

Bettreal Shoes for Men and Boys

Conqueror Hats for Men

Modeled to Fit Perfectly

One of the first things a woman notices when placing her foot into a pair of

UTZ & DUNN CO.
Style Shoes of Quality

is their nicety of fit and the pleasing way in which they heighten the beauty of the feet.

Such elegant appearance is difficult to obtain in many other shoes. The secret of this graceful fit is in the fact that Utz & Dunn Co. Shoes are modeled with unusual care and precision. And this trim, neat look is unimpaired by long wearing because, due to the quality and strength of the materials which enter into them, these shoes hold their shape until discarded.

Tickets may be bought at Morlan's in Monmouth or at the school.

monmouth Herald: There is some talk of putting the sun on an eight hour schedule and extending the cherry season a few weeks.

BORAH LOSES WATCH; PRESIDENT FINDS IT

"Wear It on Wrist," He Advises Senator, Who Recovers It In Riding Boot.

Washington.—Senator William E. Borah of Idaho lost his watch recently, and President Wilson found it. The senator was riding his horse in Rock Creek park when he looked at his watch, the present of Coeur d'Alene miners. Then he shoved it into the fob pocket of his riding breeches—or thought he did. When some time later he reached for the watch it was missing. Recalling the spot where he last had looked at it, he galloped back, dismounted and, leading his horse by the reins, scanned the saddle path. Just then President and Mrs. Wilson, attended by a cavalry sergeant, cantered up the path, and the president stopped when he saw the senator. "Lost anything, senator?" asked the president.

"My watch," replied Borah. The president dismounted and joined in the search. After ten minutes he suggested that perhaps the senator had missed the fob pocket and that the watch had dropped inside his riding breeches. Sitting down on a log, the senator pulled off his right riding boot and found the watch.

As the president turned to remount he said with whimsical blandness: "Why don't you wear a wrist watch, senator?"

CENSUS FACTS SACRED.

Detectives, Collectors and Relatives Turned Away Disappointed.

New York.—Ever since the announcement was made that registration under the state military census law was practically complete the offices of the city director of census and the tabulating division have been the objective points for private detectives, bill collectors and relatives looking for missing persons.

No single item of information was given out nor will be, for the state officials say that all facts gathered by the census takers are sacred and beyond the reach of subpoenas.

Sell the Champion Cream Saver

THE NEW DE LAVAL

If you have ever owned a separator of any other make, there is one outstanding feature of the NEW De Laval that will appeal to you as much as even its mechanical superiority, and that is its simplicity.

You won't find any complicated, troublesome parts in the NEW De Laval. It does not get out of order easily, even when it is misused; and if for any reason you ever should want to take it apart, the only tool you need is the combination wrench and screw-driver furnished with each machine.

The NEW De Laval is the simplest cream separator made.

A person who has never before touched a separator can, if necessary, unassemble a modern De Laval machine down to the last part within five minutes, and then put it together again within ten minutes. This is something that cannot be done outside a machine shop with any other separator made, and any separator user who has ever had to wrestle with the complicated mechanism found in other separators will appreciate what it means to him.

Don't fail to stop in and see the NEW De Laval the next time you are in town. Even if you are not in the market for a separator right now, come in and examine a separator that is said by experts to embody the greatest improvements in cream separator construction in the last thirty years.
