

works and railroad buildings, approxi- large and imposing edifice. This will, mate \$2,000,000.00 in value. no doubt, become a favorite stopping

The city occupies a peninsula, bound- place for tourists, who desire to enjoy ed by Burrard inlet on the north, and the scenery, hunting and fishing of the English bay and False creek on the surrounding country, or to rest from the south. The harbor proper, known as fatigue of a long journey.

Coal harbor (see page 423), lies on the inlet, just east of the first narrows, and is a body of deep water, perfectly shel- mountain water, which is being brought tered on all sides, three miles wide, and distant. This will be conducted to the nearly as long at the town site. It prac- city in iron pipes, at an expense, including mains, etc., of about \$250,000.00. A twelve miles, affording ample accommo- system of gas works and pipes will be dation for the commerce of the largest put in at once, costing about \$150,000.00. The electric light will also be a feature city in the world. On the opposite, or outer, side, is English bay, a roadstead in which vessels may lie at anchor, se- facilities of the most complete kind will cure from all but the severest storms. be provided.

An arm of the inlet cuts through the lower end of the peninsula, to within a few yards of the bay, through which a navigable passage can be made, by which vessels can quickly pass from one to the Pacific coast ports to eastern cities. It other. The railway company's terminal has control of routes by which it can works are being constructed along the outer Chicago, New York and Boston, bay, where huge round-houses and shops and can compete with American roads are in progress of erection. Immense warehouses, a large depot, etc., are be- and Puget sound, Portland and San ing constructed on the inner harbor, Frasian. Arrangements have been which is the terminus proper, and will made for a line of steamers to ply be- be the point for receipt and shipment of tween Vancouver and Hong Kong. These merchandise. One huge warehouse is first-class iron steamers have been par- already completed, being hastened for channed for this route, being the *Perfido*, the reception of the first cargo of tea for Abyssinia and Balowia, well known to this season. Last year seven cargoes travelers on the Atlantic. The route were handled, representing a value of from Yokohama to Coal harbor is one \$2,000,000.00, and a much larger quantity is expected.

The town site occupies high ground, but has no extremely steep hills. From the center of the peninsula it slopes toward both water fronts. On this central ridge, the railway company is erect- ing a hotel, which is to cost \$250,000.00, when completed according to the plans. A portion of it has been hastened to com- pletion (see page 423) for immediate use, costing \$125,000.00, and making a

The city will be provided with the best in from the mountain lakes a few miles city in iron pipes, at an expense, including mains, etc., of about \$250,000.00. A system of gas works and pipes will be put in at once, costing about \$150,000.00. The electric light will also be a feature of the city, and telegraph and telephone facilities of the most complete kind will be provided.

Commercially, Vancouver will speed-ily assume a commanding position. The Canadian Pacific is already hauling a large share of the through freight from the Pacific coast ports to eastern cities. It other. The railway company's terminal has control of routes by which it can work along the outer Chicago, New York and Boston, bay, where huge round-houses and shops and can compete with American roads are in progress of erection. Immense warehouses, a large depot, etc., are be- and Puget sound, Portland and San ing constructed on the inner harbor, Frasian. Arrangements have been which is the terminus proper, and will made for a line of steamers to ply be- be the point for receipt and shipment of tween Vancouver and Hong Kong. These merchandise. One huge warehouse is first-class iron steamers have been par- already completed, being hastened for channed for this route, being the *Perfido*, the reception of the first cargo of tea for Abyssinia and Balowia, well known to this season. Last year seven cargoes travelers on the Atlantic. The route were handled, representing a value of from Yokohama to Coal harbor is one hundred miles shorter than to San Fran- cisco, and from Coal harbor to New York it is one hundred and fifty miles shorter than from San Francisco. From Yokohama to Liverpool, via Vancouver, it is nine hundred miles less than via San Francisco. These advantages, in connection with the independent position of the Canadian Pacific, must have a great effect upon commerce and travel. The British government has already re- organized this by granting a subsidy for
