

Taking No Chances With Sinn Feiners

Latest reports from Londonderry and Limerick show an improvement in conditions. Since military patrols have been abused by Sinn Feiners, precautions are being taken by the authorities to avoid surprise attacks. The photograph shows what a soldier's life is like in Limerick. The insert shows guards searching a civilian.

Red Cross Fighting Typhus in Esthonia

Capt. Dr. John R. Ranson of the American Red Cross visiting some of his patients at the Esthonian typhus hospital at Narva, Esthonia. The typhus scourge is claiming hundreds of victims every day in Esthonia, and the American Red Cross workers are doing all they can to help the sufferers.

Issue Newspaper on Board Train

The "Big Four Daily" was issued on board the Big Four special which took the Ohio delegation to the San Francisco delegation. A four-page paper was issued daily, and the newspaper men aboard assisted in its production. The plant was furnished by the Cincinnati office of the Western Newspaper Union, and was in charge of C. A. Radford, manager of that office. The paper's service included telegraphic news furnished by Governor Cox's Dayton News every day, editorials humor, W. N. U. portraits, baseball news, etc.

Broadway of the East

The Grand Rue de Pera in Constantinople is the Broadway of the near East. It is the main artery of the European section of the city, and more nationalities can be found on its walks than on any other street in the world.

THRILLS IN THIS SPORT

Motorcycle enthusiasts were given more thrills at a motorcycle hill-climbing contest, staged on the side of a mountain at Port Jervis, N. Y., recently, than in any similar event ever held in the history of sport. The grade was up to 70 per cent, and was filled with rocks, gravel and ledges to jump over. The distance of the climb was 500 feet, and the best time, ten seconds flat, standing start. J. H. Tracy on an Excelsior, shown making the start.

PADEREWSKI TO RETIRE

Ill and discouraged, Ignace Paderewski has announced his retirement from public life.

Peace

By GEORGE MATTHEW ADAMS

IF YOU would look into the face of a strong man, search out him who is at Peace with himself. For it is during the time of Peace, both in the life of an individual and a Nation the growth and power accumulate. Live in Peace.

Peace is always constructive. For where there is mutual co-operation between every one of your faculties, there is team work. And team work means that you get the biggest results from your combined efforts. Live in Peace.

Live in Peace with all about you. Where there is no Peace, there is no happiness and no time for taking up the things that count for the most. We are greatly influenced and inspired by the lives of people with whom we come in contact most. And if there is continual Peace among all, there is sure to be continual helpfulness among all. Live in Peace.

Keep your mind in Peace. For the Mind houses the "Headquarters Staff" from which all the important orders in the game of Life proceed. Peace originates in the Mind. Let Peace rule your great Nervous System. Let Peace guide your day. For out from its application comes Power and Plenty. Live in Peace.

Mother's Cook Book

July is just in the nick of time—
Hay weather, hay weather;
The midsummer month is the golden prime
For haycocks smelling clover and thyme;
Swing all together!
July is just in the nick of time.
—Myron Denton.

Seasonable Dishes.

When the family enjoys a few nutty doughnuts try this simple recipe which makes a dozen and a half the size of an egg:

Drop Doughnuts.

Take one-half cupful each of sugar and milk, one and one-half cupfuls of flour, one egg and one teaspoonful of baking powder, salt, ginger and grated lemon rind. Beat the egg white, add the sugar gradually, then the beaten yolk, a grating of lemon rind, a pinch of ginger and a quarter of teaspoonful of salt, milk and flour sifted with the baking powder. Drop by spoonfuls into hot fat and roll in powdered sugar.

Egg and Sardine Salad.

Cook three eggs until hard, cut in two lengthwise and remove the yolks. Rub the yolks through a sieve with four sardines, season with salt, pepper and add enough cream or oil to make a paste. Shape into balls. Shred the whites of the eggs with a sharp knife and mix twice the quantity of finely cut celery. Arrange on a nest of lettuce and drop the balls of egg paste upon the salad. Serve with mayonnaise.

Normandy Salad.

Cut three cucumbers and three hard-cooked eggs in dice, add a cupful of minced olive, half a cupful of pecans or walnut meats broken in bits and mayonnaise. Serve on lettuce.

Coffee Blanc Mange.

Take two cupfuls each of coffee and milk. Add four tablespoonfuls of corn starch, four tablespoonfuls of sugar to a little of the cold milk. Cook until it thickens, then pour into a wet mold and chill. Serve with whipped cream.

Celery and Pineapple Salad.

Use equal parts of celery and pineapple, cut fine. Sprinkle with French dressing and chill. When ready to serve add a few pounded almonds to a mayonnaise dressing and serve garnished with shredded almonds on lettuce.

Egg and Cheese Salad.

Slice half a dozen hard-cooked eggs, line a salad dish with lettuce and arrange a layer of eggs on the lettuce, then sprinkle thickly with grated cheese. Add cream to mayonnaise and spread a layer over the cheese, then a finely minced cucumber and the remainder of the eggs. Cover with mayonnaise and sprinkle with cheese. Serve cold.

Watermarks in Paper.

Watermarks in paper have been used from the earliest times. John Tate, papermaker of Stevenage, in 1494 used an eight-petaled flower for his watermark.

MILITANT MARY

PUREBRED PIGS ARE HIGHLY PROFITABLE

Virginia Farmer Gives His Experience With Scrubs.

Used to Raise Scrubs, but Made Very Little Money—Purebreds Go to Market Much Earlier While Prices Are High.

(Prepared by the United States Department of Agriculture.)

