

Luxury Defined:
HARD MILLED SOAPS

Soap was invented in Roman times, and for many centuries bathing with it was considered a luxury. But with the quality of early soaps, which were crudely-produced brittle blocks, it's hard to believe the process of lathering was really all that luxurious. Soap quality eventually improved with the advent of the "milling" process, in which soap is run through a series of rollers to eliminate excess water and air. While most mass-produced soaps are no longer milled, "Hardmilled" or "triple-milled" soaps are still available to buyers seeking the best in texture and quality. Unlike the softer soaps you'll find in the grocery store, these soaps resist cracking, retain their fragrance, and last much longer in the soap dish.
