A Common Cold.

We claim that if catching cold could be avoided, some of the most dangerous and fatal diseases would never be heard of. A cold often forms a culture bed for germs of infectious diseases. Consumption, pneumonia diphtheria and scarlet fever, four of the most dangerous and fatal diseases, are of this class. The culture bed formed by the cold favors the development of the germs of these diseases, that would not find lodgment. There is little danger, however, of any of these diseases being contracted when a good expectorant cough medicine like Chamberlain's Cough Remedy is used. It cleans out these culture beds that favor the development of the germs of these diseases. That is why this remedy has proved so universally successful in pneumonia. It not only cures your cold quickly, but minimizes the risk of contracting these dangerous diseases. For sale by City Drug Store.

Attorney Fred W. Mears, lately from Iowa, who has located in Medford, paid this office a call Tuesday.

Mrs. A. E. Rose of Applegate was taken seriously ill Tuesday and at last report was not expected to live.

The Burrell orchard tract, consisting of 605 acres and located near Medford was sold Wednesday for \$500,000.

Won't Need a Crutch.

When Editor J. P. Sossman, of Cornetius, N. C., bruised his leg badly, it started an ugly sore. Many salves and ointments proved worthless. Then Bucklens Arnica Salve healed it throughly. Nothing is so prompt and sure for Ulcers, Boils Burns, Bruises, Cuts, Corns, Sores, Pimples, Eczema, and Piles. 25c a tube at all dealers For sale by City Drug Store.

J. W. Bailey, the father of our liveryman has returned to his home in Eugene after a short visit here.

The business will be managed and conducted by home people and should receive the encouragement and patronage of our citizens. Reserve your orders until the new shop is opened.

Sutherland's Eagle Eye Salve

Is the best eye remedy ever offered the public. It is a snow white ointment, painless, harmless and absolutely guaranteed to cure. At all dealers. 25c a tube. For sale by City Drug Store.

Baseball for 1910.

With the approaching season, local fans are looking about to note the standing of the great national sport in this vicinity, and what change Ashland stands to enter the Southern Oregon league. There is an abundance of good material here, and no good reason, except lack of sufficient local encouragement, why Ashland should not join forces with Grants Pass, Central Point, Medford and Jacksonville in attaining requisite standing. As to grounds, it is understood that the familiar railroad tract is available at a merely nominal rental. Of course, a grand stand is needed and the grounds ought to be fenced. This locality is easily accessible via Oak street, and with moderate expense the surroundings could be converted into an ideal base-ball park as well as a commanding situation for general athletic events. Steps are being taken to exploit this movement and all lovers of baseball and kindred sports will do well to lend it a boosting hand—Tidings.

Knowing the success attained by the Long Island railroad with its two experimental farms, which have been in operation about four years, Mr. McCrea suggested that a committee look into the matter of establishing an experimental farm on the peninsula, where the railroad could show the agricultural possibilities of the land. The committee's report was favorable, and the railroad bought the farm at Bacon.

According to the last census, there are 3,016,800 acres of land on the peninsula, of which 2,058,299 acres are under cultivation. There are 28,355 farms on the peninsula, and it has a total population of about 500,000. To induce more farmers to cultivate the 1,858,501 acres of idle land is one of the reasons for which the Pennsylvania railroad is to undertake the operation of the experimental farm. The co-operation of the farmers is already assured, and the state agricultural colleges, agricultural boards and horticultural societies are enthusiastic supporters of the project.

It is argued that points on the peninsula 100 miles south of Wilmington are, in point of transportation facilities, as close to the markets of Baltimore, Philadelphia, Wilmington and New York as the Long Island farms are to New York city. The railroad officials say it is possible for the farmers to get their products into the large markets in excellent condition. Deliveries are made in one day in central Maryland and Pennsylvania.

An immense market is enjoyed by farmers of Maryland and Delaware. It includes practically all of the country east of the Mississippi river, made possible by a preference freight train service that has created a wide demand for fruits and vegetables grown on the Delaware-Maryland-Virginia peninsula. This demand is greater now than can be met, and the railroad is taking steps to aid in increasing the number of farmers to supply it.

To develop its experiment station the railroad has appointed as superintendent H. S. Lippincott, a graduate of the Agricultural college at Cornell university. He has done practical farming at his home in Burlington county, N. J., and in North Carolina. Superintendent Lippincott has taken an interest in years in experimental work, and he intends to visit the granges and farmers' institutes on the peninsula, that he may become personally acquainted with the farmers from Wilmington to Cape Charles. He will be prepared to make addresses, visit farms and make exhibits of some of the products raised on the farm and thus demonstrate the interest which the railroad is taking.

Butcher and Playwright.

