

vember 1st. It has been a success, both financially and otherwise, and the Directors have every reason to feel proud of their achievement. Especial praise is due to President F. C. Smith, and Mr. Frank Dekum, who have devoted all their time to this praiseworthy and thankless work of managing the first

Mechanics' Fair. The selection of Superintendent was a very happy one. Mr. Oldendorff is evidently the right man in the right place, and deserves the thanks of all interested for his fatherly care in everything which helped to make the fair so brilliant a success. In our August issue, we gave

60. Hodge, Davis & Co.—This exhibit attracts a great deal of attention by the beauty of the materials and the taste and skill shown in the arrangement. A splendid case of chemicals manufactured expressly for the firm, embracing many rare and costly preparations, put up in elegant style, form the background. A show case with a fine display of Artist's Materials, including Tube Colors of the best American and English brands, fine Label Brushes, Palettes, Palette Knives, etc., an attractive display of Dry Colors in show bottles, present a variegated appearance; White Lead, showing the various processes of manufacture, also the manufactured article, dry and ground in oil, in kegs with glass heads; a display of Ground, Colored and Enamelled Glass for Doors, Transoms, etc.; an assortment of Flavoring Extracts, in large and small bottles, and filling two large show globes; for these Extracts the firm have a large sale, as they are of unequalled flavor, purity and strength; a line of Fluid Extracts of their own manufacture is something new in this market, nothing of the kind having been attempted before; in excellence they are unsurpassed, and in beauty and style of putting up we hazard nothing in saying that they equal if they do not surpass the Extracts of any maker in the United States. The exhibit of Kidney Tea is prominent and well arranged; this remedy is meeting with an immense sale and performing wonderful cures; being a purely vegetable production, it commends itself at once to public favor, as it contains no mineral poisons.
