References are made in some current literature to the "horns of Venus" from which it is concluded by some that in the clear air of Mesopotamia the crescent form of the planet was detected in early times without optical aid. Since Venus, when at a sufficient angular distance from the sun not to be lost in the glare of the latter, is hardly more than half a minute of arc in diameter at the utmost, such an observation seems quite out of the question, and Professor Campbell thinks the allusion to the horns was merely a lucky guess on the part of the ancient astronomers.

F. M. Calkins, Judge of the First Judicial District of Oregon, within which you shall be required to so appear herein, and you, and each of you, are hereby notified that if you fail to appear and answer said complaint or otherwise plead thereto within said time, plaintiff will apply to the Court for the relief prayed for in his said complaint as follows, to-wit:

The Horns of Venus.

References are made in some current literature to the "horns of Venus" from which it is concluded by some that in the clear air of Mesopotamia the crescent form of the planet was detected in early times without optical aid. Since Venus, when at a sufficient angular distance from the sun not to be lost in the glare of the latter, is hardly more than half a minute of arc in diameter at the utmost, such an observation seems quite out of the question, and Professor Campbell thinks the allusion to the horns was merely a lucky guess on the part of the ancient astronomers.

PRACTICAL HEALTH HINT.

Care of Children's Eyes. It is especially important that parents should appreciate the need of proper care of the eyes of the newborn baby and the urgent necessity of consulting a competent physician as soon as anything wrong with the baby's eyes is noticed, especially if there is a discharge from them. Many cases of blindness result from the disease known as ophthalmia neonatorum, or the eye disease of newborn babies, which could have been prevented had simple preventive measures been used or which could have been cured if treated in time by the doctor. Children with "cross eye" or with a "cast in the eye," as cross eye is sometimes called, should be taken to a competent eye physician as soon as the defect is noticed and long before the child has reached school age. Neglect of cross eye may result in blindness or defective sight in one or other of the child's eyes from misuse or improper use of the eyes, even in very young children.
