

PORTLAND LETTER

Congress to Solve Cut-Over Lands Problem of Northwest.

Portland, Or., May 28 (Special)—A meeting of interest to the whole Pacific Northwest will be held in Portland next October when the Commercial Club and Realty Board will have a Logged-off Lands Congress. Committees are now at work arranging program and other details and when this is announced, it is expected it will include many experts who have dealt with this problem.

Best methods of ridding cut-over lands of stumps and at the same time making use of the turpentine and other by-products of the stumps themselves will be discussed by men who have made these subjects a special study. British Columbia, the Pacific Northwest states and California will participate. The Minister of Works of British Columbia will either attend in person or will send a representative.

Banks of the state continue to grow, reflecting the continued prosperity of all Oregon. According to the report of Will Wright, superintendent of banks, deposits have increased from \$114,339,465, on March 7, 1911, to \$127,126,997 on April of this year, a gain of \$12,787,532, or more than a million dollars a month during the year.

Land offices report a great deal of injury for vacant land in this state and it is expected that 1912 will be notable for the large areas of the Government domain to be taken by settlers. The change in the land laws, allowing a residence of three years on a homestead preliminary to making proof, which has passed both houses of Congress and waits only the signature of the President, is making public lands more attractive than ever before to the settler.

Portland people are discovering Oregon. During the past week an excursion was run into the Tillamook country that was an eye-opener to the 100 participants. Only a small part of the crowd had ever been to Tillamook before and they came back to Portland singing the praises of that favored section. As Portland people become better acquainted with the rest of the state and learn that everything they have come from this outside territory, it will be better for all concerned.

Russian Speltz, or Emmer, a grain that thrives on the steppes of Russia, is expected to find a congenial home in the dry-farmling country of Eastern Oregon. Umatilla County farmers are to introduce it experimentally this year. It resembles both oats and barley and requires but little moisture to make the crop. It has shown good results in North Dakota and will probably do well on light lands of the interior.

Commercial organizations will cooperate with state authorities to secure the passage of a stringent "Blue-Sky" law that is expected to curb wildcat real estate operators. They proposed measure will provide penalties for false statements in advertising.

MAP OF NORTH AMERICA

United States Geological Survey Issues New Map of Continent.

How many people would guess that the Atlantic end of the Panama Canal is on the west coast of Panama and that the Pacific end is on the east coast?

Look at the map and see how the east coast of the Isthmus became a west coast. Although there is nothing new in the publication of a map of the continent of North America, it is worthy of note that the United States Geological Survey has just issued a large map of North America, 28 by 38 inches, in three colors. This is probably the most accurate general map of its character that has yet been published and is particularly well adapted for school work. It is on a scale of 158 miles to 1 inch, which is sufficient to show in considerable detail the major geographic divisions, such as States and provinces. Colorado thus extends 2 1/2 inches east and west and Cuba 4 1/2 inches the longest way. The map is sold by the Director of the Geological Survey, Washington, D. C., at the nominal price of 20 cents a copy or at a discount of 40 per cent in case as many as 25 maps are ordered. This wholesale rate covers simply the cost of paper and printing.
