Insect Sits on Its Eggs.

Family matters in the case of insects usually mean only the depositing of eggs in suitable situations for the independent development of the offspring. The parent insects often dying before the young appear. The earwig, however, provides a remarkable exception to the general rule, for it sits upon its fifty or more eggs until they are hatched. Just as a bird would do, and, moreover, if the eggs get scattered it carefully collects them together again. In the early months of the year, when digging the soil, female earwigs may frequently be found together with their batch of eggs. At the slightest sign of danger the young ones huddle close to their mother, hilling beneath her body so far as it will cover so large a family.—Straud Magazine.

MELLOW-SWEET IS TASTE OF "SPEAR HEAD"

Most Richly-Flavored Chew That Was Ever Pressed Into Plugs

FAVORITE FOR A GENERATION

Red-blooded men with real tobacco hunger find that they can satisfy it only by chewing, and the most wholesome and satisfying tobacco to chew is that made in plug form.

The limit of luxury in tobacco chewing is the rich, sweet, juicy flavor that trickles through your system when you chew Spear Head.

No other chewing tobacco is so mellow, so luscious and so satisfying. No other equals Spear Head for putting a keen edge on your appetite.

Spear Head is made of the world's best tobacco leaf—the choicest of red Kentucky Burley. This leaf is selected for its full, juicy richness with the most painstaking care. It is stemmed by hand, is pressed into Spear Head plugs so slowly that not a drop of the rich, natural juice escapes.

Your first chew of Spear Head will open your eyes to the genuine enjoyment there is in chewing.

Chew the rich and mellow tobacco that has been the favorite for a third of a century—that's Spear Head. In 10c cuts, wrapped in wax paper.