Chicago Meat Cutter is the Author of Fourteen Magyar Dramas.

Paul Berak, a Chicago butcher, varies the carving of meat with the writing of real plays. From 7 o'clock in the morning until 6 o'clock at night Berak attends to the wants of his customers of a meat market in Chicago.

"While at work in the market I plan the plots of my plays," he says.

For years Berak has been writing and planning the production of a drama that will make him famous. Thus far he has written fourteen plays in Magyar (he is a native of Budapest, Hungary), and two of them, "Delma" and "On Trial," he has translated into German.

Toy Airships For Christmas.

Among the Christmas toys coming from abroad are different types of airships—monoplanes, biplanes and balloons and dirigibles. The success of aviators in different parts of the world has made its impression on the toy-makers, who are ever anxious to keep abreast with the latest novelty in a form that appeals to the imagination of children. Each of the toy airships is operated by a propeller, some with two fans and some with four, to which energy is transmitted from an elastic hose running the length of the toy.

When She Rules Him.

"Skinphint's wife certainly has remarkable success in managing him. I wonder how she does it."

"When he undertakes to deny her anything she really wants she threatens to sue him for divorce."

"Does he care so much for her, then?"

"Oh, no, it's not that, but he figures that it is cheaper to let her have her own way than it would be to either defend the suit or pay alimony."—Chicago Post.

A Bad Start.

"A man always looks foolish when he proposes," said the frank young woman.

"Yes," answered Mr. Meekton, "and I have evidently failed to overcome the absurd impression I made on Henrietta on that occasion."—Washington Star.

Social Paradox.

"It's impossible for me to dress on \$5,000 a year."

"Well, my love, you must wear less."

"Don't be silly! You know perfectly well that the less I wear the more it costs."—Judge's Library.

Common sense is instinct, and enough of it is genius.—H. W. Shaw.

ROAD'S MODEL FARM.

Pennsylvania Line to Conduct One at Bacon, Del.

AN EXPERT PUT IN CHARGE.

In Addition to Showing Possibilities of the Soil, He Will Lecture at Granges and Farmers' Institutes—Immense Market Near.

In line with the endeavors of the railroads east and west to develop the resources of the territory lying along and near their rights of way is the establishment of a model farm by the Pennsylvania railroad at Bacon, near Seaford, Del., on the Delaware railroad. The company recently purchased there a farm of fifty acres and will conduct it as an experimental station for the benefit of the farmers of the Maryland-Delaware-Virginia peninsula. It is believed that by exploiting the advantages of that section there will be a marked increase in the number of those who desire to pursue the work of farming.

In the fall of 1908 James McCrea, president of the Pennsylvania, made a three days' trip over the railroad lines on the peninsula. He saw thousands of acres in one of the richest agricultural districts in the world idle, with adjoining farms flourishing and their products in great demand in all of the large markets of the middle and eastern states.

Success on Long Island Road.

Knowing the success attained by the Long Island railroad with its two experimental farms, which have been in operation about four years, Mr. McCrea suggested that a committee look into the matter of establishing an experimental farm on the peninsula, where the railroad could show the agricultural possibilities of the land. The committee's report was favorable, and the railroad bought the farm at Bacon.

According to the last census, there are 3,016,800 acres of land on the peninsula, of which 2,058,299 acres are under cultivation. There are 28,355 farms on the peninsula, and it has a total population of about 500,000. To induce more farmers to cultivate the 1,858,501 acres of idle land is one of the reasons for which the Pennsylvania railroad is to undertake the operation of the experimental farm. The co-operation of the farmers is already assured, and the state agricultural colleges, agricultural boards and horticultural societies are enthusiastic supporters of the project.

It is argued that points on the peninsula 100 miles south of Wilmington are, in point of transportation facilities, as close to the markets of Baltimore, Philadelphia, Wilmington and New York as the Long Island farms are to New York city. The railroad officials say it is possible for the farmers to get their products into the large markets in excellent condition. Deliveries are made in one day in central Maryland and Pennsylvania.

Each of the toy airships is operated by a propeller, some with two fans and some with four, to which energy is transmitted from an elastic hose running the length of the toy.

RESERVE HORSES FOR WAR.

Switzerland's Method of Preparing For Rapid Mobilization.

In Switzerland the state is part owner of horses used by reserves. It purchases a remount at three and a half years old, and the soldier pays half the cost of the horse to the government, together with the difference between its cost and the price that the horse fetches at auction, for all horses are sold by auction to the men.

After every year of training the government refunds one-tenth of the original half cost to the man, and at the end of ten years the horse becomes the absolute property of the soldier. In this manner the soldier is not only always well mounted, but as he keeps his horse with him at his home his mobilization problem is of the simplest nature.

