## DO YOU WANT A CANNERY?

At a meeting of the trustees of the Commercial Club held Tuesday afternoon, it was decided to open subscription books and solicit subscriptions to the capital stock of the "Jacksonville Conserving Co." a concern proposed to be organized for the purpose of establishing a factory for canning, evaporating and otherwise conserving the food products of this region.

Shares were placed at the par value of \$10.00 each and the total amount of capital stock will probably be \$5000.00 or more, if the subscriptions justify. Solicitors will be in the field in a few days and should meet with a ready response by the people of this city and surrounding country. A building suitable for the present needs of the concern can be secured at a nominal rental and the cannery will be a go if sufficient capital can be raised to justify the undertaking.

### Ashore at Mouth of Rogue.

Marshfield, Ore., May 22.—The Bandor life saving crew is speeding toward the mouth of the Rogue river in a power boat to give assistance to the crew of a sailing vessel reported to be in distress there. Telephone communication is out of commission and no details can be secured further than the report that a sailing boat had become distressed and that two could be seen clinging to the rigging.

The lifesavers will make a fast trip from the Coquille river and it is believed they will arrive in time to be of assistance.

Gathering at Wedderburn mariners are of the opinion that the boat is one which may have started from the Columbia river to engage in fishing.

Marshfield, Ore., May 23.—After clinging to the rigging of their sailboat which had capsized off the mouth of the Rogue River for ten hours, Winniger and Silver, the two men who manned the craft, were taken off by the Bandor lifesaving crew, according to word received here today.

The rescue was accomplished at six o'clock last night, but the news was delayed in reaching here on account of the prostration of telephonic communication.

The two men in a serious state of exhaustion, were taken to Port Orford. Wild rumors were in circulation here yesterday as to the identity of the craft in distress, it being reported that it was a large vessel which had attempted to make the mouth of the river after becoming disabled at sea.

## Espee Guarding Bridges.

Roseburg, Ore., May 20.—Receiving information from Eugene sometime ago to the effect that members of the Industrial Workers of the World were alleged to be planning to blow up a bridge on the Southern Pacific on May 19, the Southern Pacific officials maintained an armed guard at every railway bridge and trestle between Portland and Ashland last night and all engineers were instructed to run slowly over every bridge.

## Oregon Sidelights.

A stringent anti-masher ordinance has been introduced in the Albany council.

The band at Klamath Falls has been reorganized, with 20 members, and engagements are already being booked.

Aurora's annual barbecue, a festival that has done much to make the town famous, will be held this year on Saturday, June 23.

The Forest Grove News-Times says the school directors would be pleased to receive suggestions for a suitable name for the new Forest Grove school building, now under construction.

The following juvenile gardeners at Gervais have entered a popcorn contest: Charlotte Russel, Vernal, Inez and Myrtle Pickens, Eugene Catching, Catherine Hagenauer, Olene Cutsforth, Luke Shields, Mina, Marie, Ruth and Everett Smith.

The Baker county fair, according to the Democrat will be bigger and better than ever this year. The agricultural, horticultural and stock exhibits will excel those of former years and the racing will be the best ever. Horses off the circuit from Salem's state fair to Boise's intermountain fair will compete for the liberal prizes.

Stavton Mail: Salem has started something new in the organization of a commercial club that will include in its membership farmers and fruit-growers of the surrounding country as well as business men of the city. Probably no section of the state is in closer touch with its outside territory and such a move is of great benefit to both city and country.

Bastille accommodations at Eugene are unmercifully knocked by the Guard, which says: "Puzzling the erection of a new city hall, the police committee of the city council wants to erect a temporary building to accommodate the better class of city prisoners. The old jail is very filthy and to incarcerate the average man there means that his clothing becomes infested with vermin and that he is likely to contract diseases, notwithstanding all efforts to keep the place as clean as possible."—Journal.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its functions properly the whole system becomes deranged. ## PUZZLING ANCHOR ICE.

Its Formation Seems Contrary to the Laws of Nature.

Anchor ice is the popular name given in many parts of this country to the ice formed at the bottom of swiftly running streams. This ice usually forms about stones and logs where the current is disturbed. What gives it interest is the circumstance that its formation seems to be contrary to the laws that govern freezing water.

We know that in still water ice begins to form on the surface. We are told that in cooling down to 39 degrees F. water contracts and that its specific gravity increases so that the colder water will be at the bottom. But in cooling from 39 degrees down to 32 degrees the water expands, and the colder water will be at the top and freezing will begin there. If the surface is disturbed by wind or by current the crystals cannot attach themselves and ice does not form, though the water be cooled below the freezing point. It is in these circumstances that ice forms at the bottom. One of the puzzling features of this formation is that it forms where the lower currents seem most disturbed.

The watermen of various localities believe in the possibility of the water freezing at the bottom of a river, the surface remaining fluid. They assert that boat hooks, oar picks, etc., constantly come in contact with a coating of ice at the bottom and that large masses of ice are often seen rising to the surface with mud, weeds and stone adhering. Millers have asserted that the wheels of their water mills have become frozen to the bottom of the stream while the surface of the water was still unfrozen.—Harper's Weekly.

## DISCIPLINE IN GERMANY.

Even the Boys Respect Law and Order and Property Rights.

One of the things which apparently escape the attention of most scribbling travelers in Germany is the double line of fruit trees along the public roads. There are several thousand miles of these trees on either side of public roads in northern Germany. Most of them are apple trees. You know what would happen to those apple trees in any American state? Boys would pick the fruit green, too impatient to wait for it to ripen, and likely enough they would break down the trees getting the fruit. What happens in Germany? The public authorities sell the fruit crop to contractors at from \$200 to \$500 per acre and apply the proceeds of the sale to the upkeep of the roads. Boys do not steal the apples. Nor is it necessary to maintain a policeman every 100 feet to prevent such mischief.

Why are the German boys so much more respectful of property rights than American boys? Is the difference racial? I hardly think so. It's a difference of training probably. I'm inclined to believe the universal military training, with its constant strict insistence upon obedience to law and order and the strong element of moral training in the public school curriculum, added to the knowledge that offenses against public property will be promptly and severely punished, accounts for the safety of the public orchards which line the roadways of Germany.

Respect for the law and for other people's rights seems to be ingrained in the German character.—Frank Putnam in National Magazine.

**A Society Caution.**  
The strange melody of which New York society is composed led Frederick Townsend Martin to say at a luncheon: "Society, for all its diversities and contradictions, is uniform in one thing—and that one thing is a lack of culture." "A society woman, newly rich, as her limousine glided down Fifth avenue said to her daughter: "My dear, at the dinner dance last night you talked entirely too much about Ibsen and Bernard Shaw and Tolstoy." "Dear me! Why? the daughter asked. "Strangers," the mother explained, "will be apt to think you were once employed in a book shop."—New York Tribune.

**Flax as a Garden Plant.**  
He who has seen a German flax field waving its fine feathery green leaves, rippling like water in the light breeze and opening myriads of pale blue blossom eyes to the sun, may be glad to know that a flax bed is within the reach of every flower lover. Flax will grow almost everywhere. It should be closely sown in well worked ground and kept well watered.—Suburban Life.

**The Reason Why.**  
The information editor received this letter from a fresh youth: "Kindly tell me why a girl always closes her eyes when a fellow kisses her." The editor replied: "If you will send us your photograph we may be able to tell you the reason."—Ladies' Home Journal.
