The attorneys who have arranged themselves behind Beattie are planning to bring powerful influence to bear with the governor to secure a commutation of the death sentence or at least a postponement of the execution, which is set for November 24.

Paris, Nov. 14.—Edward W. Mix prominent American sportsman and aviator, committed suicide by leaping from a steamer in the English channel Sunday night, according to a communication from Calais; on the French seaboard, to the United States consul here today.

He won the James Gordon Bennett international balloon race from Germany two years ago, and had been chosen to represent the United States at the international aviation conference in Rome, November 25, next. Private advice received by friends here declare that undoubtedly the suicide and the balloonist are the same. —Journal

Acorns or Oaks.

Newspapers grow with a community and not in spite of it. Even the oak tree starts as an acorn. If you deprive the acorn of sustenance you'll never have an oak. If you don't give it the soil and water and sunshine it needs it will always remain an acorn. That is all right if you prefer acorns

A Vast Difference in Floor Finishes

It means economy—it means satisfaction—it means a beautiful, lasting finish on your floors, to know the difference before you buy.

Common varnishes are brittle and soon show unsightly scratches.

Elastica Floor Finish is so tough that nothing mars it. Heels, scraping chairs, casters, leave no marks.

Common varnishes turn white under water.

Elastica Floor Finish never does. It is water-proof.

Common varnishes and wax need constant care and refinishing.

Elastica Floor Finish keeps its original lustre. It outlasts any finish ever before offered. It saves work and saves expense.

We cannot overstate the importance of knowing the facts about floor finishes. Come in and ask us.
