MISCELLANEOUS

DRESS MAKING Mrs. Hostetter is prepared to do dress making or sewing. Having finished her trade in one of the largest dress making establishments on the coast.

JOINT TEACHERS

INSTITUTE

County School Superintendent Wells is making arrangements to hold a joint teachers institute in Medford on October 28, 29 and 30. The teachers of Jackson and Josephine counties will participate. The day sessions will be held in the parlors of the First Baptist church, and the evening sessions will be held in the high school.

Among those who will be present and take part in the proceedings will be Dr. J. Whitcomb Brougher, pastor of the White Temple, Portland; L. A. Alderman of the University of Oregon; L. R. Traver, principal of the Monmouth Model school; State Superintendent J. R. Ackerman and Library Commissioner Miss Cornelia Marvin.

A National Awakening to the Need of Forest Preservation.

JACKSONVILLE VS. THE WORLD

"In the last ten years," says the Yearbook of the Department of Agriculture for 1907, "forestry has advanced in this country from an almost unknown science to a useful growing profession. In that time the number of technically trained foresters has increased from less than a dozen to over 400. Ten years ago there was not a single forest school in the country; now there are several professional forest schools which rank with those of Europe, and a score more with courses in elementary forestry whose usefulness is steadily growing. Forest lands under management have grown from one or two tracts to many aggregating 7,503,000 acres, scattered through 39 States. The National Forests have increased from 39,000,000 acres practically unused and unprotected, to 165,000,000 acres, used, guarded, and improved both in productivity and accessibility. The number of States which have State forests has increased from 1 to 19; and of those which employ trained foresters from none to 11. The membership of associations has increased from 3,600 to 15,800. Ten years ago, except for a few of the foremost botanists, European foresters knew more about American forests than did the people of this country. In Europe they were then using preservatives to prolong the service of beech trees, and so adding from twenty to forty years to their life. Here on the other hand, scarcely a treated tie had been laid, though there are now 69 treating plants, 27 of which treat ties exclusively, and an engineer who recently returned from Europe reports that both in size and mechanical perfection the treating equipment of this country is ahead of any to be found abroad.

"And yet American forestry has only safely passed the experimental stage and got ready to do something. Action, immediate and vigorous, must be taken if the inevitable famine of wood supplies is to be lessened. We are now using as much wood in a single year as grows in three, with only twenty years supply of virgin growth in sight. Only the application of forest knowledge with wisdom, method, and energy in the next ten years can prevent the starving of national industries for the lack of wood.

"California tanbark oak, hitherto considered of principal value for the tanning in its bark, has been found through timber tests to be suitable for cooperage and wagon manufacture. In strength it compares favorably with eastern oaks and hickory. Eucalyptus planting has been given much attention in California. The interior of one of the largest buildings in Los Angeles was finished in eucalyptus imported from Australia at \$250 a thousand board feet. This tree grows very rapidly, and is especially adapted to that region. Four companies have been formed which will plant in the aggregate several thousand acres with eucalyptus. It is with this tree that the Santa Fe Railway is planting 8,620 acres near San Diego to test its suitability for the production of ties.

"Prominent among the projects carried forward by the State forester of California was the publication of a comprehensive bulletin on the commercial production of eucalyptus. Preservative treatments of cedar, pine and fir ties and poles, conducted in cooperation with the Forest Service at Los Angeles, showed that a 40-foot pole, worth \$7.50, can be preserved with creosote at a cost of \$2 so as to secure additional service worth several times the additional cost. The State fire patrol was materially strengthened.

"Hawaii, early to take up forestry, conducts systematic, practical work under two main heads—the maintenance of protection forests on important watersheds, and the planting of waste and barren areas with useful trees. Lectures are given by the superintendent of forestry before the students of the College of Agriculture. An examination was made during 1907 of the forest back of Hilo, Hawaii, which it was found necessary to preserve as a protection to a watershed. It has been demonstrated that rubber grows well in Hawaii, and a large area will be planted in rubber trees, which affords a good forest protection to the land. A Hawaiian corporation has agreed to

The editor was invited out to the Petard brothers' vineyard Thursday and filled the engagement although a part of the engagement filled him. There we found on the south-east slope of a decomposed granite hill about six acres planted to grapes. This soil, as they call it, although I saw nothing but granite produce the finest grapes grown in the world. The large red spheres called "tokay" grapes, because they grow on vines and taste like grapes, for in size and appearance they resemble a good sized red plum, hang from the short stubby vine, not in bunches but in clusters, weighing from two to six pounds each.

