Womanly Wisdom.

Always put off till to-morrow what is wrong to be done to-day.
 Heat your knife before cutting hard soap.
 Wet a cloth with a bit of soda on it and clean up the grease spots on your kitchen floor.
 Jelly from berries picked wet is almost sure to mold, and doesn't jell right. Try to pick them dry.
 Put a few grains of rice in your salt shakers. They will break the lumps, gather the moisture and make the salt come out freely.
 Glue pieces of felt or pieces of old rubbers to the bottom of the chair legs, and there will be no scratched floors and less noise.
 An emergency glue may be made of rice. Boil a handful of rice in water until it is a thick fine paste. Very good for pasting white paper.
 In making cake with fruit in it, beef suet and butter, half and half, is better than all butter. I have known lard and beef suet to give good results.
 When a ham or smoked tongue has been boiled, try plunging it in cold water as soon as removed from the fire; this will make the skin come off easily and smoothly.
 A handy way to remove pies and cakes from a hot oven is to use a common shingle. Cut away the thick end into the shape of a handle. Bore a hole in it and keep the shingle hanging behind the stove.
 If you have some work to do in the sun and have no sunbonnet, take a piece of paper, pin it together behind, run a string over the top and through a slit at each side, and tie it under the chin. It may rattle a good deal but may save you a headache.
 String beans cut with a pair of sharp scissors, on a slant, instead of straight across, will cook more quickly if one happens to be pressed for time. This may seem a notion, but I have tried it often, and have found the beans to cook quicker than when broken straight across in the usual way.

D. O. LIVELY,

YOU CAN ORDER your COAL by TELEPHONE?

THE TELEPHONE is the coal man's best salesman.

Many of his customers he never sees, for their orders come by wire and their checks by mail.

If you move into a new house or have an unexpected need of fuel, you can often save a day's time by telephoning your order.

In the mining and shipping of coal, the Bell Telephone has become an important factor. The wholesale markets and sources of supply are kept in constant touch with the Bell Long Distance Service and the danger of a coal famine greatly reduced.
