VOL. IX.

JACKSONVILLE, JACKSON COUNTY, OREGON, JUNE 5, 1915

NO. 5

WITHYCOMBE FOR PEACE

Moderation Urged by Oregon's Governor in Dealing With Germany.

Salem, Or., May 31.—That moderation on the part of all will aid the government in solving the grave problems arising out of the relations of the United States with the nations at war, and will go far toward averting war, was the opinion expressed today by Governor Withycombe, in a message replying to a telegram received from the Washington Post. The executive's message reads:

"I agree with your views that public opinion, so far as possible, should remain calm at this crisis. Moderation on the part of all of us will assist the government in its task of working out, dispassionately, the grave problems arising from our relations with the nations at war, and will go far toward averting the possibility of a conflict, which, at best, is a calamity.

"On the other hand, it seems to me unwise to shut our eyes to conditions as they actually exist and to pretend that there is no need to prepare for possible eventualities. Unfortunately as it is, candid truth compels us to realize that there is real danger in fostering overmuch national sentimentality. I do not favor anything even approaching militarism, but I do sincerely believe that we should comprehend the inadequateness of our ability for national defense. Peace is desirable almost above all else, but there are prices which the United States must never willingly pay for peace."

Brewery Will Preserve Fruits

Salem, Or., May 31.—Articles of incorporation will be filed with Commissioner of Corporation Schulerman tomorrow by the Northwest Fruit Product Co., and this will mark the passing of the Salem Brewery Association, which has been engaged in business here for years. The plant and property of the brewery association will be taken over by the new corporation, and it will engage in the general fruit preservation business, specializing in loganberry juice.

The company will also engage in cold storage business. Its capitalization is \$75,000, and the incorporators are Kola Neis, Frank T. Schmidt and Frank G. Deckebach. Considerable money has already been expended in adjusting the plant and equipment for the new enterprise.

WILSON ASKS FOR UNITY

President at Memorial Day Exercises at Arlington Draws Lesson From Rebellion.

Washington, May 31.—President Wilson roused a large audience at Memorial day exercises at Arlington National cemetery to a high pitch of enthusiasm today by applying lessons of the Civil war to present day problems. He said the solemn lesson of the war was that the unity of the United States be exemplified in the actions of its people.

"Let us think of our duty and the actions that lie before us," said the president.

The president avoided any direct reference to the present international crisis. When he arose to speak, the entire crowd stood up and clapped for several minutes. Just before the president's address, Bishop Cranston, of Washington, prayed that the president be given divine guidance in the "most delicate crisis in the history of the world," and John McElroy, of the Department of the Potomac, Grand Army of the Republic, said the president could be trusted to guide the country at the present time.

A War of Artillery

The present struggle in Europe is a war of artillery; to the which can produce a preponderance of artillery and an excess of ammunition supplies the victory will belong, other things being equal. Only those who are present on the battlefields of Europe can form any adequate idea of the enormous expenditure of ammunition, and particularly of ammunition for field guns and howitzers, which is taking place. In the House of Commons, the Chancellor of the Exchequer recently stated that during the battle of Neuve Chapelle as much ammunition was expended as was used during the entire Boer war, which latter lasted for two years and nine months. The Neuve Chapelle battle front covered only a few miles, whereas the whole fighting front in all the theatres of the present war must total fully 1,500 miles.—Scientific American

FOR RENT—The Norling house, on Oregon street. Apply to D. W. Bagshaw, this office.

FIRST JUNE WEDDING

Former Resident Weds Jacksonville Lady. Happy Couple Leave For East After Ceremony.

The first June Wedding in Jacksonville, this year, was celebrated Tuesday at 1:30 when G. Ries Chapman of Springfield, Iowa, and Miss Fleta Ulrich were united at the Hymeneal altar.

The ceremony was performed by Rev. P. S. Bandy of the Presbyterian church, at the home of the bride's parents on Third street, in presence of relatives of the bride and invited guests.

The happy couple were taken to Medford by auto after the ceremony and boarded the afternoon train for San Francisco, where they will visit the Exposition for a few days and then proceed to Springfield, Iowa, where they will make their home.

The bride is the youngest daughter of Mr. and Mrs. Chris Ulrich of this city and is a native daughter of Jacksonville. The groom was a resident of this place for a number of years but has lived in the east for the past year, both bride and groom were popular among the younger set and have a host of friends who join the Post in wishing them a happy voyage on the matrimonial sea with a safe anchorage at the end.