Auguste Petard gave the writer an empty box and sent him through the yard in search of grapes. Well, imagine a man who thought he had seen the finest vineyards on the coast walking between the rows of this yard where one bunch would equal about three of the best grapes he had ever seen and the grapes fully twice the size of those grown elsewhere on the coast.

The writer made the remark while visiting a grape patch in Vina, Cal., that he did not believe better grapes could be grown anywhere. Dear reader, I have changed my mind, and before anyone convince me that they have grapes the equal of those grown in this vicinity I must see them.

Eastern and California people will not believe this article. I don't blame them for not believing it. I was in the same frame of mind before I saw what Jacksonville really produced.

Fifty per cent of the people of this city do not know how our grapes compare with grapes grown elsewhere, because they never see the choice grapes in the local markets. The choice grapes are carefully packed in baskets and sold for fancy prices to those who are able to pay 15 and 20 cents a pound. If you have time any day this or next week call at this office and see some of the specimens brought in by people who have an interest in the welfare of the city. This collection of fruit is seen by people from all parts of the United States. One man from New York offered \$2.50 for a single bunch to send east.

These changes effective May 17, 1908.

furnish an American railroad with 500,000 ohia cross ties yearly for the next five years.

"The progress of forest work in Washington for the past year is especially marked by increased activity on the part of the State and owners of timber lands to protect the timber from fire; the inauguration of forest instruction at the university and at the agricultural college at Pullman; and the better appreciation by the people of the National Forest policy. The work of the deputy fire warden in the several counties of the State entirely prevented destructive timber fires. About one hundred forest rangers were appointed, usual at the request of mill men and timberland owners by whom they were employed. At a meeting of prominent lumbermen in Seattle a ranger service was organized for the fire season of 1908. This organization represents some 4,000,000 acres of timberland, and it is the plan to assess holdings at the rate of 1 cent an acre for fire protection. Other timber holders of the State are doing something in the same line. One company, for example, has a force of men in the field which is as effective as the State force."

CLUBBING OFFER

The Post has made arrangements to club with the Toledo Weekly Blade and the American Farmer.

This will be the last year that the Toledo Blade will club with other papers. The following is an extract from a letter received from the Blade: "The extraordinary advance in cost of print paper almost decided us not to make a clubbing offer at all this season, knowing the usual offer would net us a great loss, we finally concluded to make the old offer for this one season more."

Our offer:

Toledo Weekly Blade.....	\$1.00
Jacksonville Post.....	\$1.50
Total.....	\$2.50
Our price.....	\$1.75
Jacksonville Post.....	\$1.50
American Farmer.....	.40
Total.....	\$1.90
Our price.....	\$1.70
Jacksonville Post.....	\$1.50
Toledo Blade.....	\$1.00
American Farmer.....	.40
Total.....	\$2.90
Our Price.....	\$1.95

This offer may not last much longer. Renewals will count the same as new subscriptions and if your subscription is almost out, renew and get the benefit of this offer.

Ice Cream Delivered to all Parts of the City By The Boss

Why Colds are Dangerous.

Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgment. It is the same with all infectious diseases. Diphtheria scarlet fever measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by City Drug Store.

Timber Land Act, June 3, 1878.—

Notice For Publication.

United States Land Office, Roseburg, Oregon, April 13, 1908.

Notice is hereby given, That in com-

pliance with the provisions of the Act of Congress of June 3, 1878, entitled "An Act for the sale of timber Lands in the States of California, Oregon, Nevada, and Washington Territory," as extended to all Public Land States by act of August 4, 1892.

GEORGE B. MORGAN of Myrtle Point County of Coos State of Oregon filed in this office on August 22, 1907 his sworn statement No. 9635 for the purchase of the Northeast (NE 1/4) quarter of Section No. 26 in Township No. 40 South of Range No. 2 W., W. M., Ore., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before the Register and Receiver of this office, at Roseburg, Oregon, on Saturday the 24th day of October, 1908.

He names as witnesses: Eugene E. Morgan, of Gold Beach, Oregon, James W. Morgan, of Little Rock, Wash., Elsworth Morgan, of Gold Beach, Oregon, and Henry Nance, of Seattle, Washington. E. A. Morgan of Eugene Oregon, V. S. Morgan of Clifton Washington.

Any and all persons claiming adversely the above described lands are requested to file their claims in this office on or before said 24th day of October, 1908.
