At the bond election called for Aug. 17 all legal voters residing within the corporate limits of Jacksonville will be entitled to vote, regardless of any property qualification. When the charter amendments were prepared it was the intention of the trustees to insert a clause providing that all persons voting at a "bond" election must be owners of real estate within the city, but by some mistake (not the printer's) the clause was omitted from the amendments as published and voted upon, hence all electors who are otherwise qualified are entitled to vote at the coming bond election. The omission of the clause referred to was purely accidental and without intention on the part of anyone and while the result of the bond election would no doubt have been the same, the property owners would have been better satisfied if it had been embodied in the charter.

The estimated cost of the proposed water system as reported to the council is \$24,000. This includes well, pumping plant, excavating, piping, reservoir, etc., the estimate claims to show the approximate expenditure necessary to secure an abundant supply of good, pure water, pump it from the well to a reservoir of ample capacity, elevated 250 feet above the central part of the city, convey it by mains to and along the principal streets, ready for use and with a pressure of 75 lbs. The estimate also includes the installation of a number of hydrants on principal street corners for use of the fire department.

As to being made a suburb of Medford: "not any in ours, thank you". In many things it is to the interest of both towns to work together in harmony, whatever benefits the one, either directly or indirectly helps the other and the people of Jacksonville are ready and willing to assist in any legitimate project for the advancement and improvement of both towns, but prefer to maintain a separate corporate existence.

The Monday Tribune prophesies that Jacksonville will have better roads, better facilities for travel, etc. and will become the home of numbers of people engaged in business at Medford and states that the hills and slopes in this vicinity afford ideal sites for residences, etc. etc. All of which is substantially true, Jacksonville is the best location in the valley for a city of homes and with better roads and an adequate supply of pure mountain water will become one of the finest residential cities in Oregon.

STAND BY IT

It is not the site of a town, but its character that makes it a desirable place to live. A live prosperous town is a desirable one to live in, and a town may prosper and yet be small. Every citizen in a town, should be interested in its prosperity. One of the best ways to help a town is to speak well of it. It is true patriotism to stay by your own town, and interests that affect the town should affect every citizen.

Thousands of city people are now counting the hours when they can leave for some lake or river for an outing, where they can fight mosquitoes and bugs for a few days, and perhaps get drowned. It is a great thing and many of our ancestors lived and died not knowing what a vacation or outing meant.

The man who gets mad at what the newspapers say about him should return thanks three times a day because they did not tell all they knew about him.

The latest arrivals on our exchange table are the Medford Tribune and the Centralia (Wash.) Chronicle, both dailies.

How about the new state of Siskiyou?
