

**MY OWN FAMILY USE
PE-RU-NA.**

HON. GEORGE W. HONEY.

Hon. George W. Honey, National Chaplain U. V. U., ex-Chaplain Fourth Wisconsin Cavalry, ex-Treasurer State of Wisconsin, and ex-Quartermaster General State of Texas, G. A. R., writes from 1700 First St., N. E., Washington, D. C., as follows:

"I cannot too highly recommend your preparation for the relief of catarrhal troubles in their various forms. Some members of my own family have tried it with most gratifying results. When other remedies failed, Peruna proved most efficacious and I cheerfully certify to its curative excellence."

Mr. Fred L. Hebard, for nine years a leading photographer of Kansas City, Mo., located at the northeast corner of 12th and Grand Aves., cheerfully gives the following testimony: "It is a proven fact that Peruna will cure catarrh and the grippe, and as a tonic it has no equal. Drug gists have tried to make me take something else 'just as good,' but Peruna is good enough for me."

Pe-ru-na in Tablet Form.

For two years Dr. Hartman and his assistants have incessantly labored to create Peruna in tablet form, and their strenuous labors have just been crowned with success. People who object to liquid medicines can now secure Peruna tablets, which represent the solid medicinal ingredients of Peruna.

"20-Mule-Team" Borax tends to stop the development of blight and mildew, and destroys parasitical insects. Stalks, young leaves and buds affected should be carefully sprinkled with Borax solution, and "20-Mule-Team" Borax should be used freely around the wainscoting and floors of buildings to protect from insects.

Another Kind.

When Johnny Hobbs left his home up among the New Hampshire hills to visit his grandmother in Worcester, Mass., he was cautioned by his mother that he would find things in the city strangely different from those at home.

Johnny arrived in the early afternoon, and long before tea time his grandmother, who lived most simply, told him to run out to the pantry and get a bowl of milk which she had left there "for a hungry boy."

A moment later she followed him, and to her amazement, beheld her grandson bravely at work on a bowl of spearmint tea which she had forgotten to put in the place where she had told him to find the milk.

"Why, child," she cried, seizing the bowl from poor Johnny, "don't you know this isn't milk?"

"I—I knew it wasn't like Hillbury milk," stammered Johnny, with a final gulp, "but I thought maybe it was the kind folks had in Worcester."

Peppermint and Tobacco.

If you have a boy who has begun smoking too early and whom you wish to cure of the habit, feed him peppermints. Dr. O. Clayton Jones of Silverton, England, writing in the London Lancet, is authority for this simple cure. Dr. Jones writes: "To break the smoking habit in a youth there is nothing better than peppermint drops. He cannot smoke with a 'bullseye' in his mouth, and even for some time after it is dissolved tobacco will not blend kindly with the taste that remains. Socially the cure may seem worse than the disease, but from a medical point of view the sucking of peppermints is far less hurtful. A common 'bullseye' will prevent smoking for nearly an hour, so the amount of sweets used need not be great."

Unanswerable.

The lion was sneering at the awkward, uncouth, and generally ugly appearance of the elephant.

"I may not be as graceful as you are," observed the elephant, "but I'm nearer skin to the human family than you are. The knees of my hind legs bend forward, as a man's legs do, while yours bend backward, the same as a hyena's, or a hog's, or a skunk's. You belong to a lower order of creation, and I'd rather not associate with you on terms of equality if it's all the same to you."

Whereat the lion, observing that the elephant was waving his trunk threateningly, went back among the wolves and coyotes, where he still retained some prestige.

An Unfortunate Misunderstanding.

"I had to leave my last situation because the missus said they were going to lead the sinful life, and they wouldn't want any servants about the place."—Punch.

KASPARILLA

This sterling household remedy is most successfully prescribed for a "world of troubles." For derangements of the digestive organs it is a natural corrective, operating directly upon the liver and alimentary canal, gently but persistently stimulating a healthful activity. Its beneficial influence extends, however, to every portion of the system, aiding in the processes of digestion and assimilation of food, promoting a wholesome, natural appetite, correcting sour stomach, bad breath, irregularities of the bowels, constipation and the long list of troubles directly traceable to those unwholesome conditions. Kasparilla dispels drowsiness, headache, backache and despondency due to inactivity of the liver, kidneys and digestive tract. It is a strengthening tonic of the highest value.

If it fails to satisfy we authorize all dealers to refund the purchase price.

SHIPPERS WIN OUT

United States Court Decides Hariman Lines in Wrong.

LUMBER INTERESTS SUSTAINED

Upholds Right of Commission to Fix Freight Rates, Which Must Be Equitable Hereafter.

