Practical Health Hint. Cancer Precautions. A writer in a medical journal mentions, among the kind of things on the skin which must be observed for cancer, all moles and warts which grow in size; all moles which change their color and grow dark brown or black; all sealing warts, especially on the lips, the ears, the eyelids, the cheeks or the hands. He further states that "perhaps the most frequent excitant of all, so far as skin cancer is concerned, is dandruff. It falls from the scalp and lights on the ear, eyelids, nose, neck, lips and face, and if there is already a sealing spot or a thickening or a wart, a mole or a gland ready to receive the dandruff scale it sets this spot alive with activity, and it goes on to form a skin cancer. Probably 80 per cent of skin cancers are due to this cause, and many a cancer has been prevented and may be prevented by curing the dandruff or by preventing it."

AS GOOD AS A CHEW OF "SPEAR HEAD" That Means the Supreme Degree of Rich, Luscious Tobacco Flavor NO OTHER CHEW EQUALS IT Nature varies the flavor she puts into the different grades of tobacco leaf—and the best of all is the flavor of choice red Burley that pleases you so mightily when you chew Spear Head. The delicious fruity flavor of a chew of Spear Head is a revelation to the man who has never chewed or who has been chewing near-good tobacco. For chewing is the one way to get all the wholesome, healthful, appetizing flavor of the tobacco leaf—providing you chew a high-grade plug like Spear Head. No other tobacco can compare with Spear Head in the wholesome satisfaction it gives. You get more savory sweetness in a chew of Spear Head than in a whole plug of ordinary tobacco. And you get it in its purest form—for Spear Head is made amid the most wholesome surroundings, in a great, new factory that's kept absolutely clean and sanitary. Try this rich, mellow, satisfying, pure chew. Such a chew cannot be obtained in any other tobacco than Spear Head. In 10c cuts, wrapped in wax paper.
