New System of Wagon Brakes.

TRULLINGER PATENT BRAKE.

NO SHOES TO WEAR OUT TIRES!

No Brake Bar used. Will Hold a Wagon
Anywhere from Backing or Going
Forward.

THIS NEW BRAKE NOW BEING INTRO-
duced by the inventor, J. C. Trullinger,
is a combination of friction gear applied to the
hub of a wagon. It is simple and light, yet has
more strength and durability than any other
wagon brake now in use. It is so attached to
the wagon that it is out of the way of the gear-
ing, yet always reliable and at hand when re-
quired. Any teamster or mechanic can see at
once its utility and effective force to hold a load
on a down grade or to prevent horses backing
when required. The brake is made entirely of
iron, no wooden part being necessary, as no
brake bar is used; hence it does not carry mud
and is not affected by wet and muddy or icy roads.
We invite critical examination, as we believe
its merits can be demonstrated to any party who
uses or understands a wagon brake.
