desirable and known characteristics—in order that he may supply certain trade demands, or be able to harvest at particular times, or in some other way receive the benefits that are to be derived from fruits possessing certain qualities or characteristics. In a similar manner, the commercial handlers of fruit—must take note of varietal characteristics; otherwise, faults will develop in their business that will be disastrous. Poor-keeping varieties will be placed in cold storage, when only long-keeping varieties have gained commercial prominence very largely because of their good shipping qualities when they were seriously lacking in dessert or other qualities.
The consumer does not know much about variety names as a rule, but if the retailer with whom he trades would take pains to supply always good dessert varieties when fruit is wanted for dessert purposes, and good cooking varieties when they are desired for cooking, everyone interested, from the grower to the consumer, would be benefited thereby. However, as a rule, by the time the fruit reaches the retailer, apples are simply "apples," peaches are just "peaches" and plums are "plums" without much regard to the use for which the consumer wants them. Even with such fruits as strawberries, blackberries and the like there are variety adaptations from the consumer's standpoint but they are not always easy to give full recognition even if one were making an effort to do so.
To return to the grower. After careful study of varietal characteristics, he orders from a nurseryman, for example, the varieties of apple and peach trees that he has decided will give him the fruit that will best supply the trade to which he is to cater.

Well-Grown Two-Year-Old Stayman Winesap Apple Trees as Received From Nursery.
He waits three or four years after planting for the peach trees to come into bearing and perhaps six or eight years for the apple trees to bear, only to find, perhaps, that half the varieties are not the sorts he ordered, even though the trees, when he received them from the nursery, were labeled according to his order. The misnamed varieties may not fit at all into the grower's plans for marketing and are, perhaps, practically worthless to him.
It requires no argument to convince one that "the variety" is important to the grower, once the problem is stated. The misnaming of varieties in such a case may be due to carelessness, or indifference, to sheer dishonesty, or to entirely honest errors. The results so far as the grower is concerned, however, are the same in any case.
