Vain Pursuit.

"So Nibltiz is dead?" "Yes." "Did he leave any property?" "Nothing to speak of. Nibltiz was the kind of man who had an idea that fortune was always just around the corner." "But he never succeeded in overtaking her?" "No. He has either mistaken in the location of the corner or he lingered in the middle of the block until fortune moved on to some other corner."—Birmingham Age-Herald.

Symptoms of Death.

The usual procedure at the front to determine whether death has occurred is to inject fluorescein, according to the method of Dr. S. Icard of Marseilles. In the living the eyes will take a vivid green color as though an emerald had been set in the socket. If no coloration is observed within an hour or two after injection, it may be stated positively that the person is dead.

LEAGUE FULFILLS AMERICAN IDEAL

Herbert Hoover Says Democracies Replaced Autocracies at Our Bidding.

FOOD ADMINISTRATION CHIEF.

Urges Ratification on Ground That Peace Treaty Will Collapse Without League of Nations.

Herbert Hoover is so deeply concerned over the opposition to the League of Nations in the United States that he has let himself be interviewed at length on the League situation. In a talk with the New York Times correspondent in Paris, the Food Administration Chief asserts that having caused the League idea to prevail America cannot abandon it. We cannot withdraw, he says, and leave Europe to chaos. "To abandon the League Covenant now means that the treaty itself will collapse."

Mr. Hoover's wide acquaintance with conditions both here and abroad, his reputation as an administrator, a man of great affairs who deals with facts, not theories, make his statement one of the most important contributions to the recent League discussions.

"There are one or two points in connection with the present treaty," said Mr. Hoover, "that need careful consideration by the American public. We need to digest the fact that we have for a century and a half been advocating democracy not only as a remedy for the internal ills of all society, but also as the only real safeguard against war. We have believed and proclaimed, in season and out, that a world in which there was a free expression and enforcement of the will of the majority was the real basis of government, was essential for the advancement of civilization, and that we have proved its enormous human benefits in our country."

The New Puritan.

The new puritan is instructed in cleanliness, believes in it, practices it. As a good animal guided by an enlightened mind, he purposes to make the best of his body, not to poison it with alcohol or to pollute it with disease. For his own sake and for the sake of the future of the race, he conducts himself morally. His philosopher, guide and friend, however, is the physician and science is his inspiration and his teacher.

PYREX

Saves Fuel, Food and Labor

PYREX saves about one half the fuel usually required, because it absorbs nearly all the oven heat and bakes food quickly.

PYREX saves food in many ways. Meats, vegetables, etc., when cooked in PYREX, retain their natural color and flavor to such a degree that economy may be practiced in buying the less expensive kinds and yet have delicious food. Most foods usually cooked on top of the stove can be better prepared in the oven.

PYREX saves labor—it is always free from grease and odors, for nothing can penetrate the hard smooth surface. You can wash it as easily as your china and silver.

Every practical shape and size for baking is made in PYREX. It is ready for immediate use and never discolors, rusts, dents or chips.
