CITY MAY HAVE BIG FUTURE

Dakar, in South Africa, Promises to Develop Into Something Like Another Liverpool.

The city of Dakar in South Africa, less than half a century ago in a really primitive condition, with naked children running around the streets and mothers working with babies strapped upon their backs, has suddenly come into prominence as the prospective "Liverpool" of Africa. In the keen competition that is expected between America and Europe for trade in South Africa, Dakar, it is believed, will have an important role to play.

The French are today making extensive improvements at Dakar. They have spent much money in enlarging the dry dock and making the harbor deeper as well as increasing the facilities for transferring cargo from boat to train. The Dakar of today is a thriving town of about 25,000 people, with wide well-laid-out streets, a large technical school, hospitals and workshops. There are, however, a great majority of natives, being in fact, only about 3,500 Frenchmen.

These natives have been said by some to have formerly been the masters of the Mediterranean. They are wonderful fighters and it was only with great difficulty that in 1862, Gen. Faidherbe, the French governor, was able to overcome them. Thus he paved the way for the founding of Dakar. We may know a great deal more about it later.

Navy's Great Airship Hangar.

The navy is purchasing its first rigid airship in England at a cost of \$2,500,000. To house it a huge hangar is to be erected at Lakehurst, N. J., which will be 800 feet long, 265 feet wide, and will have a clear inside height of 174 feet, while the total height from the ground to the peak of the roof will be over 200 feet. The steel framework will be over 6,000 tons. Two elevators and several stairways will lead to the roof. The many shops necessary for the maintenance of the airships will be built in between the great arched trusses that support the roof. Three railroad tracks will run the entire length of the building. The hangar will be large enough to hold one ship of 10,000,000 cubic feet capacity, and a smaller one at each side, or two 5,000,000 cubic feet ships side by side.—Scientific American.

HAS STIRRED UP ANTIQUARIES

Englishman Believes He Has Discovered the Site of Edward the Confessor's Palace.

In Windsor's great park the discovery has been made of what appears to be the site of Edward the Confessor's palace. The discoverer, Capt. Vaughan Williams, had his attention drawn to two mounds where rabbits had been burrowing, and here he unearthed some tiles like Norman bricks. He next came upon flints, sandstone and tiles, and he is continuing the search. In the days of Queen Victoria a tower with walls 12 feet thick was pulled down which was said by archeologists to have been built by Edward the Confessor. The secretary of the Berkshire Archeological society in connection with Captain Williams' find, states that there was before the foundation of Windsor castle a palace in Windsor forest where many notable events happened. This palace had a tower as a means of defense. In a Harleian MS. an illumination occurs which represents a palace where a lady is seen giving alms and earning for herself the title of "loaf-giver." The manor of Old Windsor belonged to the Saxons, kings, and Edward the Confessor certainly held court there. Edward being prevented by his nobles from going to Rome caused Westminster to be built with the money which he would have spent on his journey. He then gave Old Windsor to the monks, but the gift was revoked by William the Conqueror, who found Windsor convenient for his hunts in the forests.

Portable Electric Grinder.

A portable electric grinder for the machine shop, designed to be moved over the work, has the motor of one-eighth to one-half horsepower placed above the work out of the operator's way. The spindle is bored with a five-sixteenth-inch hole to receive an adjustable shaft for interior grinding, and the use of interchangeable grinding wheels adapts the little machine to a wide range of work.

Practical Economy.

"Wife ever get an economical streak?"
"She does. Only this summer she figured out she could save \$8 in one week by doing her own housework."
"How did it work out?"
"She got a cook book. I got 378 peeps and the doctor got the \$8."