San Francisco, Oct. 1.—In sustaining a demurrer by the government to an application for an injunction filed by the Southern Pacific company seeking to restrain the interstate commerce commission from establishing a rate upon lumber between Oregon and California, the United States circuit court of appeals yesterday rendered a decision which upholds the authority of the commission to fix freight charges upon what it considers a just and equitable basis, and sustains, in its direct application, the most important clause of the rate law, namely, the right of the commission to relieve shippers, when in its judgment they are entitled to such relief.

While the opinion of the court will probably not be available for several days, the victory of the government appears to be a substantial one. Representatives of the United States district attorney's office and the interstate commerce commission declared that this is the first instance since the enactment of the rate law in which it was alleged that the commission had erred in a question of discretion and judgment, and the first time that there had been placed squarely before a court of this jurisdiction the right of the commission to make or correct rates under such circumstances.

The action decided was instituted by the Southern Pacific and the Oregon & California Railway after the announcement of an increase in the rates on rough lumber from the Willamette valley in Oregon to San Francisco and other bay points. The railroads announced that the rate, which was \$3.10 per 1,000 feet, was to be increased to \$5. A protest was filed with the interstate commerce commission by the Associated Lumber Dealers of the Northwest, and the commission, after investigation, decided that \$3.40 per 1,000 was a reasonable rate. The objection of the railroads to this decision took the form of a suit for an injunction to set aside the order of the commission.

DISEASE IS ABATING.

Cholera in St. Petersburg Has Caused 2,168 Deaths.

St. Petersburg, Oct. 1.—For the 24 hours ending at noon yesterday 223 new cases and 93 deaths from cholera have been reported by the municipal hospitals. For the previous 24 hours the statistics were 222 cases and 99 deaths.

One hundred and twenty-seven recoveries were reported yesterday as compared with 137 the 24 hours ending at noon the day previous.

The totals since the beginning of the epidemic are 5,655 cases, 2,168 deaths and 1,651 recoveries.

There has been published an official report of an outbreak of the cholera at the Pavlovsk military academy. This shows that the disease originated in the academy kitchen, where a cook was suffering from incipient cholera and prepared the food for the cadets for several days. The cook contracted the disease in the cholera hospital, where he was sent on a mistaken diagnosis. When the physician discovered his error the cook was discharged and allowed to return to duty. This gross carelessness resulted in 58 of the cadets coming down with the disease. Five of these cases ended fatally.

Aeroplane Deal Closed.

Paris, Oct. 1.—With the consent of Wilbur Wright, the great American aviator, Lazare Weiller has ordered a French factory to manufacture 50 aeroplanes built on the same plan as Wright's machine. Weiller is the head of the syndicate that is going to pay Wright brothers \$100,000 for the French rights to their machine, providing it meets with certain requirements, and it is believed that the order placed with the factory yesterday is anticipatory of the signing of a contract between the Wright brothers and the French syndicate.

Forests Still Burned.

San Jose, Cal., Oct. 1.—Although the valley is completely filled with smoke, no definite details can be learned of the forest fire that has been raging east of Mission Ridge and between the Calaveras and Sinaloa creeks. It is evident, however, that the fire is still burning and doubtless spreading, as the density of the smoke completely hides the mountain range from view. Owing to defective wires, communication with Lick observatory has been cut off.

Ship Arms to Chinese.

Vancouver, B. C., Oct. 1.—Arms and ammunition are being regularly smuggled from Vancouver to aid Chinese bandits and pirates on the western side of the Pacific, according to a discovery recently made on board the steamer Empress of Japan at Hongkong. On the last visit of the steamer to that port a number of trunks with false bottoms were found, in which were several hundred rounds of ammunition and many packages labeled "soap."

Fires Revived in Adirondacks.

Saranac Lake, N. Y., Oct. 1.—The forest fires in the Adirondacks which were temporarily checked by heavy rains are again springing into life in every direction. Fanned by a steady wind, the flames once more are assuming dangerous proportions. The wardens are rushing men to Dannemora, where a big fire is in progress.

IGNORANCE OF SANITATION.

Lower Classes in Russia Refuse to Be Vaccinated.

St. Petersburg, Sept. 29.—Since the beginning of the epidemic there have been 15,683 cases of Asiatic cholera reported in Russia and 7,102 deaths. In St. Petersburg alone, since the presence of the disease was officially admitted September 8, there have been 4,931 cases and 1,871 deaths reported.

The figures with reference to the invasion of this city by the disease cannot be relied upon as a number of occasions authoritative sources showed the number of cases and deaths in a single day to be far in excess of that announced by the authorities. There is an appreciable betterment of the sanitary conditions and consequent decrease in the disease as shown by the figures given out Sunday.

For the 24 hours ending at noon the number of new cases in the city was 268 and the number of deaths 143, as compared with 312 new cases and 153 deaths for the previous 24 hours.

Difficultly has been experienced in dealing with the workmen of St. Petersburg, who with their families comprise three-fifths of the population for they were unable and unwilling to comply with the sanitary precautions. The ignorance of the lower classes and their superstition greatly increase the difficulties of the situation. During the earlier stages of the epidemic few could be prevailed upon to undergo preventive inoculation, which is provided free of charge, but latterly the authorities have made inoculation compulsory in some quarters of the city.

