POSTERITY TO PAY DEBT

Europe Faces Bankruptcy Unless Wisdom Comes To Councils

London, July 19.—England, Lord Lur-born asserted, was casting the whole cost of the war on posterity. This he characterized as bad policy which was a disgrace to the present generation, and he said the government was to blame in not at once imposing additional taxation and was pursuing precisely the same policy now.

Lord Lurborn wound up the debate by saying that the figures Lord Middleton gave related to the most wealthy, the most powerful and the most enduring of all the nations engaged in the war. The situation amounted to this, that if wisdom did not come to the councils of Europe, there was a prospect of European bankruptcy in a comparatively short time.

Apportionment of Fund For Schools in August.

Salem, Or., July 21.—Because of the increase in school population in the state and the lack of a proportional increase from the school fund, the basis of apportionment will be lower this year, among the 35 counties, than last year, according to Deputy State Treasurer Ryan. The distribution of the interest will be made August 2, and though the exact basis cannot be determined until the latter part of the month, it is estimated that it will be \$1.81 for each child this year, as compared with \$1.85 for last year.

Uninformed

"What were the seven wonders of the world?"

"I dunno," answered Mr. Rufek. "I never could remember much about what I saw in a dime museum or a side show."

The Difference.

Horman Fransch, chief chemist of the Standard Oil company, who died worth \$5,000,000, made many millions for his employers by his utilization of waste.

In an interview in New York, discussing the discovery that turned coal tar from a waste to a highly valuable byproduct, Mr. Fransch once said to a reporter:

"That one little change, that little chemical change, did it all. There is never more than a tiny difference, you know, between a waste and a byproduct, between wealth and poverty, between success and failure.

"Look, for example, into some great business office. Here is a haggard man in his shirt sleeves on a high stool working for dear life—he checks the cash. Then, in a little glass office all by himself, look at that other frock coated man leaning back in a tufted green leather armchair, smoking a cigar and reading the paper—he cashes the checks."—Boston Record.

Eating Asparagus.

Mr. G. K. Chesterton does not like the modern way of eating asparagus. "Excluding cannibalism," he writes, "and the habit of eating sand about which I can offer no opinion, there is really nothing one can eat which is less fit to be eaten with the fingers than asparagus. It is long; it is greasy; it is loose and liable to every sort of soft yet sudden catastrophe; it is always eaten with some sort of oily sauce, and its nice conduct would involve the powers of a professional juggler, combined with some practice in climbing the greasy pole. Most things could easily be eaten with one's fingers. Only this one thresome, topping vegetable I eat between my finger and thumb. I should be better off as a giraffe eating the top of a palm tree. It doesn't want any holding up."—London Chronicle.

Lots of Vowels.

In the Hawaiian language every word ends in a vowel. A Hawaiian finds it almost impossible to pronounce two consonants together, and in English he has the greatest difficulty in pronouncing any word ending with a consonant. Mr. Hale in his Polynesian grammar says: "In all the Polynesian dialects every syllable must terminate in a vowel, and two consonants are never heard without a vowel between them. It is chiefly to this peculiarity that the softness of these languages is to be attributed. The longest syllables have only three letters, and many syllables consist of a single vowel." Again, no syllable, as a general rule, in the Bantu family of African speech can end in a consonant, but only in vowels.

Protected.

Grubbs—I hear that old Skinem has given the committee his views on the proposed new charter.

Stubbs—That must be a mistake. Skinem never gave anybody anything. If the committee had his views he has the committee's note providing for the return of the views with something more than legal interest.—Richmond Times-Dispatch.

An Element of Difficulty.

"What is the hardest part of your work as a lecturer?" asked the man designated as toastmaster.

"As a rule," replied Mr. Speckins, "the hardest part of my work is waking the audience up after the man who introduces me has concluded his remarks."—Washington Star.

No Postmortem Touch.

"Loan me \$5 until Thursday, old man. If I live till then I'll surely pay you."

"All right. But if you succumb don't send anybody around to touch me for the funeral expenses."—Seattle Post-Intelligencer.

Positive and Comparative.

In the lobby of a Cincinnati hotel, during an educational convention, one school man approached another and, by way of introducing himself, said: "I'm Beck."

"That's good," replied the man addressed, taking the proffered hand. "I'm more so."

"You're what?" asked the first speaker.

"I say I'm more so," repeated the second.

"What do you mean by that?"

"Why, you say you are Beck."

"Yes, I am. My name is Beck."

"Well, my name is Becker."—Youth's Companion.

Like Son Was Father.

All through the long sermon little Johnny had been restless, and his mother had to keep pinching him in order to keep him in anything like order. Still his fidgeting continued.

"Can't you do something with that boy?" whispered the wife to her husband.

"Yes," said the husband. "I second his motion to adjourn."—St. Louis Post-Dispatch.

A Subtle Mexican Drug.
