The Best Fruit Dryer of All.

I now have control, for this coast, of the machines invented by Hampt & Kelly for preserving and drying fruit and vegetables, owned by Messrs. Kelly, Cole & Watson, and shall proceed to canvass for sale of machines and individual and county rights for Oregon, Washington and California; also, for the sale of an improved press for packing dried fruits and vegetables—the best ever made and used.

These machines are Kelly's Fruit and Vegetable Grinder, That makes a pulp of fruit preparatory to evaporation and drying for market.

Kelly's Centennial Fruit Dryer, That prepares the pulp above described for use, by drying the same.

Kelly & Cole Fruit Dryer,

Of sizes that range in cost from \$75 to \$125 each, with capacity to dry from 15 to 30 bushels of apples per day of ten hours' work. This dryer has no superior, and is represented in the accompanying cut.

Reference is made to the following named persons: Linus Brooks and Shaw & Allen, Brooks' station, and many others who have used the dryers and know the quality of fruit

when dried, and the capacity and safety of the machines, which are heated by steam, so they cannot burn the fruit, neither are they liable to destroy the building, as has been the case in this State with others. The quality of the fruit, when dried, is equal to the best manufactured, and we believe it superior to all others.

Collver's Fruit and Vegetable Press

Is intended for packing dried fruit or vegetables in two to five-pound boxes, and puts it in the best possible condition and form for private use, at trifling cost.

I shall be prepared to fill orders for the paper boxes from Eastern manufacturers, at low prices.

Three years ago I put up on my fruit farm on Coos river, Coos county, an Alden Fruit Drying Factory that is now owned and operated successfully by my son. I am fully posted as to the business of drying fruits after eighteen years' experience, and unhesitatingly pronounce the Kelly & Cole Dryer without a superior, and just the machine needed for use by the majority of fruit growers. A. B. COLLVER.
