Bird Builds Several Nests.

Some birds get very nervous and become much excited if you approach their nests and among them is the black-throated green warbler, says the American Forestry association of Washington, which is conducting the national bird-house building contest for school children. Another thing about this bird is that it frequently builds several nests. Whether this is because it changed its mind after building the first one and decided to select a better location or with the deliberate purpose of deceiving any intruders who might come along is not known. The bird is very beautifully colored, the top of its head and the region nearly down to the shoulders being a yellow green, the back olive green, the throat and breast jet black and the under parts white with some yellow in them at times.

SPECIALISTS IN HUMAN ILLS

Some More or Less Sage Reflections on the Subject of Diseases and Their Treatment.

Dentists now cure rheumatism, dyspepsia, kidney troubles, sore eyes and corns by pulling, filling or otherwise mistreating the teeth. Stomach specialists relieve toothache by treating the digestion. Headaches have nothing to do with the head, except to make it hurt; the seat of their operations is in the stomach or liver. The whole body seems to be merely a system of interlocking directorates, the Philadelphia Ledger comments.

Why, then, one is inclined to ask, do we have specialists? If the functions of the body, instead of being a system of such complete entanglements and inter-relations from head to foot, were neatly divided up into watertight compartments, then specialistic treatment would indeed be indicated. In that case each specialist would have his own compartment to look after, with a sign upon the membrane which marks the entrance to his domain, "Trespassers will be prosecuted." But what are you going to do with a body in which nephritis is directly caused by an ulcerated tooth which the dentist hasn't discovered, and the legs swell up and become useless because there is an unlocated intestinal kink? It would really seem that before a man is fitted to operate as a specialist on any part of the body he must have specialized a while over every other part of it—so that the East side doctor's sign, "Specialist in All Diseases," need not be regarded as so absurd after all. The first qualification of a good specialist is to be an all-around physician.

But at present the dentist has the advantage over all other specialists. Give him a chance to pull out every tooth in your head and you will be delivered forever from Bright's disease, rheumatism, pleurisy, liver complaint, neuritis, pyelitis, and virtually every other kind of disease. But what will the dentist do when he has drawn everybody's teeth?

MUCH DEPENDS ON ONESELF

Good Hard Sense as Applied to Ancient Superstitions Concerning "Blue Monday."

I would find to find a most entertaining old book in the free library—a dictionary of superstitions. It has three big volumes, all crammed with the fears and beliefs of the human race. Just to sample some of them that apply to Monday, here are a few:
"If things commence to go wrong on Monday they will go wrong all the week, but if you have good luck on Monday you will keep it up."
"Put no bills on Monday if you can help it."
(This is congenial advice and easily followed.)
"If you meet a cross-eyed person on Monday you will not have good luck till Thursday."
"If the sun sets clear Friday night it will rain before Monday night."
"It is a bad sign to lose a tooth on Monday."
(Yes, or a hand or a leg either, I should say.)
"If you lose your temper three times on Monday you will have a great family quarrel."
(This bit of sagacity has an excellent chance of being true, one would think. Still, there may be some men who could get away with three blow-outs and have no comeback.)
To add our own observation to the collected wisdom of the ages your Monday is neither more or less than what you choose to make it when you are out of bed in the morning. You