Cannot Amend Indictment's

Salem, Or., June 1.—Holding that under the constitution an indictment can be amended by a district attorney only as to form and not as to substance the Oregon supreme court today reversed the state circuit court of Malheur county in the case of the State vs. George F. Moyer, appellant convicted of arson.

In the original indictment the district attorney failed to insert the name of the owner of the building burned, and the court sustained a demurrer to it. The district attorney was allowed to amend the indictment, but the supreme court held this to be an error as the amendment affected matters of substance.

Nearsighted Customer—Aren't you making your rolls a little larger these days, Mr. Bachman? Baker—Huh! R-r-olls—them's loaves!—New York World.

PORTLAND LETTER

Portland to Have Branch of National Bureau. Low Fares to Rose Festival. New Bank at Yoncalla.

Portland, Ore., June 1. (Special)—The Bureau of Foreign and Domestic Commerce, of the United States Department of Commerce, at Washington D. C. has sent a representative to Portland who will endeavor to establish a branch bureau in this city for the purpose of aiding shippers and importers in securing a profitable foreign market for all Oregon products and also to advise them where goods of foreign nations may be secured to the best advantage. This branch bureau will be of immense benefit to all producers of grain, lumber, livestock, wool and fruit.

As instances of the activities of the Bureau of Foreign and Domestic Commerce, and which are of particular interest to the people of the Willamette Valley, the following are cited: An agent in Brazil has advised the Bureau that he desires to represent American manufacturers of preserved, canned and dried fruits, jams, jellies and canned vegetables. A business firm in Switzerland desires to purchase large quantities of canned fruits, for cash. Detailed information regarding these and similar trade opportunities may be obtained by addressing the Bureau at Washington.

At a recent meeting of the members Council the Portland Chamber of Commerce went on record as favoring the fullest application of the Ringham bill, which allows a 5% preferential in favor of Oregon-made goods of all kinds when required for municipal, county or state purposes. Unfortunately, the charter of the City of Portland requires that goods be purchased from the lowest bidder, regardless of the source of the goods, so that, until the charter is changed by vote of the people, that city will be unable to comply with the provisions of the bill.

In order to encourage a large attendance at the Portland Rose Festival June 9, 10 and 11, the railroads centering in that city have announced round trip rates of one and one-third times single fares for the entire week. This will apply to all territory within approximately 200 miles from Portland.

On June 1 a new bank opens at Yoncalla with capital stock of \$15,000. This takes the place of the former State Bank of that city which recently closed its doors on recommendation of the state bank examiner.

The dates for the annual Multnomah County Fair, at Gresham, have been set for September 14th to 19th inclusive.

The Cherry Fair which has been a notable annual event at Salem for a number of years is to be omitted this season.

Douglas County expects to ship not less than 150 cars of prunes this season, as against 90 cars shipped last year.

An Electrical Umpire

A device for electrically registering balls and strikes, and making no mistakes, has been invented by a Los Angeles baseball enthusiast which has received the endorsement of Western fans and players. It is not used in the game, however, but in practice, or as an amusement device, and it is very popular for both purposes.

The construction is very simple, consisting of a heavy wooden backstop, eight feet by eight, which is surrounded by a netting to catch wild balls. It stands at the end of a sixty-five foot alley, the distance from which the ball is thrown on the field. The surface is painted with a dark background, on which are represented a catcher, a right hand and a left hand batter, thus affording practice for either variety. A curtain covers the one not supposed to be up.

The registering device is a panel 17 inches wide and three feet four inches high, which occupies the space exactly above the plate and covers the range between the knees and shoulder of the average man. The panel is not outlined or in any other way made conspicuous, but the eye of the pitcher is supposed to pick out this invisible field just as in a real game. If he throws the ball a fraction of an inch outside this panel, there is no sound but the thud of the ball, but if he hits it, an electrical buzzer records a strike. The ball is automatically to the player after each throw.—Scientific American

Fountain of Energy When President Wilson Opened the Panama-Pacific Exposition

THE Fountain of Energy when the water was released by President Wilson pressing a button at Washington on the opening day of the Panama-Pacific International Exposition at San Francisco. This fountain is the work of A. Farling Calder and is between the Tower of Jewels and the main entrance at Second street.

