SHORT STORIES OF TOWN AND COUNTRY

O. L. Foster and wife were in Salem the early part of the week.

Gretchen and Madeline Kreamer spent last week end in Portland.

Mrs. Frank Miller was taken to a Salem hospital the early part of the week. She has been having trouble with her throat and hopes to be benefited.

Mrs. Mollie Alien, of Portland, has been visiting Mrs. W. H. Walker and other friends.

Miss Helen Jones, of the Corvallis High School, passed the week end with her parents here.

Messrs. Palmer, Kayser and O. A. Macey, accompanied by their wives, were here Saturday evening. The gentlemen came to assist in giving Mr. Macey the third degree in Masonry. The work was followed by a fraternal feast at the festal board. The party returned to Portland Sunday, with the exception of Mrs. Macey and daughter, Margaret Dunsmore, who remained as guests of Dr. Dunsmore until Tuesday.

Much Activity Shown By Baptist Members

There will be services at the Baptist Church both Sunday morning and evening next Sunday. Our fast growing Sunday School meets at 10:00 o'clock a. m. sharp. Archie Justin is our new superintendent, Mrs. Walker having resigned as she has moved to the country. We have classes and teachers for all ages. At 11:00 o'clock Rev. Proppe will preach one of those sermons you will want to hear, the subject being: "Four Impossible Things In An Age of Possibilities."

Our growing Young Peoples Society will meet at 7:00 p. m., Miss Mildred Goodman acting as leader. At 8:00 o'clock in the evening Rev. Proppe will preach on the subject: "The Great Refusal." Our mixed quartette will sing the famous song "The Sinner and the Song." You will want to hear this. You are welcome.

FAST CLIMBING OF AUTOMOBILE

At a recent hill-climbing contest held in France a curious cyclear or diminutive automobile, whichever you wish to call it, made over 60 miles an hour on 10 per cent grade. The machine, known as the "Spider" because of its light construction, is driven by a six-horsepower twin-cylinder, V-type motorcycle engine mounted at the rear. It is steered by pulleys and cables in very much the same manner as the usual airplane. The driver's legs extend into the hood of the machine while the passenger's legs and feet rest on side pieces.—Scientific American.

COUNTRY'S OLDEST MINER.

The honor of being the oldest miner in the country is bestowed on William James of Smoke Run, Pa., who, after 78 years in mines in this country and in Wales, laid down his tools on July 3, 1920. James began work in the mines when he was six years of age.

JAPS TO FLY.

Japan's embarkation on an elaborate program of naval aviation is to be expected, in the opinion of officials in Washington, by the recent activity of its government in purchasing airplanes in Europe and in enlisting the expert advice of British naval flyers.

REVISED HER GOOD OPINION

Will Be Long Before Young Woman Can Have Any Respect for Crusty Old Man.

The other evening a young lawyer took his bulldog in his machine when he took his best girl out driving. And as he drove up to her house out jumped his dog and clinched with the dog of the man who lived next door to her home. Then the fight began and it lasted long and was hard. But finally the two dogs were parted and the girl stood fearfully awaiting the "balling out" she was sure her crusty neighbor would give her best beau. But he did nothing of the sort. He kicked his own dog back into his house and talked affably with the lawyer.

The lawyer, too, was surprised. He voiced his, "Well, you certainly are a good scout," he said. "Most men would have been mad over my dog fighting yours."

"No, sir, I'm a good neighbor," the old man said, and the girl began to feel more kindly toward him than she had ever felt before. But the next minute her kind feeling departed. For he finished, "I wouldn't do a mean trick to any of my neighbors like discouraging their daughter's beau. I've got two old maid daughters myself just a few years older than the two who live here." —Indianapolis News.

STONE SCREENINGS.

Recent tests conducted in Montreal indicate that appreciable increases in the strength of concrete may be obtained by the judicious use of stone screenings in the aggregate, or by the substitution of finely crushed stone for ordinary sand. Some of the results showed that as much as 22 per cent additional

strength was secured by admixing stone screenings to the extent of 5 per cent of the weight of the aggregate in a given mixture, continues the Times Engineering Supplement, while in the case of mortar, where ordinary sand had been replaced by crusher sand, increases in strength from 15 per cent up to 79 per cent were observed in test specimens.
