A newspaper is in no sense a child of charity. It earns twice over every dollar it receives and it is second to no enterprise in contributing to the upbuilding of a community. Its patrons reap far more benefits from its pages than its publishers, and in calling for the support of the community it asks for no more than it is entitled to, but generally receives less. Mines Gold In Chicken Run Band His Urae. Bunton, Or., Feb. 23—Charles Thompson is mining for gold in the back yard of his home in South Bunton, following the finding of three gold nuggets in the craw of a chicken he cleaned for the family's Sunday dinner. The largest of the three nuggets was about the size of the head of a hatpin and search of the yard in which the chickens had been feeding uncovered two more nearly as large. Former Mistress—I would like to give you a good recommendation, Delia, but my conscience compels me to state that you never got the meals on time. I wonder how I can put it in a nice sort of way. Delia—Yez might just say that Oi got the meals the same as Oi got me p. y.—Puck. Premonitory Juror—S you didn't propose to her, after all? Weed—No. And I'm not going to. It's none of our business, of course, and we don't mean to butt in, but isn't it about time a little talk was beginning to trick 'em about the old town's baseball prospects next season? Geographical Forenames. The name "Dardanelles," which one girl baby bears, is more musical than some geographical names with which children are burdened. Mrs. Andrew Lang tells of a family where the babies were named after the places where the father happened to be when he heard of their births. He being a courier, there were a St. Petersburg and a Naples, Kattagat and Skagerrak were the twins, while the only daughter was named Vienna. Another curious geographical name is recorded in the "Souvenirs du Chevalier de Cussy." In 1820, when attached to the French embassy at Berlin, he met a Countess Bernstorff, who had been christened America because she was born there during the war of independence, her father at that time being in command of a Hessian regiment.—Fall Mail Gazette. Men Who Wear Feathers. Among the strange tribes of men about whom little is known are the Chamacoos of the region about the upper Paraguay river. Although the Chamacoos wear but little clothing, they excel in the art of making personal adornments from the feathers of birds. Their country abounds with birds of the most beautiful plumage, including parrots, toucans and trogons, whose feathers are dazzling in color; rheas with gray plumes, musk ducks of a glossy black color, egrets with feathers of pure white and spoonbills of a delicate pink. All this wealth of color and graceful plumage is combined by the Chamacoos in a most artistic manner. Some of these savages walk their forest glades in colors more brilliant, if less ample, than any woman's dressmaker could produce.—Washington Star. Perils of Tropical Waters. Raising a vessel submerged in tropical waters is dangerous business, according to an account in Shipping Illustrated of the salvage of a gunboat that had been sunk in the harbor of Progreso, Yucatan. The sailors were in constant danger owing to the attacks of "venomous fishes, some of which are more ferocious than sharks and far more determined in their methods of attacking human prey." Valley of the Jordan. The valley of the Jordan constitutes the deepest depression on the face of the earth, the sea of Galilee itself being over 700 feet below the level of the Mediterranean, while the Dead sea is over 1,300 feet below the level of all the oceans of the world. The Distinction. "Pa," asked Willie, "what's the difference between an invalid and a sick person?" "An invalid, my son," answered pa, "has money."—Judge.