The average price of these Swiss troop horses is about £45, says Bally's Magazine, and as most of these horses are imported from Ireland and north Germany their price is considerably higher than it would be in Great Britain. Thus the state secures the services of a horse for an annual outlay of about £4 10s. But there are certain other expenses which must be included in this estimate, such as the cost of the establishment for remount depots, etc., which raises the total cost of horses for the Swiss government to about £8 12s. a year.

ROADS IN CHINA.

They Are Narrow and Crooked and Edged With Ditches.

The Chinese road is private property, a strip taken from somebody's land. This is done much against the will of the owner, since he not only loses the use of it, but also still has to pay taxes on it.

One consequence is that it is wide enough for only one vehicle, and carts can pass one another only by trespassing on the cultivated land. To prevent this the farmers dig deep ditches by the roadside. As the surface wears away and the dust blows off it gradually grows lower, and after awhile it becomes a drain for the surrounding fields. A current forms in the rainy season, which still further hollows it out, and thus has arisen the proverb that a road a thousand years old becomes a river.

Those whose lands are used for roads naturally prefer to have the roads run along the edge of their farms instead of cutting across them, and this accounts for the fact that Chinese roads are often so crooked that one may have to go a considerable distance to reach a place that is in reality but a few miles away. This always interests the stranger.

Only Pursuing His Profession.

A Brooklyn magistrate recently had four dinkies who were caught in a gambling raid before him. The first of the lot to be brought to the bar was an undersized man, with a comical face as black as night. The dialogue between the magistrate and the prisoner created some merriment in the court.

"What is your name?" inquired the magistrate sternly.

"Mah name's Smiff," replied the dinky.

"What is your profession?"

"I's a locksmith by trade, sah."

"What were you doing when the police broke into the room last night?"

"Judge, I was pursuin' mah profession. I was makin' a bolt for the door."

"Officer," said the magistrate, with a merry twinkle in his eye, "lock Smith up."—New York Tribune.

The Art of Overlooking.

Nobody can live long in the world and not admit that the words "nothing for nothing" contain a sad amount of truth. He is of course a fool who does not count the cost so far as the future is concerned, but scarcely less a fool is he who does not overlook past costs. If we have any good or delightful thing in this life, at all hazards let us not taint our enjoyment by considering what we gave for it. Was it more than we could afford? Never mind. We have afforded it; we have made our purchase. Let us take off the ticket with the price and burn the receipt. There are items in life's ledger which must be overlooked unless we would spend all our days in balancing closed accounts.—London Spectator.

How She Rules Him.

"Skinphint's wife certainly has remarkable success in managing him. I wonder how she does it."

"When he undertakes to deny her anything she really wants she threatens to sue him for divorce."

"Does he care so much for her, then?"

"Oh, no, it's not that, but he figures that it is cheaper to let her have her own way than it would be to either defend the suit or pay alimony."—Chicago Post.

A Bad Start.

"A man always looks foolish when he proposes," said the frank young woman.

"Yes," answered Mr. Meekton, "and I have evidently failed to overcome the absurd impression I made on Henrietta on that occasion."—Washington Star.

Social Paradox.

"It's impossible for me to dress on \$5,000 a year."

"Well, my love, you must wear less."

"Don't be silly! You know perfectly well that the less I wear the more it costs."—Judge's Library.

Common sense is instinct, and enough of it is genius.—H. W. Shaw.

Mosquitoes Common to All Lands. Every climate is the mosquito's choice. In the remote tropics the explorer who disturbs for the first time with the prow of his adventurous canoe the surface of a winding river finds a cloud of microscopic spearmen waiting his arrival. In the great North woods, says a writer in the Technical World Magazine, the mosquitoes drive the deer into deep water, and the growl of their baffled buzzing about the bar of the sleeping woodsman is almost terrifying. The prospector, tolling under his pack in icebound Alaska, knows no respite from their stings.

All Skin Troubles

Are overcome by using Dr. Bell's Antiseptic Salve. It is as pleasant to use as pure cream and is guaranteed to give satisfaction. 25c a box. For sale by City Drug Store.

Troubles of Its Own.

High pitched, angry voices reverberated through the house. "I just knew," hoarsely muttered the skeleton in the family closet, "there was going to be a quarrel between them. I could feel it in my bones!"—Chicago Tribune.

Took All His Money.

Often all a man earns goes to doctor, or for medicines, to cure a Stomach, Liver or Kidney trouble that Dr. King's New Life Pills would quickly cure at slight cost. But Best for Dyspepsia, Indigestion, Bilioousness, Constipation, Jaundice, Malaria and Debility. 25c at City Drug Store.