How a Virginia farmer marketed pigs heavier and more profitable than he had raised in the past is told in a circular, "Better Sires for Virginia," recently issued by the extension division of the Virginia Agricultural and Mechanical college.

"I used to raise scrub pigs," the farmer declares, "I didn't think there was much money in the hog business because I didn't make much. Since using purebred sires I have changed my mind. As a result of using purebred sires my pigs weighed 215 pounds

Purebred Poland Chinas.

last fall, when the average scrub pig would hardly weigh 150 pounds. Consequently my pigs went to market early, while prices were high, while the man with scrub pigs had to keep his longer and feed them high-priced grain while prices kept going down."

The account is accompanied by a picture of purebred boars which are described as having "a good father, a good mother, and no poor relations."

IMMUTABLE BREEDING LAWS

Use of Good Sires, Care, and Management Are Essential in Building Up Herds.

There is no disputing the absolute fact that the laws of breeding are just as immutable as they have ever been. The use of good sires is necessary in breeding up good herds and this alone will not do; good care, feed and management must be given calves, heifers and cows and where these rules are followed, men usually succeed and prosper with greater certainty than though they depend too largely upon the cooperation of the butcher.

PUREBRED

A purebred animal is one of pure breeding representing a definite, recognized breed and both of whose parents were purebred animals of the same breed. To be considered purebred, live stock must be either registered, eligible to registration, or (in the absence of public registry for that class) have such lineage that its pure breeding can be definitely proved. To be of good type and quality, the animal must be healthy, vigorous, and a creditable specimen of its breed.

MANURE ON CONCRETE FLOOR

That From Steer Valued at \$24.85, While on Earth Floor It Is \$4.51 Less.

The manure produced by a 1,000 pound steer in six months on a concrete floor has a value of \$24.85, while on the earth floor the manure is worth only \$20.34, a difference of \$4.51 in favor of concrete. In eight months' time this saving is sufficient to pay the animal's share of the cost of a concrete floor. All further saving is clear profit, which amounts to \$9 a year for a 1,000 pound steer.

CONTROL OF WEEDS IN CORN

Good Harrowing at Proper Time Is Most Effective Way of Checking Growth of Plants.

A good harrowing at the proper time is often the cheapest and most efficient way of controlling weeds during the first stages of growth of the corn. The harrow or the weeder also can be used to advantage in breaking up a crust caused by a heavy, dashing rain.

PLANT SOY BEANS ANY TIME

For Hay, Pasture, Green Manure or Soiling Crop Sow Any Time Up to August 1.

Soy beans may be planted any time from early spring until midsummer. For a grain crop they should be planted early, but for a hay, pasture, green manure or soiling crop they may be planted as late as August 1. The choice of a variety must be made by the farmer himself.

POULTRY FOR BACKYARD FLOCK

Not Necessary to Have Hens of Extra Good Standard Quality for Egg Production.

For the backyard flock, kept to produce eggs only, it is not necessary to have hens of extra good standard quality. What breeders of standard poultry call choice utility hens are as good as any for egg production, and cost but little more than ordinary mongrels. Hens of this grade in the medium-sized breeds are usually a little under standard weights, and have superficial faults—as unsoundness of color; or irregularity of markings or of the shape of the comb—which in no way affect their laying capacity, but make them unfit for exhibition and undesirable for breeding purposes.

When buying hens in person, particular attention should be given to

Good for Producing Eggs.

the general condition—whether the bird seems vigorous and lively—and to the appearance of the comb and the condition of the feet. Healthy hens have bright red combs and bright eyes, assert poultry specialists of the United States department of agriculture. A slight paleness of the comb is simply an indication that the hen is not laying at the time; but a bird whose comb has either a yellowish or a bluish cast should be rejected, for these are symptoms of internal disorders. The skin and scales of legs and toes should be smooth, and the soles of the feet soft and free from corns.

DUST BATH VERY ESSENTIAL

Best Results Cannot Be Expected If Hens Are Permitted to Become Overrun With Vermin.

If the best results are to be expected from the flock, the hens must not be allowed to become overrun with lice or the house with mites. Usually, there will be a place in the yard where the hens can dust themselves in the dry dirt. In the absence of such a place, a box about 2 feet square and containing ordinary road dust or fine dirt should be placed in the house.

A dust bath aids the hens in keeping lice in check and therefore adds to their comfort. If they are not able to keep them in check by dusting themselves, other measures can be taken.—United States Department of Agriculture.

SELECTING GOOD LAYERS

Keep as good layers:
1. Hens which have been the best layers during the past year should be kept over for breeders for next year.
2. Hens which have not started to molt.
3. Hens that have bright red combs and wattles and bright eyes.
4. Well spread pelvic bones, good depth from lay bones to keel bone and vent soft and pliable.
5. Pale shanks, beak and vent of all breeds which have yellow shanks and skin. Use all of the test to be sure you get the good layers.

SEXES SHOULD BE SEPARATED

As Soon as Young Males Begin to Crow They Should Be Fattened for Market.

The young stock should not be reared on a flock of old birds. They should be kept separate. As soon as the young males nag and worry the females (which is about the time they start to crow) the sexes should be separated, and the males fed an extra allowance of food. The cockerels can be mated to the hens without fear of bad effects from inbreeding.

FURNISH SHADE IN SUMMER

Chicks, Poults, Ducklings and Goslings Must Have Ample Shade During Hot Weather.

If the ground that the chicks, poults, ducklings and goslings range over during the summer is grass land browned by the heat of the sun and affording no tender green food, be sure that the youngsters have ample shade and one good feed of fresh, tender green food every day.
