STORY OF A CHURCH.

Curious History of an Unfinished Edifice in England.

There is a curious history regarding an unfinished church which stands at Hassall, near Sandbach, England. A former resident at the local hall, a Mr. Lowndes, painfully conscious of the lack of provision for the spiritual wants of the people in the neighborhood, determined to build a church at his own expense. After carefully choosing a site he gave instructions for the erection of a structure in the modern style capable of seating 400 or 500 persons.

Work on it was begun in the summer of 1836 and was pushed on steadily until the day on which Queen Victoria was crowned, by which time the building was well advanced. The crypts, about ten in number, had been put in, the walls and roofs were complete, and the scantlings for the floor were fixed. Indeed, partly in consequence of the national rejoicings and partly to celebrate the progress which had been made, the building was smothered in flags and decorations and was the center of local festivities.

Next day Mr. Lowndes was seized with an illness which quickly proved fatal, and with his passing all work on the church ceased. Though the building could have been finished at comparatively small cost, it was abandoned, and it has not been used since, except by tourists, whose names "hallo and adorn it," as Mark Twain said of those on the ruins of Cain's altar, by the thousand.—Wide World Magazine.

LOOSE SHOES.

Those Not Fastened Tight at the Instep Cause Foot Trouble.

Seven persons out of ten suffer excruciating pain at one time or another with their feet. A single corn no larger than a grain of sand can take all the "snap" and vitality right out of you.

Two thirds of modern foot troubles are due to the fact that almost every one—man, woman and child—wears his shoe too loose. The shoe itself may be correct as to size and shape, but it is not fastened tight at the only point of control—namely, the instep.

When you set your foot upon the floor or pavement in the act of walking the shoe adheres, and if it be loosely fastened over the instep the foot pushes down into the toe of the shoe. At certain spots on the foot this slipping causes friction. These spots are the soles of the feet, the toes, ends and inner sides of the toes, the great and little toe joints and occasionally even the back of the heel.

When the friction thus caused is continued hour after hour and day after day one or more of these spots are almost sure to become inflamed and sore. A slight thickening, called a "callous," is formed. As the friction and pressure go on the resulting callous may thicken up unevenly; then it is called a "corn."—Woman's Home Companion.

Saving His Money.

Owens—Say, lend me a fiver, old man. Howens—If you'd save your own money you wouldn't have to borrow from your friends. Owens—But it's because I want to save my own money that I borrow from my friends.—Boston Transcript.

Adaptability.

Fashion thyself to the circumstances of thy lot. The men who fate hath made thy comrades here, love, and love them in sincerity and truth.—Marcus Aurelius.