SITUATION MOST SERIOUS.

Unbroken Drouth in East Is Raising Havoc With Industries.

Pittsburg, Sept. 29.—With losses aggregating several million dollars from forest fires, and heavy damage to crops and livestock, and the reported loss of a number of lives due to fighting timber fires; the enforced idleness of thousands of workmen owing to suspensions because of lack of water; the authorities anticipating serious epidemics of contagious diseases, and many small streams dried up and practically obliterated, the drouth of 1908, which has held western Pennsylvania, eastern Ohio and West Virginia for two months, remains unbroken. While in the Pittsburg district the water supply is sufficient to carry on all business, the low stage of the rivers has caused a congestion of much coal in this vicinity. Every available barge and float has been loaded with coal, and at present there are almost 20,000,000 bushels in the Pittsburg harbor.

About 15,000 miners employed in the river mines along the Monongahela valley are out of work.

In all sections of the dry zone prayers are offered up daily and these prayers will continue until they are answered with rain.

STUDENTS FIGHT DISEASE.

Drafted in Manila to Battle With Epidemic of Cholera.

Manila, Sept. 29.—There were 14 new cases of cholera and three deaths reported for the 24 hours ending at 8 o'clock yesterday morning. Practically the entire staffs of the bureau of sciences and the local medical schools have been drafted into the service to fight the disease. The two senior classes of the medical schools are acting as nurses.

A serious situation is caused by the supply of disinfectants running very low. The bureau of sciences is experimenting with electricity and sea water to produce chlorine for use until the new supplies of disinfectants arrive. Enormous quantities of disinfectants have been used in vigorous efforts to cleanse the entire city.

New Party in Cuba.

Havana, Cuba, Sept. 29.—That the Liberal party will lose the entire negro vote in the coming election seems assured, as the result of an attack made on a mass meeting of negroes by a mob of Liberals. The fact that the negro element proposed to form a national party angered the Liberals, as they saw that such a party would draw more from their ranks than from the Conservatives. General Estenoz, leader of the negroes, has announced that his party is a certainty, as his followers cannot hope to secure their rights without a party of their own.

New Road to Peace River.

Vancouver, B. C., Sept. 29.—A special dispatch from Winnipeg says: The Canadian Pacific is rushing its survey through from a point near Athabasca leading to Grand Prairie, north of Edmonton, Alberta. From there the main line is being extended to Pine Pass. The company is concentrating its efforts on a survey through Pine Pass and from that point the line will be extended through British Columbia to a point north of Prince Rupert.

New Coal Field Found.

Victoria, B. C., Sept. 29.—A rich find of good coal with a seam eight feet in width has been located as a result of the boring at Deep Bay, Vancouver Island, about three miles south of Union Bay, by the Wellington Colliery company of R. Dunsmuir's Sons. The seam will be worked as soon as arrangements can be made to sink an pit.

S.S.S. THE CURE FOR SCROFULA

Swollen glands about the neck, weak eyes, pale, waxy complexions, running sores and ulcers, skin diseases, and general poor health, are the usual ways in which Scrofula is manifested. The disease being deeply entrenched in the blood often attacks the bones, resulting in White Swelling, or hip disease, and the scrofulous and tubercular matter so thoroughly destroys the healthful properties of the blood that Scrofula sometimes terminates in consumption, an incurable disease. The entire circulation being contaminated, the only way to cure the trouble is to thoroughly purify the blood and restore the circulation to a strong, healthy state. S. S. S. is the very best treatment for Scrofula; it renovates the entire blood supply and drives out the scrofulous and tubercular deposits. S. S. S. is the greatest of all blood purifiers, and it not only goes right down to the very bottom of the trouble and removes the cause, but it supplies the weak, diseased blood with the healthful properties it is in need of, and in this way builds up weak, frail, scrofulous persons and makes them strong and healthy. S. S. S. is a gentle, safe, vegetable preparation and is suited for persons of any age. Book on the blood containing information about Scrofula and any medical advice free.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

As a Safety Valve.

"Scrochley doesn't have any more of those terrible epileptic fits he used to have, does he?"

"No; whenever he feels one of them coming on he goes and takes a spin in his automobile."

One Reason.

Bella—What do they want to discover the north pole for?

Stella—What for? Why, for the sake of getting some picture postcards from there, of course.—Pick-Me-Up.

Mother will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Even Change.

"You spent a month at the seaside. Did it pay?"

"I can't say it paid, but I came out exactly even."

"How?"

"Paid out \$60, but gained twelve pounds. Same thing, you know."

New York Jews.

The Jewish community of New York is now the largest in history or tradition. It represents 10 per cent of the entire Jewish population of the world.
