

Paint Your Roofs Now

Contrary to the prevailing custom, painting should be done in the Spring and early Summer. The sun is what damages your roof- not the rain.

A coat of paint applied now to

the roofs--either prepared (sometimes called paper), shingles, galvanized iron or tin--of your house, barns, garage or other buildings will not only improve the general appearance of your place but will add years to the life of your buildings.

PABCO PAINT

In three colors--Black, Red and Green

is made expressly for roofs by THE PARAFFINE PAINT CO., the largest manufacturers of preservative and waterproofing paints in the West, and is the result of more than thirty years' experience in the

manufacture of paints suitable for California climatic conditions.

See our big window display of PABCO PAINTS and let us show you how little it will cost to paint your roofs.

"The Handy Farm Paint"

Pabco Paint is a wonderful preservative for Water Troughs, Tanks, Irrigation Boxes, Sifos, Wooden and Iron Flumes and Pipes, Steel or Wooden Fences, Building Foundations, and in fact, Metal or Wooden Surfaces of all kinds.

SOCIETY AND CLUBS CHURCHES

BY VIRGINIA SOUTHERN

A delightful diversion during the mid-summer days is a plunge in the waters of the Willamette. Every evening pic-nic parties gather on the banks of the river and those who do not care to take a dip find amusement in watching the bathers enjoy the water sports.

LARGE FUNCTION.

The premier social function of the week was the large and attractive "500" party given last Tuesday afternoon at the pretty First street home of Mr. and Mrs. A. L. Thomas. The hostesses for this delightful event included Mesdames A. L. Thomas, P. H. Drexler, O. F. Cosper, P. J. Dickinson and Miss Elizabeth Cosper.

Tho' the afternoon was a typical summer one, the invitations were eagerly responded to.

The large veranda was inviting with many hanging baskets of flowers and potted greens, while the reception suite was ablaze with art baskets of golden glow combined with feathery ferns. Masses of wild flowers were banked on the mantels while before the grates huge quantities of multi-colored blossoms were used with pleasing effect, the whole producing a charming ensemble for the maids and matrons in cool, summery frocks. Within this pretty setting six tables were arranged for progressive "500", the players entering the games with much enthusiasm.

Through a season of merry chatter 18 hands of the game were played, the result being that Mrs. Geo. Girard won top score. The hostesses presented her with a handsome hammered

brass jardiniere. Low score fell to Mrs. H. Mattison who received sweet consolation in a beautiful brass candle-holder.

A delicious and cooling collation of attractive appointments, which concluded an extremely delightful afternoon in every detail, was served by the pretty Misses Mildred Allen, Eula Dickinson, Dorothy and Gladys Childs.

TATTIERS MEET.

Mrs. Asa B. Robinson was hostess to her Tatting Club at her attractive Dallas home last Friday afternoon.

The Independence members motored over early in the afternoon and all present enjoyed the charming hospitality of the hostess.

The usual pleasures were supplemented by a splendid musical program rendered by two Dallas musicians.

BIRTHDAY PARTY.

On Tuesday afternoon the Light Bearers Class met at the post office and were taken to the Boller home to celebrate Erman Boller's birthday. A bounteous repast was served under the arbor, and each guest presented their classmate with a remembrance. After the pic-nic they returned home by hay rack.

SILVER TEA.

Mrs. F. A. Hewitt was hostess to a coterie of ladies at a silver tea last Friday afternoon.

This pleasant event will be followed by a series of similar functions to be given by the members of the Methodist Ladies Aid.

Each hostess will entertain about twelve guests.

Proper Method of Pressing Garments

Good pressing is not only an important part of dressmaking and tailoring but it is also one of the most important features in the care of clothing.

Shirts should be pressed over an ironing board.

The board should not be too heavily padded. The covering should be drawn tightly and should be of a firm, smooth material that will not leave the imprint of the texture of weave.

Collars and curved seams should be pressed over a curved surface such as a tightly padded cushion.

Sleeve seams may be pressed over the handle of a broom after covering it

smoothly with cloth.

Use the curved edge or side of the ironing board when pressing open seams. This prevents the edge of the seam being pressed into the garment.

Nearly all pressing is done on the wrong side of the garment.

The seams may be dampened if the material permits. For surface pressing lay over the material a damp cloth and press dry. When pressing on the right side a firm dry cloth is first placed over the garment.

Use a rather heavy iron for pressing. Press slowly. Lift and place the iron bearing down heavily.

Always avoid a sliding motion, as it is apt to stretch the material.
