It is the primary duty of every woman to wear in her face the lilies and roses of health. It is one of woman's natural missions to please, and one of the first attributes of a pleasing woman is a complexion that shows the bloom of health.

No matter how beautiful a woman may be at the outset, if she suffers from weakness and disease of that delicate and important organism that is the threshold of human life, she will soon show traces of suffering in her face, and very shortly become haggard and homely. She will lose her animation of manner, the sparkle will fade from her eyes and the roses from her cheeks, her form will lose its roundness and her step its sprightliness. Dr. Pierce's Favorite Prescription imparts strength, health, vigor and virility to the feminine organism. It allays inflammation, heals ulceration and tones the nerves. It makes weak women strong in a womanly way and able to bear the burdens of maternity. It banishes the suffering of the period of gestation, and makes baby's advent easy and almost painless. It restores the lost complexion and imparts strength, vitality and health to the entire system.

"I am very thankful for what Dr. Pierce's Favorite Prescription has done for me," writes Mrs. Etta E. Smith, of Grenola, Elk Co., Kans. "About a month before I was confined I had such pains that I could stand up only a little while at a time. I could not rest at night or at any other time. I could scarcely eat anything. I began taking Dr. Pierce's Favorite Prescription and after the second dose I felt better. From then until I was confined I carried all the water that was used up a long hill and worked in the garden every day, besides my other work and did not feel at all bad. When the baby was born I had a very easy time. The women said I had an easier time than any one they ever saw for the first time. The baby is very healthy. I got up when she was five days old. After two days I began my own work and felt stout and healthy."
