Eola Items

Cliff Brunk has purchased a new motorcycle.

Ed Mitty has purchased a nice young team from Jess Lucas of Salem.

G. W. Chamberlin and Mr. Miller of McLeay and Mr. Fellows of Salem visited at B. I. Ferguson's Tuesday. Mr. Fellows and Mr. Miller are interested in the culture of cherries near McLeay.

The grippe has been very prevalent in Eola lately every one seems to be taking his turn at it.

Owing to the good weather farmers and hop men are well along with their spring work around here.

Eola has considerably increased in population lately, several new families moving in owing to the spring work opening up and work being plentiful.

SPRAYING TIME IS NOW HERE

Your orchards should all be pruned and cleaned in good shape by this time and spraying should be commenced, states one of Oregon's fruit inspectors. He suggests a spray as follows:

Five pounds fresh unslacked lime, 5 pounds sulphur and 15 gallons of water, slack the lime, using as little water as possible; mix the sulphur in water to the consistency of paste, and add to the lime; then add more water and boil in an iron boiler for 42 minutes or until the mixture is a dark red color with but little sulphur on the surface. While boiling keep it well stirred, or it will settle and burn. Then add the remaining of the fifteen gallons of water, and strain to remove sediment. In spray-

ing it is best to have the spray warm, and to use a coarse nozzle with considerable force. This spray is just as good for rose bushes and berry bushes of all kinds as it is for the orchard.

MAN MUST BUILD AND MAINTAIN

Opportunities for developing the individual are abundant. Every relation of man to life demands individual effort. Life is more nearly a battle-field than a play-ground. No stone can be lifted above another, to make the crudest wall or dwelling, but nature, represented by her power of gravitation, strives at once to pull it down. No structure is complete before the elements are at work defacing it. Summer heat and winter cold expand and contract materials of every kind, rain and wind wear and warp and twist; the oxygen of the air gnaws into stone and iron alike—in a word, all the elements are at work undoing what man has accomplished. Man must not only build he must maintain. It is the same story in the field of agriculture. Here, again, man must battle with nature. We grow useful grains under artificial conditions, combatting the natural growth of weeds that infest the fields; wind and rain, blighting heat and withering cold menace the crops; the germ of fungoid pests lurk everywhere, and myriads of insects attack orchard and meadow and grain fields in devastating legions. Exchange.

The Expense of War

During the life of this Republic the government has spent for all purposes \$21,518,871,351. Of this sum \$16,567,677,135 was devoted to militarism and only \$4,852,194,216 to the activities of peace. Over 76 per cent of our expenditures in 125 years were for war purposes.

For eight years preceding the Spanish War, our army and navy cost \$411,000,000; in the past eight years, over \$1,483,000,000, an increase of \$1,072,000,000.

The increase would build fifteen such wonderful cities as Gary, Indiana.

It would have paid the national debt and left a balance of \$158,000,000.

It exceeds twice the highest estimated cost of all our deep-waterway projects.

As a legacy of war, the United States has disbursed in pensions since 1861 \$3,686,461,840.

The report of the United States Treasurer for the fiscal year ending June 30, 1909, shows that from receipts of \$603,589,489, the sum of \$441,370,104 was spent for war purposes—73.1 per cent.

Our Supreme Court costs more than \$250,000 annually.

CHINESE MURDERED IN PORTLAND

Seid Back and son are Leaders of one of Factions

The Oregonian of Monday has an article telling of the killing of three Chinese in Portland, the wounding of several in Seattle and California. It is stated the murders are reported to be traced direct to the murder of Seid Bing, a blood relative of Seid Gain, a Chinese lawyer and Seid Back, his father a millionaire merchant of Portland. It is generally reported that Seid Back is the same party that owns the big hop yard opposite Independence and he has with him a private detective at all times. The two tongs "Hop Sings" and "Bow Lungs" have been at better outs for several years and the killing was the result of the failure to pay the amount of money requested as indemnity for the death, if certain witnesses failed to give testimony.

Deposits in all of the banks in the state totalled \$121,924,988.88 at the close of business February 4, 1913, or an increase of \$5,039,453.26 over the deposits at the

close of business February 20, 1912, according to a statement just completed by Will Wright, State Superintendent of Banks, Oregonian.

RAISING HISTORIC SHIP

Dispatch to Daily Papers this week Tells of the Niagara

Erie, Pa., March 17.—The Niagara, the flagship of Commodore Perry, recently lifted from the bottom of Lake Erie after scores of years, is within 50 feet of shore and stands eight feet out of the water. The historic ship is well preserved and the task of rebuilding her for the centennial of the battle of Lake Erie will be small. The port holes are still visible. A musket was found today between the timbers of the forward bow of the hull. The old ship is being closely guarded.

THE BIG GREEN HOUSE HERE

W. B. Barnett is making good with his hot house here

The editor of the Monitor was invited to look through W. B. Barnett's green house the first of the week and saw a fine supply of early plants of all kinds coming on. Early radishes, lettuce, tomatoes, cucumbers, celery, egg plants, broccoli, cauliflower, peppers, cabbage, ground cherries, etc., are being raised for marketing the young plants along the vegetable line, while pansies, carnations, gladiolus, easter lilies, cyclamen plants, astors, cineraria, calceolaria, ruffled petunia, and other flower plants are being matured early for sale. Besides the above a lemon tree is started, and sweet potatoes are planted as an experiment.

Mr. Barnett has a glass hot house 20 by 62 and expects to enlarge it as the business grows. He has sufficient plants there now to plant from 75 to 100 acres of vegetable gardens, and what he has planted will be ready for the market early in the season. He stated he had a ready market for all his early plants and would place them on sale as fast as he thought best to put them on the market.

PAUL SLOAN GETS A PET

A brown ferret arrived at the station here Monday from Warren, Ohio for Paul Sloan. The little animal has a long slender body and is an expert mouser. We presume this little fellow will be used to destroy the pests of the neighborhood.
