THE LABBE BLOCK.

The new four-story fireproof building, recently completed on the northeast corner of Washington and Second streets by Labbe Bros., is one of the handsomest places erected during the past year. Labbe Bros. deserve great credit for their enterprise, and the erection of such a building in that locality shows them to be far-seeing business men. The stores, four in number, have all been leased to responsible merchants. So also has been a greater part of the second, third and fourth stories for offices, etc. On page 25 in this issue will be found a fine engraving of the building. As will be seen, the corner store is occupied by the enterprising firm,

C. C. MORSE & CO.,

importers and manufacturers of pictures, frames and mouldings, artists' materials, brackets and fancy goods. Their establishment is popularly known as Morse's Palace, and is the principal art gallery in Portland. They do all kinds of gold framing and regilding. The firm is known throughout the Northwest as an honorable one, and their prices for all kinds of goods are lower than any other house in the city.

E. R. BEHLOW.

In the store next the Washington street entrance to the building is located E. R. Behlow, the leading furrier of this city. Mr. Behlow established himself here during the past year. From the first opening of his doors he has been favored with a large patronage from our best citizens. We have not inquired especially into the cause for his immense success, but Dame Rumor gives out that it is because he has broken the backbone of high prices which ruled here for so many years in this line of business. There is strong evidence that this is so from the very fact that his establishment is constantly thronged by purchasers, many of whom are people who in the past have considered such goods out of their reach. His stock will compare favorably with leading dealers in larger cities. Furs of every description are carried in stock. Seal skin cloaks, fur-lined circulars, mink skin caps, muffs, robes, etc., are displayed in great profusion, all combining to make one of the most beautiful and elegant stocks we have seen. Labbe Bros. are fortunate in securing such creditable tenants.

DR. E. O. SMITH.

the favorite dentist, occupies the corner rooms on the second floor. As regards his skill he needs no word from us, as his reputation for first class and careful work extends throughout the Northwest. Next to Mr. Smith's office is located

DR. CLOWE,

the popular physician and surgeon. He has a large and rapidly increasing practice, and is noted for his great success in difficult cases. He is a graduate of the best medical colleges and stands high in his profession.

THE CONTRACTOR.

To erect a building like the Labbe block required the most skilled mechanics in every branch represented. In the first place the contractor had to be one who was thoroughly competent for the work. It was not so much the question of dollars and cents for which the many bidders were willing to underbid the work, but that the one most competent to carry it to a successful completion should be selected. In this Labbe Bros. made a wise selection in the person of John Robertson, than whom there is not a more thorough mechanic in the city. In his charge every detail has been faithfully carried out, and the result is a building that will stand for ages as a monument of mechanical skill and splendid workmanship. Mr. Robertson is so well known for his thorough knowledge of building that he receives all the more important contracts in Portland. Besides the Labbe block there is the high school building, Twelfth and Morrison streets, Reid's bank, the railroad shops at Albion, the additional stories to C. H. Prescott's residence, the stables for the new truck company and the work on the N. P. Terminal Company's hotel, all of