INDUSTRIAL REVIEW

Manufactures, Enterprises and Improvements Providing Payrolls and Promoting Development of Oregon

Salem hospital association will erect \$25,000 hospital.

The Dalles—June 3 county court opens bid on \$20,000 highway work.

The Moser cherry crop has been sold at \$90 per ton.

Pendleton orders four additional streets paved with gravel bitulithic.

North Bend orders Virginia Avenue improved to cost \$11,000.

Mutual Insurance Companies should be required to publish quarterly statements.

Baker—Eagle River power plant completed to operate Virtue mine.

Eugene factory promotion committee considering manufacture of boilers.

Coal is being mined in quantities near Toledo, Lincoln county.

Winchester Bay is a new townsite near Gardiner.

Albany—J. P. Wallace putting in foundation for brick block.

East Portland has \$1,500,000 buildings under way.

Milwaukie will expend \$40,000 on municipal water plant.

Lebanon—Cornerstone Catholic church laid at McDowell creek.

Seaside—five districts here voted to establish a union high school.

The Dalles business men planning to secure municipal dock.

Cottage Grove—Ore stamp mills in Bohemia mines make record run.

Manufacture of ink established at Salem.

Commonwealth conference at State University gave great prominence to Pinchot conservation policies.

Labor leaders favor state printing common grade school text books.

Suit of workman injured on logging train for \$2500 damages dismissed by Judge McGinn, as man got \$84 benefit under industrial compensation act.

The new state insane asylum building at Pendleton is to have a cornerstone of Oregon granite. The rest is probably imported.

Resolution was adopted by parents of Monmouth Normal School that new \$50,000 training school building be built and equipped of Oregon material and manufactures, and the trimmings be of Oregon stock.

Salem school board refuses demand of central labor council that only union labor be employed in erecting new school buildings.

Portland—East Alder, Water, Clay and other streets to be paved.

Rainier—H. C. Mowrey has purchased plant here and will be known as Mowrey Lumber & Timber Co. Planing mill being installed, dock facilities improved, sheds being extended, and

plant to operate soon.

Wheeler-Bailey saw mill plant begins operations this week, cutting 50,000 feet a day.

Fossil—L. A. Johnson will erect a stone or brick store building.

Beaverton—L. L. Gilbert will erect two story brick building 40x100 ft.

Salem—Snook & Traver awarded contract McKirley school at \$20,128 on open shop basis. Building Trades Council demanded that board accept higher bid and employ only union labor.

Eugene—Oregon Power Co. employing 25 men laying gas mains. \$40,000 city hall bonds sold at premium.

Panoramic View of Mount Rainier National Park.

A panoramic view of Mount Rainier National Park, showing the characteristic features of the landscape, has just been issued by direction of Secretary Lane. This panorama shows in a striking manner the great central ice mass and the ridges that surround it. Ten colors were used in the printing, the ice being shown in light blue, the meadows and valleys in light green, the streams and lakes in blue, the cliffs and ridges in combinations of colors, and the roads in light brown. The lettering is printed in light brown, which is easily read on close inspection, but which merges into basic colors when the sheet is held at some distance. This view, which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 25 cents, measures 19 by 29 inches, and is on the scale of 1 mile to the inch. It is based on accurate surveys and gives an excellent idea of the configuration of the surface as it would appear to a person moving over it in an aeroplane.

Reducing Chick Mortality

Oregon Agricultural College, Corvallis, May 31.—The science of bacteriology has come to the aid of the chicken raiser. The destructive diseases, white diarrhoea, is caused by bacteria and some valuable work has been done on this disease by Mr. G. D. Horton of the Bacteriological Department of the College. Mr. Horton identified this disease last year in the flock at the State Hospital, Salem. Serious losses had previously occurred there in the raising of chicks. The source of the disease was found to be in the breeding hens, the infection being transmitted through the egg to the chicks. That the disease came from the breeding stock has been corroborated in a striking manner. The Poultry Department of the College is doing some cooperative breeding work at the State Hospital and furnished the Institution 200 pullets last fall from which stock there has been produced over 300 chicks. The losses from all causes has not exceeded two per cent, while if the chicks hatched from eggs laid by the old stock in which the white diarrhoea had been found, the loss was over fifty per cent.

ONE WEEK ONLY
JUNE 7th to 12th, 1915

FOLGER'S TEA SALE

THIS COUPON IS GOOD FOR MONEY IF PRESENTED AT GROCERS
June 7th to 12th, 1915.
